

CONTENTS

Preface, F. Abelès	v	
Section I: Simple metals (Chairmen: J. Friedel and H. Brooks)		
I.1	Electronic states in metals, W. Kohn	1
I.2	Results with the model potential in metals, V. Heine	16
I.3	The fundamental optical spectra of solids, J. C. Phillips	22
I.4	High-frequency wave-vector dependent conductivity of a degenerate electron gas, M. Suffczynski	35
I.5	Optical properties of anisotropic metals, A. P. Lenham, D. M. Treherne, A. J. Woodall	40
I.6	Experimental results on the optical properties of the alkali metals, H. Mayer, B. Hietel	47
I.7	The optical properties and electronic band structure of lithium, J. N. Hodgson	60
I.8	Interpretation of the optical properties of the alkali metals, M. H. Cohen	66
I.9	Optical properties of the alkali metals, R. A. Ferrell	78
I.10	Etude des bandes d'énergie de quelques métaux par spectroscopie X, Y. Cauchois, C. Bonnelle	83
I.11	X-ray scattering from an electron gas, P. M. Platzman, N. Tzoar	94
Section II: Simple, d-band and transition metals (Chairmen: L. Néel and N. F. Mott)		
II.1	Band structure and optical properties of some noble and transition metals, H. Ehrenreich	109
II.2	Observation of absorption edges in the extreme ultraviolet by transmittance measurements through thin unbacked metal films, W. R. Hunter	136
II.3	Optical properties and Fermi surface of zinc, A. H. Lettington	147
II.4	The ultraviolet absorption of the noble metals, D. Beaglehole	154
II.5	The effect of pressure on optical properties of the noble metals, R. Zallen	164
II.6	Validity of the Drude theory for silver, gold and aluminum in the infrared, H. E. Bennett, J. M. Bennett	175
II.7	High sensitivity piezo-reflectivity measurements using a stress-modulation technique, W. E. Engeler, M. Garfinkel, J. J. Tiemann, H. Fritzsche	189
II.8	The optical properties of the transition metals, A. P. Lenham, D. M. Treherne	196

II.9	Propriétés optiques de l'argent et du palladium dans l'ultra-violet lointain, Mme S. Robin	202
II.10	Two photon decay of positrons in transition metals, S. Berko, J. H. Terrell	210
Section III: <i>Rare-earth metals</i> (Chairman: N. F. Mott)		
III.1	Recent studies on the optical properties of rare-earth metals, C. Chr. Schüler	221
III.2	Electronic band structure and optical properties of rare-earth metals, J. O. Dimmock, A. J. Freeman, R. E. Watson	237
III.3	The band structure of gadolinium; photoemission and optical studies, A. J. Blodgett Jr., W. E. Spicer and A. Y-C. Yu	246
Section IV: <i>Liquid metals</i> (Chairman: N. F. Mott)		
IV.1	Optical properties of liquid metals, T. E. Faber	259
IV.2	The reflection spectrum of liquid Hg from 2-20 eV, E. G. Wilson, S. A. Rice	271
Section V: <i>Photoemission</i> (Chairman: J. J. Hopfield)		
V.1	Direct and nondirect optical transitions in copper, C. N. Berglund	285
V.2	The band structure of noble and transition metals; photo-emission studies, W. E. Spicer	296
V.3	Results on electron emission of alkali metals, F. J. Piepenbring	316
V.4	L'effet photoélectrique vectoriel dans les couches minces d'or, P. Vernier, M. Pauly, J. F. Berthelemy	323
V.5	Studies of band structure and electron scattering in aluminum by photoemission, F. Wooten, T. Huen, R. N. Stuart	332
V.6	Low temperature photoelectric effect in metals, F. D. Bedard, W. E. Harte	341
V.7	Direct transitions and excited electron energy losses in photoelectric emission from silicon, G. W. Gobeli, E. O. Kane, F. G. Allen	347
Section VI: <i>Optical plasma effects</i> (Chairman: S. Sugano)		
VI.1	Influence des interactions électroniques sur les propriétés optiques des métaux, P. Nozières	363
VI.2	Studies of collective electron oscillations in metals by optical methods, E. T. Arakawa, R. N. Hamm, W. F. Hanson, T. M. Jelinek	374
VI.3	Transition radiation, bremsstrahlung and plasma radiation, H. Boersch, G. Sauerbrey	386
VI.4	Calculation of transition radiation for various types of metals, W. Steinmann	399

VI.5	Collective excitations in graphite, H. R. Philipp	408
VI.6	Absorption of polarized light in thin metal foils around the region of plasma oscillation, T. Sasaki, A. Ejiri	417
Section VII: Superconductors (Chairman: S. Sugano)		
VII.1	Optical properties of superconductors, M. Tinkham	431
VII.2	Plasma phonon and polaron modes in semiconducting SrTiO ₃ , A. S. Barker Jr.	452
Section VIII: Magneto-optical effects (Chairmen: J. Tauc and G. W. Rathenau)		
VIII.1	Intraband contributions to the magneto-optic constants of Fe and Ni, S. Doniach	471
VIII.2	Ferromagnetic Kerr effect in d-metals and alloys, G. S. Krinchik	484
VIII.3	Ultra-high magnetic fields and the optical properties of metals, B. Lax	496
VIII.4	Magnetoreflection studies in the band structure of antimony, M. S. Dresselhaus, J. G. Mavroides	508
VIII.5	Alfvén wave propagation in semimetals, G. A. Williams	526
VIII.6	Magneto-optical absorption due to surface scattering of electrons, M. C. Jones, E. H. Sondheimer	535
VIII.7	The role of surface scattering of electrons in magneto-absorptivity, J. P. D'Haenens, D. L. Carter	545
Section IX: Non-periodic systems (Chairman: G. W. Rathenau)		
IX.1	Propriétés optiques des alliages métalliques, F. Abelès	553
IX.2	Optical properties of Ag-Au alloys, H. Fukutani, O. Sueoka	565
IX.3	Optical constants of beta-brass alloys, L. Muldawer, H. J. Goldman	574
IX.4	Electronic structure of IB-IIB alloys, H. Amar, K. Johnson	586
IX.5	The Faraday effect and the Fermi surface of disordered structures, E. A. Stern	599
IX.6	Impurities resistivity at high frequency, A. Lonke, A. Ron	613
Summary, A. B. Pippard		622
List of participants		632
Author index		636
Subject index		638
