PREFACE	v
1. SECOND FRITZ LONDON AWARD	
1-1 <i>Lev Davydovich Landau.</i> J. R. Pellam	2
2. THE MÖSSBAUER EFFECT	
2-1 <i>Theoretical Aspects of the Mössbauer Effect.</i> J. van Kranendonk	9
2-2 The Effect of Relaxation Phenomena on Mössbauer Experiments. W. Low	20
2-3 <i>Experimental Aspects and Applications of the Mössbauer Effect.</i> Paul P. Craig	22
3. MAGNETIC RELAXATION	
3-1 <i>Relaxation and Temperature in Magnetic Spin Systems.</i> N. Bloembergen	36
3-2 Spin-Lattice Relaxation in Neodymium Ethylsulphate at Liquid Helium Temperatures. J. M. Daniels and K. E. Rieckhoff	51
3-3 Spin-Lattice Relaxation in Cerium Magnesium Nitrate at Helium Temperatures: A New Two-Phonon Process. C. P. B. Finn, R. Orbach, and W. P. Wolf	54
3-4 On the General Shape of the Spin-Spin Absorption Band. P. R. Locher and J. C. Verstelle	56
3-5 Field Dependence of Nuclear Magnetic Spin Absorption Spectra. A. G. Anderson	59
4. LIQUID AND GASEOUS H ₂	
4-1 <i>Nuclear Spin Relaxation in Gaseous and Liquid Hydrogen.</i> Myer Bloom	61
4-2 Nuclear Spin Relaxation and Molecular Diffusion in Liquid Hydrogen. G. Seidel, W. P. A. Hass, and N. Poulis	73
4-3 On the Theory of Nuclear Spin Relaxation in Gases and Liquids. I. Oppenheim and M. Bloom	76
4-4 Nuclear Spin Relaxation Measurements in Hydrogen Gas. M. Lipsicas and M. Bloom	78
4-5 Quantum Properties of Gaseous H ₂ and D ₂ at Low Temperatures. M. J. Offerhaus and J. de Boer	81

CONTENTS

5. MAGNETISM BELOW 1° K

5-1	<i>Magnetism at Temperatures below 1° K.</i> C. J. Gorter	84
5-2	Recent Progress in Nuclear Cooling. C. Froidevaux and J. R. Keyston	93
5-3	Paramagnetic Susceptibility of Synthetic Ruby Crystals below 1° K. J. G. Daunt, D. O. Edwards, M. Kreitman, R. C. Pandorf, and J. W. Snider	96
5-4	Some Physical Properties of Single Crystal Potassium Chrome Alum. M. H. Norwood and A. C. Thorsen	98
5-5	Low Temperature Properties of Cerous Magnesium Nitrate. R. P. Hudson, R. S. Kaeser, and H. E. Radford	100
5-6	Magnetic Dipole Interaction in Dysprosium Ethylsulphate. A. H. Cooke, D. T. Edmonds, C. B. P. Finn, B. R. Heap, and W. P. Wolf	107
5-7	Nuclear Magnetic Resonance in NiSiF ₆ .6H ₂ O below 1° K. T. Sugawara	108
5-8	Susceptibility Measurements and Nuclear Orientation in Magnetically Ordered Tutton Salts. A. R. Miedema and W. J. Huiskamp	110
5-9	Development of the Magnetic Refrigerator. W. A. Little, R. D. Parks, and N. P. Shah	112
5-10	Magnetic Cooling with Thorium-Dysprosium Alloys. R. D. Parks and W. A. Little	114
5-11	The Flow of Heat in Paramagnetic Salts below 1° K. E. Mendoza	117
5-12	Nuclear Spin Thermometry and Relaxation below 1° K. C. Froidevaux, E. L. Hahn, and R. Walstedt	118

6. FURTHER COMMUNICATIONS ON MAGNETISM

6-1	The Magnetic Susceptibilities of Mn(C ₂ H ₃ O ₂) ₂ .4H ₂ O and Cu(HCO ₂) ₂ .4H ₂ O at Low Temperatures. S. A. Friedberg and R. B. Flippen	122
6-2	Specific Heat of Some Rare-Earth Iron Garnets between 1.4° K—20° K. A. B. Harris and Horst Meyer	125
6-3	Spin Wave Spectrum in Garnets and their Low Temperature Properties. B. Dreyfus	127
6-4	The Magnetic Susceptibility of Ytterbium Gallium and Ytterbium Aluminum Garnets. M. Ball, G. Garton, M. J. M. Leask, and W. P. Wolf	128
6-5	Effect of Thermomolecular Flow on Low Temperature Magnetic Susceptibility Measurements. A. N. Gerritsen and D. H. Damon	131
6-6	Neutronographic Study of Antiferromagnetism MnCO ₃ , FeCO ₃ , and NiF ₂ . R. A. Alikhanov	133
6-7	Low Temperature Paramagnetism of Trapped O ₂ Molecules. S. Foner, W. H. Kleiner, and H. Meyer	134

CONTENTS

6-8	Nuclear Spin Susceptibility of HD below 1° K. D. C. Freeman, Jr.	135
6-9	Magnetic Relaxation in Ferromagnetic Metals. G. R. Khutsishvili	138
6-10	Paramagnetic Resonance Spectra of Rare-Earth Ions in Cubic Crystalline Fields. W. Low	140
6-11	Low Temperature Nuclear Relaxation of Fluorine in Calcium Fluoride. Stephen M. Day and Eizo Otsuka	141
6-12	Proton Magnetic Resonance in Single Crystals of Vivianite (Fe ₃ (PO ₄) ₂ ·8H ₂ O). W. van der Lugt and N. J. Poulis	144
6-13	Optical Absorption Spectra and Zeeman Effect of Guanidine Chromium Sulphate. L. Couture and F. Brunetière	145

7. POLARIZATION OF PROTONS

7-1	Experiments on Dynamic Polarization of Protons in Polyethylene by the Solid Effect—A Proposed Polarized Proton Target. Chester Hwang and T. M. Sanders, Jr.	148
7-2	Dynamical Polarization of Protons in High Fields. M. Borghini	152

8. NUCLEAR ORIENTATION

8-1	<i>Nuclear Orientation.</i> N. Kurti	156
8-2	Nuclear Orientation of Tb ¹⁵⁶ . C. A. Lovejoy and D. A. Shirley	164
8-3	Nuclear Orientation in Antiferromagnetic Single Crystals. J. M. Daniels, J. C. Giles, and M. A. R. LeBlanc	166
8-4	Effect of Magnetic Interactions on the Nuclear Orientation of Cobalt-60 in Cerium Zinc Nitrate. M. W. Levi, R. C. Sapp, and J. W. Culvahouse	168
8-5	Polarization of Nuclei of Weakly Magnetic Elements Introduced in Ferromagnets. B. N. Samoilov, V. V. Sklyarevsky, and E. P. Stepanov	171
8-6	Fission Fragments from Oriented U ²³³ and U ²³⁵ . L. D. Roberts, F. J. Walter, J. W. T. Dabbs, G. W. Parker, and J. O. Thomson	174
8-7	Alpha-Particle Emission from Oriented Np ²³⁷ . J. W. T. Dabbs, S. H. Hanauer, L. D. Roberts, F. J. Walter, and G. W. Parker	177
8-8	Experiments on the Beta and Gamma Emission from Oriented Ho ^{166m} and Tb ¹⁶⁰ Nuclei. H. Postma and W. J. Huiskamp	180
8-9	Beta Emission from Polarized Co ⁵⁵ , Mn ⁵⁶ , and Pr ¹⁴³ -Nuclei. H. Postma and W. J. Huiskamp	183
8-10	The Angular Distribution of Beta Particles from Oriented Cerium-141 Nuclei. D. D. Hoppes	186
8-11	Nuclear Orientation of Pm ¹⁴⁴ . J. F. Schooley, D. A. Shirley, and J. O. Rasmussen	188
8-12	Nuclear Alignment of Iodine by Quadrupole Coupling. C. E. Johnson, J. F. Schooley, and D. A. Shirley	191
8-13	Investigation of Nuclei Oriented in Iron Alloys at Very Low Temperatures. A. V. Kogan, V. D. Kulkov, L. P. Nikitin, N. M. Reinov, I. A. Sokolov, and M. F. Stelmach	193

CONTENTS

- 8-14** On Orientation of Nuclei in Ferrites and Garnets. G. R. Khut-sishvili 194
- 8-15** Interaction of Polarized Resonance Neutrons with Polarized Targets. A. Stolovy 196

9. FERMI SURFACE

- 9-1** *Recent Developments in the Determination of Fermi Surfaces.* D. Shoenberg 200
- 9-2** Experimental Investigations on the Galvanomagnetic Properties of Metals and Topology of the Fermi Surface. N. E. Alekseevski and Yu. P. Gaidukov 209
- 9-3** Anisotropy in the Hall Effect and Magnetoresistance of Single Crystals of High Purity Copper. J. E. Kunzler, J. R. Klauder, and G. F. Brennert 210
- 9-4** Open Orbits and the Fermi Surface of Copper from Magneto-resistance and Hall Effect Data. J. R. Klauder and J. E. Kunzler 213
- 9-5** The Transverse Magnetoresistance of Zinc and Cadmium at 4.2° K in Fields from Zero to 7000 Oersteds. C. A. Renton 216
- 9-6** A Study of Cyclotron Resonance in Tin. M. S. Khaikin 220
- 9-7** The Oscillatory Dependence of the Surface Impedance of Metals upon a Weak Magnetic Field. M. S. Khaikin 224
- 9-8** Cyclotron Resonance in Bismuth and Lead. J. E. Aubrey 226
- 9-9** Fermi Surface Areas and Fermi Velocities of Mg, Zn, and Cd. E. Fawcett 228
- 9-10** The de Haas-van Alphen Effect in Aluminum and Magnesium. M. G. Priestley 230
- 9-11** The de Haas-van Alphen Effect in Calcium. T. G. Berlincourt 231

10. ULTRASONIC ATTENUATION

- 10-1** *Ultrasonic Attenuation in Metals.* R. W. Morse 233
- 10-2** Shear Wave Attenuation in Normal and Superconducting Tin. A. R. Mackintosh 240
- 10-3** Ultrasonic Attenuation in Real Metals. R. G. Chambers 243

11. RESISTANCE MINIMA

- 11-1** *The Minimum in the Electrical Resistance vs. Temperature Curve; The Progress Concerning the Cause.* G. J. van den Berg 246
- 11-2** The Electrical Resistance and Magneto-Resistance of Noble Metals Diluted with Transition Elements of the Second Series. B. Knook and G. J. van den Berg 257
- 11-3** Magnetic Susceptibility and Electron Spin Resonance Studies in Dilute Mg-Mn and Al-Mn Alloys at Low Temperatures. E. W. Collings and F. T. Hedgcock 259

CONTENTS

- 11-4** The Hall Effect of Diluted Alloys of Mn in Ag. B. Franken and G. J. van den Berg 261
- 11-5** A Specific Heat Anomaly at Low Temperatures in a Dilute Copper-Iron Alloy Showing a Resistance Minimum. Douglas L. Martin and J. P. Franck 262

12. FURTHER COMMUNICATIONS ON TRANSPORT PROPERTIES IN SOLIDS

- 12-1** The Magnetoresistive Size Effect in Indium in High Magnetic Fields. P. Cotti, C. Froidevaux, J. R. Keyston, and J. L. Olsen 265
- 12-2** A Direct Comparison of the Mean Free Paths for Electrical and Thermal Conduction in Indium at Low Temperatures. J. L. Olsen and P. Wyder 266
- 12-3** Lorenz Number of Copper. G. K. White and R. J. Tainsh 268
- 12-4** Electrical Resistivities of Zirconium with Dilute Additions of Ag, Cd, In, Sn, and Sb. J. O. Betterton, Jr., and D. S. Easton 270
- 12-5** Scattering of Lattice Waves by Point Defects. P. G. Klemens, R. J. Tainsh, and G. K. White 273
- 12-6** Dislocation Resistance and the Variation of Lattice Conductivity with Impurity. P. Lindenfeld and W. B. Pennebaker 276
- 12-7** Effect of Oxygen on the Thermal Conductivity of Silicon. M. G. Holland 280
- 12-8** The Low Temperature Aspects of the Thermal Conductivity and the Thermoelectric Power of n-Type Germanium. J. F. Goff and N. Pearlman 284
- 12-9** Infrared Absorptivity of Dilute Copper-Germanium Alloys at 4.2° K. J. A. Rayne 288
- 12-10** Attenuation of Sound in Germanium at Ultra-High Frequencies. E. Roland Dobbs 291
- 12-11** Cyclotron Resonance over a Wide Temperature Range. D. M. S. Bagguley, R. A. Stradling, and J. S. S. Whiting 293
- 12-12** De Haas-van Alphen Effect and Coulomb Interaction. Hiroshi Ichimura and Setsuko Tanaka 294

13. THEORY OF SUPERCONDUCTIVITY

- 13-1** *Some Recent Developments in the Theory of Superconductivity.* P. W. Anderson 298
- 13-2** Theory of Superconductors Containing Paramagnetic Impurities. A. A. Abrikosov and L. P. Gor'kov 310
- 13-3** On the Behaviour of Superconductors in Strong Magnetic Fields. V. L. Ginzburg 312
- 13-4** On the Theory of Superconductors in High Magnetic Fields. L. P. Gor'kov 315
- 13-5** Calculation of the Surface Energy Parameter Δ Associated with a Normal-Superconducting Interface. R. H. Parmenter 317

CONTENTS

14. ELECTRICAL PROPERTIES OF SUPERCONDUCTORS

14-1	<i>Recent Experiments on the Electrical Properties of Superconductors.</i> A. B. Pippard	320
14-2	The Density of States in a Superconductor Measured by Electron Tunnelling. I. Giaever	327
14-3	Penetration Depth Measurements in Pure and Impure Aluminum at 170 Mc/s. W. L. McLean	330
14-4	The High Frequency Surface Impedance of Aluminum. D. Llewelyn Williams	331
14-5	Magnetic Field Dependence of the Surface Impedance of Superconducting Tin at 3 kMc/sec. P. L. Richards	333
14-6	On the Switching Time of Bulk Superconducting Tin. A. H. Nethercot, Jr.	336

15. SUPERCONDUCTIVITY OF Hg AND Ta

15-1	<i>Superconducting Properties of the Two Modifications of Mercury.</i> C. A. Swenson and J. E. Schirber	338
15-2	The Pressure Effect in Superconducting Tantalum. C. A. Swenson and C. H. Hinrichs	345
15-3	The Critical Field Curve of Impure Mercury. R. G. Chambers and J. G. Park	347

16. SPECIFIC HEAT OF ALLOYS

16-1	<i>A Study of the Band Structure and Superconducting Properties of Several γ-Uranium Alloys from Measurements of their Specific Heats between 1° K and 4° K.</i> B. B. Goodman, J. Hillairet, J. J. Veysié, and L. Weil	350
16-2	The Specific Heats of Some Zirconium Alloys. G. D. Kneip, Jr., and J. O. Betterton, Jr.	357
16-3	Low Temperature Heat Capacities of Superconducting bcc Ti-Mo Alloys. R. R. Hake	359

17. INTERMEDIATE STATE

17-1	Critical Current for Superconducting Niobium Wire and Ribbons in External Magnetic Fields. M. A. R. LeBlanc and W. A. Little	362
17-2	The Importance of the Differential Paramagnetic Effect in Superconductors. R. L. Falge, Jr., and R. A. Hein	365
17-3	The Intermediate State of Tin. W. DeSorbo	367
17-4	Anisotropy of the Interphase Surface Tension in the Intermediate State of Tin. Yu. V. Sharvin and V. F. Gantmacher	370
17-5	The Intermediate State Structure and Surface Energy of Mercury. C. A. Shiffman	373

CONTENTS

17-6	Measurement of Surface Energy in Superconductors by means of Intermediate State Powder Patterns. F. Haenssler and L. Rinderer	375
18. FURTHER COMMUNICATIONS ON SUPERCONDUCTIVITY		
18-1	A Search for New Superconductors. Myron Strongin and Henry A. Fairbank	377
18-2	Superconductivity in the System Niobium-Tin. H. G. Jansen and E. J. Saur	379
18-3	Superconducting Properties of the (Nb, Ta, V) ₃ Sn System. G. D. Cody, J. J. Hanak, G. T. McConville, and F. D. Rosi	382
18-4	Superconductivity and Ferromagnetism in the System GdRu ₂ -ThRu ₂ . R. M. Bozorth, B. T. Matthias, and D. D. Davis	385
18-5	Superconducting Transition Temperatures of Titanium and Titanium Isotopes. R. G. Netzel and J. R. Dillinger	389
18-6	Impurity and Strain Effects in Superconductors. Bernard Serin	391
18-7	The Use of Superconductivity in Studying Neutron Irradiation Damage in Rhenium and Tin. J. Blanc, B. B. Goodman, G. Kuhn, E. A. Lynton, and L. Weil	393
18-8	Irradiation Effect on the Transition Temperature of Superconducting Tin. L. Rinderer and E. Schmid	395
18-9	The Specific Heat of Superconductors near the Critical Temperature. John F. Cochran and Pieternella Cochran	397
18-10	Specific Heat of Indium between 0.35° K and 4.5° K. C. A. Bryant and P. H. Keesom	400
18-11	Heat Capacity of Gallium and Mercury at Temperatures below 1° K. R. L. Douglass, R. G. Petersen, and N. E. Phillips	403
18-12	Thermal Conductivity of Superconductors, Al, Zn, and Cd. C. B. Satterthwaite	405
18-13	Thermal Conductivity of Pure Indium. R. E. Jones and A. M. Toxen	407
18-14	Thermal Conduction in Tin and Indium. A. M. Guénault	409
18-15	Size and Impurity Effects in Nuclear Spin Relaxation in Superconductors. Yoshika Masuda and A. G. Redfield	412
18-16	Diamagnetism of Many-Fermion Systems. G. L. Sewell	413
18-17	Current Flow in Thin Superconducting Films. Leon N. Cooper	416
18-18	Currents and Fields in a Superconducting Film Carrying a Steady Current. Paul M. Marcus	418
18-19	Calculation of the rf Hall Angle for a Superconductor. G. Dresselhaus and M. S. Dresselhaus	421
19. FLOW PROPERTIES OF LIQUID HELIUM-4		
19-1	<i>Transport Properties of Liquid Helium.</i> J. R. Pellam	424
19-2	The Effect of Channel Geometry and Rotation on the Critical Heat Current in Liquid Helium II. C. E. Chase	438

CONTENTS

19-3	The Energy Per Unit Length of a Free Vortex Line in Helium II. W. F. Vinen	441
19-4	Vorticity in Helium II. John D. Reppy and C. T. Lane	443
19-5	Evidence of the Nature of Rotating Liquid Helium. J. R. Pellam	446
19-6	The Torsional Rigidity of Rotating Helium II. D. V. Osborne	449
19-7	On the Hydrodynamics of Liquid Helium II. C. C. Lin, R. J. Gribben, and A. Clark	450
19-8	Oscillations of a Disk in Rotating Helium II. Yu. G. Mamaladze and S. G. Matinyan	451
19-9	Investigations of Oscillating Processes in Rotating Helium II. E. L. Andronikashvili, J. S. Tsakadze, and K. B. Mesoed	454
19-10	Phenomenological Deduction of Vortex Motion Equations of He II. I. L. Bekarevich and I. M. Khalatnikov	459
19-11	Hydrodynamic Drag Force on Spheres Falling in Liquid Helium. R. A. Laing and H. E. Rorschach, Jr.	461
19-12	The Drag Coefficient of a Sphere in Liquid Helium II. Mark W. Dowley and A. C. Hollis Hallett	464

20. KAPITZA BOUNDARY LAYER

20-1	<i>The Kapitza Resistance.</i> L. J. Challis	466
20-2	The Heat Flow between Metals and Liquid Helium II. L. J. Challis	476
20-3	Theory of Kapitza's Temperature Gap at the Boundary of a Solid Body and Liquid He ³ . I. L. Bekarevich and I. M. Khalatnikov	480
20-4	The Kapitza Resistance. W. A. Little	482
20-5	On the Measurement of Thermal Conductivity and Kapitza Boundary Resistance of Liquid He ³ . J. Jeener and G. Seidel	483

21. IONS IN LIQUID HELIUM

21-1	<i>Ions in Liquid Helium.</i> Lothar Meyer	487
21-2	Injection and Mobility of Photoelectrons in Liquid Helium II. A. Dahm, J. Levine, J. Penley, and T. M. Sanders, Jr.	495
21-3	Ionic Mobilities in Liquid Helium II. G. Careri, S. Cunsolo, and F. Dupré	498
21-4	Study of Superfluid Liquid He by Ion Motion: Mobilities in Low Electric Fields. F. Reif and Lothar Meyer	501
21-5	Ions in the Turbulent Flow of Liquid Helium-4. G. Careri, F. Scaramuzzi, and W. D. McCormick	502
21-6	Ionic Recombination in Liquid Helium. G. Careri and F. S. Gaeta	505
21-7	Study of Superfluid Liquid He by Ion Motion: Field Dependence of the Drift Velocity. L. Meyer and F. Reif	508

CONTENTS

21-8	Scattering of Thermal Excitations by Ions in Liquid Helium. J. de Boer and A.'t Hooft	510
21-9	Ions in Liquid Helium. K. R. Atkins	513

22. HELIUM FILM

22-1	Film Transfer in He II. J. F. Allen	515
22-2	On the Mechanism of Superfluid Flow. C. G. Kuper	516
22-3	Thermal Oscillations Involving the Unsaturated Helium Film. F. D. Manchester and Adele Buckley	519
22-4	The Flow of the Saturated Liquid Helium Film at Subcritical Velocities. Hajime Seki	522
22-5	Volume Flow Rate of the He II Film on Glass. R. W. Selden, D. A. Neeper, and J. R. Dillinger	525
22-6	Observations of Abrupt Changes in the Thickness of the He II Film. D. H. Liebenberg and J. R. Dillinger	527
22-7	Third Sound on a Liquid Helium Film. K. R. Atkins, A. Denenstein, and L. G. Grimes	529
22-8	The Influence of He ³ on Film Flow. C. J. N. van den Meydenberg and K. W. Taconis	530

23. FURTHER COMMUNICATIONS ON THE PROPERTIES OF HE⁴

23-1	Double Refraction of Solid Helium. B. S. Blaisse, H. J. M. Lebesque, J. W. D. van Overhagen, and J. C. A. van der Sluijs	533
23-2	Direct Measurements of $(\partial p/\partial T)_V$ of Liquid Helium near the λ -Curve. O. V. Lounasmaa and L. Kaunisto	535
23-3	Modes of Atomic Motions in Liquid Helium by Inelastic Scattering of Neutrons. D. G. Henshaw and A. D. B. Woods	539
23-4	Liquid He II: Quasi-Hydrodynamic Normal Modes for the Condensed Bose System. P. R. Zilsel, Virginia F. Walters, and R. T. Whitlock	544
23-5	Surface Tension of Liquid Helium. K. R. Atkins and Y. Narahara	549
23-6	Resonant Systems for Second Sound. H. A. Snyder	551
23-7	Diffraction of Heat Waves in Stationary and Rotating Liquid Helium. J. Mercereau, H. Notarys, and J. R. Pellam	552
23-8	Investigation of Relaxation Times of Creation and Disappearance of Vortices in Helium II by the Method of Second Sound Attenuation. E. L. Andronikashvili and R. A. Bablidze	555
23-9	Critical Velocities in Superfluid Helium. V. P. Peshkov	555
23-10	Critical Velocities Measured with Oscillating Cylinders in Liquid Helium II. F. Anglin and C. B. Benson	558
23-11	Isothermal Flow of Superfluid Helium in a 1.1 mm Capillary. J. N. Kidder and W. M. Fairbank	560
23-12	A New Type of Experiment on Turbulence and Critical Flow in	

CONTENTS

	Capillaries in He II. H. C. Kramers, T. M. Wiarda, and A. Broese van Groenou	562
23-13	Transport Properties of Helium II in Narrow Channels. J. B. Burnham, G. J. Pearson, J. Reppy, A. H. Spees and C. A. Reynolds	564
23-14	Eddy Viscosity in Liquid Helium II. S. M. Bhagat and K. Mendelssohn	566
23-15	The Flow of Liquid Helium Through Millipore. H. Seki and C. C. Dickson	569
23-16	Rayleigh Disk Response to Pure Superflow. T. R. Koehler and J. R. Pellam	573
23-17	On Persistent Currents in Superfluid Helium. Philip J. Bendt	576
23-18	Direct Observations on Turbulence in He II. Paul P. Craig	579
23-19	On the Amount of Regularity in the Structure of Liquid He ⁴ . S. Franchetti	579
23-20	Theory of the Free Surface of Rotating Helium II. H. E. Hall	580
24. LIQUID AND SOLID HE ³		
24-1	<i>Liquid and Solid Helium-3</i> . William M. Fairbank	583
24-2	Nuclear Susceptibility of Liquid He ³ . H. A. Schwettman and H. E. Rorschach, Jr.	604
24-3	The Coefficient of Expansion of Liquid He ³ . Eugene C. Kerr and R. Dean Taylor	605
24-4	Aligned Orbital Angular Momentum in the Proposed Low Temperature Phase of Liquid He ³ . P. W. Anderson and P. Morel	608
24-5	The Melting Curve of He ³ . D. O. Edwards, J. L. Baum, D. F. Brewer, J. G. Daunt, and A. S. McWilliams	610
24-6	PVT Anomalies in He ³ near Its Melting Curve. R. L. Mills, S. G. Sydoriak, and E. R. Grilly	613
24-7	Thermal Conductivity of Solid He ³ . E. J. Walker and Henry A. Fairbank	618
24-8	Nuclear Susceptibility of Solid He ³ . Horst Meyer, E. Dwight Adams, and W. M. Fairbank	620
24-9	Self-Diffusion and Relaxation in Solid He ³ . H. A. Reich	623
24-10	Nuclear Spin Relaxation in Solid He ³ . J. M. Goodkind and William M. Fairbank	625
25. THERMODYNAMIC PROPERTIES OF HE ³ -HE ⁴ MIXTURES		
25-1	<i>Thermodynamic Properties of Liquid He³-He⁴ Mixtures</i> . K. W. Taconis	628
25-2	Discrepancies between Various Measurements of Lambda Transition Temperatures of He ³ -He ⁴ Mixtures. Thomas R. Roberts and Stephen G. Sydoriak	633
25-3	A Lattice Model Calculation of Certain Properties of He ³ -He ⁴ Mixtures. Charles E. Hecht, Ryoichi Kikuchi, and Paul R. Stein	637

CONTENTS

26. FURTHER COMMUNICATIONS ON HE³-HE⁴ MIXTURES

- 26-1** Temperature Pulses in Dilute Liquid He³-He⁴ Mixtures near 0° K.
D. J. Sandiford and H. A. Fairbank 641
- 26-2** Propagation and Absorption of Second Sound in Very Dilute He³-
He⁴ Mixtures below 1° K. C. G. Niels-Hakkenberg and H. C.
Kramers 644
- 26-3** The Absorption of Sound in Dilute Solutions of He³ in Liquid He⁴.
G. O. Harding and J. Wilks 647
- 26-4** Viscosity of Liquid He³-He⁴ Mixtures in the Helium II Region
above 1° K. F. A. Staas and K. W. Taconis 650

27. EQUATION OF STATE AND THERMODYNAMIC PROPERTIES

- 27-1** *Thermodynamic and Vibrational Properties of Simple Solids at Low
Temperatures.* T. H. K. Barron 655
- 27-2** Solidified Gases at High Pressure. John W. Stewart 671
- 27-3** The Debye Temperature of β -Tin from Elastic Constant Measure-
ments at 4.2° K. B. S. Chandrasekhar and J. A. Rayne 672
- 27-4** The Electronic Heat Capacity of Potassium, Rubidium, and
Cesium. W. H. Lien and N. E. Phillips 675
- 27-5** The Effect of Free Electrons on Lattice Vibrations. W. C. Overton,
Jr. 677
- 27-6** On the Frequency Spectra of Solids as Calculated from the Experi-
mental Specific Heats. V. Hovi and Y. Pautamo 680
- 27-7** Thermal Expansion of Solids at Low Temperatures. G. K. White 685
- 27-8** Thermal Expansion of Aluminum at Low Temperatures. C. P.
Abbiss, Eva Huzan, and G. O. Jones 688
- 27-9** The Coefficient of Linear Expansion and Grüneisen γ of Cu, Ag,
Au, Fe, Ni, and Al from 4° K to 300° K. D. B. Fraser and A. C.
Hollis Hallett 689
- 27-10** Long-Wave Vibrations of Ionic Lattices. C. H. Perry, P. A.
Mawer, D. H. Martin, and G. O. Jones 692

28. THERMODYNAMIC PROPERTIES OF ARGON

- 28-1** Thermodynamic Properties of Argon. P. Flubacher, A. J. Lead-
better, and J. A. Morrison 695
- 28-2** Lattice Dynamics with Central Forces. G. K. Horton and J. W.
Leech 697

29. FURTHER COMMUNICATIONS ON THERMODYNAMIC PROPERTIES

- 29-1** The Specific Heat of the Exchange System of Some Free Radicals
between 1.6° K and 4.2° K. J. P. Goldsborough, M. Mandel,
and G. E. Pake 702
- 29-2** Specific Heat of Dysprosium Metal. J. G. Dash, R. D. Taylor,
and P. P. Craig 705

CONTENTS

29-3	Thermodynamic Properties of Mixtures at Low Temperatures. J. J. M. Beenakker, H. F. P. Knaap, and C. M. Knobler	707
29-4	Measurement of the Total Cross-section of Solid Neon and Argon with Very Slow Neutrons. Tasso Springer and Werner Wiede- mann	709
29-5	Investigation of the Mechanical Properties of Metals at Tempera- tures below 1° K. N. M. Reinov and A. P. Smirnov	712
29-6	A Quantum Mechanical Law of Corresponding States for van der Waals Solids at 0° K. Newton Bernardes	712
30. PROPOSAL FOR A HE ³ TEMPERATURE SCALE		
30-1	Proposal for a New He ³ Vapour Pressure Scale. S. G. Sydoriak, T. R. Roberts, and R. H. Sherman	717
