

CONTENTS

Quantum Liquids

1. Some Experiments with Liquid Helium
D.F. Brewer 1
2. Diatomic Molecules and Cooper Pairs
A.J. Leggett 13
3. Current Density in the BCS Ground State for a Spatially Non-Uniform
Anisotropic Superfluid
N.D. Mermin 28
4. Hamiltonian Equations of Hydrodynamics of Quantum Liquid in the Presence
of Solitons
I.M. Khalatnikov and V.V. Lebedev 36
5. Theory of Ion Mobility in Liquid ^3He
P. Wölfle 47
6. The Excitation Spectra of Liquid ^4He at Zero Temperature and of a ^3He
Atom Moving in it
M. Lücke 74
7. Autocorrelation Functions of Density and Transversal Current for ^3He (B)
in the Collisionless Regime
J. Czerwonko 114
8. Microscopic Derivation of Orbital Hydrodynamic Equations in Superfluid
 $^3\text{He-A}$
K. Nagai 135

Classical Liquids

9. Classical Charged Fluids at High Density
M.P. Tosi 150
10. Locally Nonuniform Fluids
A. Fuliński 163

Random Systems

11. Random Walks on Random Lattices
P.N. Butcher 174
12. A Lecture on the Topological Theory of Defects in Ordered Media:
How the Old Theory was Leading to Paradoxes, and how Their Resolution
Comes Within the Larger Frameworks of Homotopy Theory
G. Toulouse 188

13. The Frustration Model	
<u>G. Toulouse</u>	195
14. Macroscopic Description of Spin Glasses	
<u>I.E. Dzyaloshinskii</u>	204
15. Spin Glasses for the Long Ranged and Short Ranged Bond Ising Models Without Using the Replica Method	
<u>Sh. Katsura</u>	225
16. Spin Glass with Nonmagnetic Impurities	
<u>A.A. Abrikosov</u>	251
17. Magnetic Excitations in Ferromagnets and Structural Disorder	
<u>J. Morkowski</u>	272
18. May Disorder Create Frequency Gaps in Phonon Spectra?	
<u>A. Czachor</u>	297
19. Mott Versus Anderson Localization in $1T\text{-TaS}_2$	
<u>P. Fazekas</u>	328
20. Theory of Impurity States in Heavily Doped Semiconductors	
<u>K.A. Chao</u>	339
21. On the Fermi Surfaces of Random Substitutional Alloys	
B. Gordon, <u>B.L. Gyorffy</u> , W.M. Temmerman, A.J. Pindor	366

Phase Transitions

22. Theory of Superconducting Transition Temperature, Pair Susceptibility, and Coherence Length	
<u>P.B. Allen</u>	388
23. Phase Transitions and Symmetry	
<u>P. Bak</u>	414
24. Theory of Elastic Phase Transitions and Soft Acoustic Modes	
<u>F. Schwabl</u>	432
25. Structural Phase Transitions into Incommensurate Phases	
<u>V. Dvorak</u>	447
26. On the Theory of Structural Phase Transitions in Magnetic Crystals	
H. Konwent and <u>N.M. Plakida</u>	478
27. Displacive Reconstruction Phase Transitions of Clean Transition Metal and Semiconductor Surfaces	
<u>E. Tosatti</u>	501

Other Topics

28. Dense Phases of Hydrogen	
<u>N.W. Ashcroft</u>	531

29. Properties of Metals and the Local Geometry of the Fermi Surfaces
M.I. Kaganov and T. Ju. Lisovskaya 537
30. A New Method of Obtaining Information about Phonon Density of States
and Electron-Phonon Interaction in Metals
A.J. Pindor 563
31. Interaction Between Strong Radiation Fields and Two-Level Atoms:
A Canonical Transformation Approach
F. Persico 571
