

S94. Flux pinning in Nb ₃ Sn by grain boundaries (J.J.Hanak, R.E.Enstrom)	10
S95. The pinning of Abrikosov vortices by extended defects in type II aluminium-silver alloys (J.Blanc, B.B.Goodman, A.Nemoz)	15
S96. Flux pinning in type II superconductors (J.D.Livingston, T.H.Alden)	20
S97. Mechanisms determining critical magnetization current densities in cold worked type II superconductors (W.W.Webb, W.A.Fietz)	21
S98. Flux pinning by precipitates (A.M.Campbell, J.E.Evetts)	26
S99. The flux line driving force in a general non-equilibrium distribution of Abrikosov flux lines (J.E.Evetts, A.M.Campbell)	33
S100. Resistive transition in superconducting vanadium (K.Yasukochi, T.Ogasawara, N.Usui, H.Kobayashi)	38
S101. Stability of flux motion in superconducting cylinders and coils (R.Hancox)	43
S102. Criterion for stability against flux jumping in high-field - high-current - superconductors (F.Lange)	47
S103. Flux-Hole motion and the peak effect in superconductivity (E.Maxwell, B.B.Schwartz, H.Wizgall)	52
S104. Magnetic and caloric effects in superconducting cold-worked niobium (D.de Klerk, S.H.Goedemoed)	58
S105. Superconducting properties of Nb-Zr-Ti ternary alloys (S.Maeda, T.Doi, F.Ishida, U.Kawabe)	63
S106. Аномальное поведение $j_c(H, T)$ термообработанных сплавов Nb - Zr (И.Н.Гончаров, И.С.Хухарева, М.Литомиский, И.Рухичка)	70
S107. Correlation between critical currents and critical magnetic fields in a non-ideal type II superconductor (M.A.R.LeBlanc, D.J.Griffiths)	75
S108. Surface currents and flux gradients in the mixed state of non-ideal type II superconductors (M.A.R.LeBlanc, C.T.M.Chang)	79

S109.	Superconducting properties of deformed metals (D.Dew-Hughes, A.V.Narlikar)	84
S110.	О связи параметров сверхпроводимости сплава цирконий - 4% ниобия с его структурой (С.В.Сударева, Н.Н.Буйнов, В.А.Возилкин, Е.П.Романов, В.Г.Ракин)	87
S111.	Superconducting properties of impure tantalum (C.Sużkowski, J.Mazur)	88
S112.	Влияние примесей углерода, кислорода, азота и водорода на критическую температуру сплавов ниобий-титан (И.А.Баранов, Н.Г.Васильев, В.Р.Карасик, Р.С.Шмулевич)	97
S113.	Изучение влияния холодной пластической деформации на критические параметры сверхпроводников ванадия и ниобия (Н.Н.Сирота, Э.А.Овсейчук, Е.К.Стрибук)	101
S114.	Ultrasonic measurements in single crystal Nb ₃ Sn (K.R.Keller, J.J.Hanak)	106
S115.	О некоторых эффектах, обусловленных диамагнетизмом обмотки сверхпроводящего соленоида (В.В.Андрианов, В.Б.Зенкевич, В.В.Сычев, Ф.Ф.Терновский)	109
S116.	Some properties of superconducting indium in porous glass (J.H.P.Watson)	118
S117.	A synthetic, filamentary "hard" superconductor (E.Adam, O.Smulkowski)	119
S118.	The nature and properties of some superconducting compounds (T.H.Geballe)	124
S120.	Properties of high field superconductors in fields up to 230 kg (E.Saur, H.Wizgall)	128
S121.	Superconductivity of beryllium-rich compounds (E.Bucher, R.Burton, J.Muller, P.Spitzli, G.Zambelli)	134
S122.	Superconductivity and long-range ordering in A15 structures (E.C.van Reuth, R.M.Waterstrat, R.D.Blaugher, R.A.Hein, I.E.Cox)	137
S123.	Transition temperatures and critical fields of Sr Ti O ₃ and mixed titanates (E.Ambler, J.H.Colwell, H.R.R.Frederikse, W.R.Hosler, E.R.Pfeiffer, J.F.Schooley, W.R.Thurber)	143
S125.	Some difficulties in the observation of the Frohlich- Terreaux quasi-superconducting state (J.A.Hulbert)	149

5161

S126. Superconductivity in Ag_2F (K.Andres)	I56
S127. Superconductivity in the lanthanum selenide system (P.E.Seiden, F.Holtzberg)	165
S128. О проявлении особенностей топологии поверхности Ферми в сверхпроводящих свойствах металла (Т.А.Игнатьева, Б.Г.Лазарев, Л.С.Лазарева, В.И.Макаров, Н.С.Терешина)	I70
S129. О влиянии степени искажения кристаллической решетки металла на его сверхпроводимость (Б.Г.Лазарев, Е.Е.Семененко, В.М.Кузьменко)	I73
S132. Глубина проникновения магнитного поля в таллии (В.И.Макаров, Н.С.Терешина)	I77
S133. Damping of oscillations of a type two superconductor in a magnetic field (E.L.Andronikashvili, S.M.Ashimov, D.G.Chigvinadze, J.S.Tsakadze)	180
S134. Сверхпроводимость при высоких давлениях (И.В.Берман, Н.Б.Брандт, Н.И.Гинзбург)	183
S135. The pressure-dependence of the transition temperature of lead up to about 160 kbar (W.Buckel, J.Wittig)	188
S137. A calorimetric investigation of superconductivity in α - uranium (N.E.Phillips, J.C.No, T.F.Smith)	189
S138. Parallel critical fields of tin films compared with the Ginzburg-Landau theory (J.P.Baldwin, G.Robinson, D.R.Tilley)	I94
S140. Critical current density in thin film microstrips (Т.К.Хант)	I98
S141. Кинетика разрушения током сверхпроводимости в пленках олова (А.П.Смирнов, В.Н.Тотубалин, И.С.Паршина, Т.А.Русанова, Н.Ф.Федоров, Б.Н.Формозов)	202
S142. О фазовом переходе в сверхпроводниках малых размеров (В.В.Шмидт)	205
S143. Термодинамические характеристики тонких сверхпроводящих пленок (Д.А.Киржниц, Е.Г.Максимов)	210
S144. Superconducting transition temperature shifts caused by electrostatic charging (R.E.Glover III, W.Ruhl)	214
S145. О возрастании критической температуры в тонких пленках (В.З.Кресин, Б.А.Тавгер)	219

S146.	О свойствах алюминия и свинца, сконденсированного при 2°K , и о влиянии адсорбции газа на критическую температуру Al (Н.В.Заварицкий, А.Р.Ярошенко)	223
S147.	Изотопический эффект на пленках олова (Н.Е.Алексеевский)	229
S148.	The isotope effect in zinc and zirconium (J.R.Dillinger, R.E.Fassnacht, D.M.Jones)	233
S149.	Energy gap studies in superconductors (M.Tinkham)	238
S150.	Dependence on electron free path of the magnetic field induced anisotropy of the superconducting energy gap (W.V.Budzinsky, M.P.Garfunkel)	243
S151.	The surface impedance of superconductors at microwave frequencies (J.Turneure, H.A.Schwetman)	248
S152.	Far-infrared absorption in superconducting lead (S.L.Norman, D.H.Douglas, Jr.)	251
S153.	The superconducting energy gap anisotropy and transition temperature of doped Sn (L.T.Claiborne, N.G.Enispruch)	256
S154.	Longitudinal ultrasonic attenuation in superconducting tin (E.R.Dobbs, G.P.Thomas)	260
S156.	Поглощение ультразвука в сверхпроводящем индии (В.Д.Филь, О.А.Шевченко, П.А.Безуглий)	265
S158.	The energy gap of superconducting lanthanum (A.S.Edelstein, A.M.Toxen)	270
S159.	Theory and calculations for simple superconductors in the intermediate-coupling range (J.C.Swihart)	275
S160.	Anisotropy effects in critical field curves of dilute Sn-In alloys (D.C.Montgomery, D.E.Mapother)	280
S161.	Anisotropy of the energy gap in tin: semi empirical approach (A.J.Bennett)	285
S162.	Magnetic field dependence of the energy gap in tin films by tunneling experiments (T.Shigi, T.Okuda, K.Uchiho, S.Nakaya)	286
S163.	Superconducting tunneling at very low temperatures (G.B.Donaldson)	291
S164.	Tunneling measurements of electron and phonon densities of states in Sn, In and Tl (J.M.Rowell, W.L.McMillan)	296

6161

S165. Microwave phonon assisted tunneling in superconducting tunnel diodes (R.W.Cohen, B.Abeles)	297
S166. Microwave phonon assisted tunneling in superconductors (F.L.Vernon, E.Lax)	302
S167. Phonon effects in superconducting aluminium tunnel junction characteristics (S.Woods, J.S.Rogers)	303
S168. Flux motion in superconducting indium and tin (F.Haenssler, L.Rinderer)	307
S169. Electrical resistance of a type I superconductor in the intermediate state (P.R.Solomon)	312
S170. Magnetic moment due to flux bundle motion in a radio frequency field (D.S.McLachlan)	318
S171. Электродинамика промежуточного состояния (А.Ф.Андреев)	319
S172. Исследование динамического промежуточного состояния с помощью микроконтактов (Ю.В.Шарвин)	323
S173. Quantized flux, zero magnetic field and experiments on time reversal invariance (W.M.Fairbank, W.O.Hamilton)	327
S174. Investigation on the stabilization of superconducting coils (L.Donadieu, J.Maldy)	332
S175. Application of low temperature techniques to a satellite test of general relativity (C.W.F.Everitt, W.M.Fairbank)	337
S176. Superconductivity and particle accelerators (T.I.Smith, H.A.Schwettman, W.M.Fairbank, P.B.Wilson)	343
S177. An automatic superconducting flux pump (E.F.Hammel, H.L.Laquer, K.J.Carroll, W.E.Keller, P.Sikora)	347
S178. Superheating and supercooling in the superconducting transitions of indium and mercury (Y.P.Burger, J.Feder, S.R.Kiser, F.Rothwarf, C.Valette)	352

S179.	Correlation between observed currents and coupling mechanisms in coupled superconductors (G.K.Gaulé, K.Schwidtal, J.T.Breslin, R.L.Ross, J.J.Winter)	357
S180.	Current-carrying states of weakly coupled superconductors (A.M.Goldman, P.J.Kreisman)	362
S181.	Current dependence of the energy gap in a superconductor: a direct measurement (C.D.Mitescu) . . .	366
