

## Contents

<b>Preface</b>	v
<b>List of participants</b>	vii
<b>Foreword: What Do We Not Yet Understand About Liquid Metals?</b> By J. M. ZIMAN	xiii
 <b>1. Structure of Liquid Metals and Alloys</b>	
The Structure of Liquid Metals and Alloys. (Review paper.) By J. E. ENDERBY	3
Liquid Metals: Their Structure and Dynamics. (Review paper.) By P. A. EGELSTAFF	13
Effect of Pressure on the Structure Factor of Liquid Alkali Metals. By K. TSUJI, H. ENDO, S. MINOMURA and K. ASAUMI	31
Structure and Pair-potential of Liquid Metals by X-ray and Neutron Diffraction. By Y. WASEDA and K. SUZUKI	37
Effective Pair-potentials for the Liquid Alkali Metals. By W. S. HOWELLS	43
Pair-potentials from Structure Data. By L. E. BALLENTINE and J. C. JONES	51
Hard Cores, Soft Cores: Rare Gases, Liquid Metals. By D. SCHIFF	57
Structure of Liquid Li-B Alloys (B=Ag, Sn, Pb). By K. GOEBBELS and H. RUPPERSBERG	63
On the Anomalous Properties of Liquid Copper Alloys. By S. TAKEUCHI, K. SUZUKI, F. ITOH, K. KAI, M. MISAWA and K. MURAKAMI	69
Examples of Two Structures in Metal Melts. By H. RICHTER	77
Evidence of Clusters in Molten Binary Alloys by means of X-ray Small-angle Scattering. By J. HOEHLER and S. STEEB	85
The Cause of Paracrystalline Distortions in Molten Metals. By R. HOSEMANN and G. WILLMANN	91
Structure of Liquid Al-Si-Mg Alloys. By R. KUMAR, C. S. SIVARAMAKRISHNAN and R. K. MAHANTY	93
Relation between Incoherent and Coherent Neutron Scattering from Liquid Metals, with Particular Reference to Measurements on Rb and Ga. By M. I. BARKER, M. W. JOHNSON, N. H. MARCH and D. I. PAGE	99

Investigations of Collective Excitations in Liquid Metals by Inelastic Neutron Scattering. By W. GLÄSER, S. HAGEN, U. LÖFFLER, J.-B. SUCK and W. SCHOMMERS	111
Dynamics of Liquid Gallium in the Supercooled State. By S. H. CHEN, Y. LEFEVRE and S. YIP	119
Dynamic Structure Factor Calculations and Neutron Inelastic Scattering. By C. H. CHUNG, S. YIP and P. A. EGELSTAFF	125
Theory of Density Fluctuations in Liquid Metals. By M. WATABE and M. HASEGAWA	133
Static and Dynamic Structure Factors of Liquid Metals. By J. CHIHARA	137
Characteristics of Collective Motions in a Liquid Metal: Simulation of Molecular Dynamics of Na. By S. TAKEUCHI, M. TANAKA, Y. FUKUI, M. WATABE and M. HASEGAWA	143
Pair Potentials in Liquid Metals and Liquid Semi-metals. By K. FUKUDA	151
Stochastic Geometry and Description of Liquids. By T. OGAWA and M. TANEMURA	153
<b>2. Electronic States and Electronic Transport Properties</b>	
Experimental Clues to the Electronic Structure of Liquid Metals. (Review paper.) By N. E. CUSACK	157
Electronic States in Alloys (Review paper.) By H. EHRENREICH	173
Photo-emission Measurements of Liquid In and Sn. By C. NORRIS, D. C. RODWAY and G. P. WILLIAMS	181
Knight Shifts in Metals and Alloys. By C. J. FORD and G. A. STYLES	189
The Density of States in Liquid Metals. By L. E. BALLENTINE and T. CHAN	197
The Electronic Structure of Liquid Metals in Tight-binding Approximation. By F. YONEZAWA, M. NAKAMURA and Y. ISHIDA	203
Theory of Positron Annihilation in Liquid Metals. By H. NAKAI, M. HASEGAWA and M. WATABE	209
Effect of Pressure on the Electronic Properties of Liquid Mercury and Its Alloys. By R. OSHIMA, Y. KATO, Y. ONODA, H. ENDO and S. MINOMURA	213
Pressure Dependence of Thermoelectric Power and Electrical Resistivity of Liquid Mercury Alloys. By T. TAKEUCHI and S. NOGUCHI	219
Pseudo-potential of Mercury and Anomalous Behaviour of the Thermoelectric Power of Liquid Mercury Alloys. By S. NOGUCHI and T. TAKEUCHI	225
Electronic Transport Properties of Liquid Mercury Alloys. By H. A. DAVIES and J. S. L. LEACH	229

The Non-linear Optical Properties of Mercury. By E. D. CROZIER, R. M. NINNIS and K. E. RIECKHOFF	239
New Method for Measuring the Thermal Conductivity of Liquid Metals. By A. J. GREENFIELD, E. GOLDRATT and N. WISER	245
Electron States and Electrical Resistivity in Liquid Metals. (Review paper.) By J. S. ROUSSEAU, J. C. STODDART and N. H. MARCH	249
Electronic Structure of Liquid Transition and Rare-earth Metals and their Alloys. (Review paper.) By G. BUSCH, H.-J. GÜNTHERODT, H. U. KÜNZI and H. A. MEIER	263
Electronic and Magnetic Properties of Liquid Fe-Ge Alloys. By G. BUSCH, H.-J. GÜNTHERODT, H. U. KÜNZI, H. A. MEIER, A. TEN BOSCH, A. ZIMMERMANN and J. KELLER	277
The Thermoelectric Power of Liquid Metals and Alloys. By J. E. ENDERBY and R. A. HOWE	283
The Electron Transport Properties of Liquid Cs-Na Alloys under Pressure. By S. TAMAKI, R. G. ROSS, N. E. CUSACK and H. ENDO	289
Pressure-induced Phase Transition in Amorphous Germanium. By K. TAMURA, S. MINOMURA, J. FUKUSHIMA, H. ENDO, O. SHIMOMURA and K. ASSAUMI	295
Effects of Pressure on the Electronic Properties of Amorphous Ge and its Alloys. By K. TAMURA, S. MINOMURA, J. FUKUSHIMA, H. ENDO, O. SHIMOMURA and K. ASAUMI	301
Magnetic Properties of Liquid Cobalt Alloys. By Y. NAKAGAWA, K. YAMAUCHI and T. MIZOGUCHI	307
Magnetic Susceptibility of Liquid Transition Metals. By K. ADACHI and T. AISAKA	313
On the Resistivity of Liquid Transition Metals. By R. EVANS, B. L. GYORFFY, N. SZABO and J. M. ZIMAN	319
The Resistivity of Liquid Zn: Role of d-States. By V. BORTOLANI and G. GIUNCHI	333
Electronic Structure and Properties in Liquid Metals. By N. C. HALDER	337
Experimental and Theoretical Study of Electrical Resistivity of Alkali Alloys. By W. VAN DER LUGT, J. F. DEVLIN, J. HENNEPHOF and M. R. LEENSTRA	345
Percolation Aspects of Metal-Insulator Transitions in Inhomogeneous Materials. By S. KIRKPATRICK	351
The Effect of Volume Expansion on the Electronic Transport Properties of Fluid Metals. By F. HENSEL	357
Electron Transport Properties of Supercritical Fluid Mercury. By L. J. DUCKERS and R. G. ROSS	365
The Electronic Structure and Metal-Insulator Transition of Alkali Metals in the Supercritical Region. By F. YONEZAWA, M. WATABE, M. NAKAMURA, Y. ISHIDA and T. OGAWA	373

Concentrated M-NH <sub>3</sub> Solutions. By J. C. THOMPSON	379
Electrical Properties of Lithium-Methylamine Solutions. By Y. NAKAMURA, M. YAMAMOTO and M. SHIMOJI	385
Liquid Alloy System Li-Bi. By P. IOANNIDES, V. T. NGUYEN and J. E. ENDERBY	391
N.M.R. Studies of Compound Formation in Te- and Se-Based Liquid Alloys. By W. W. WARREN, Jr.	395
Nuclear Magnetic Resonance in the Liquid Selenium-Tellurium System. By E. F. W. SEYMOUR and D. BROWN	399
Volume Dependence of Positron Annihilation in Liquid Alkali Metals. By K. TSUJI, H. ENDO and K. ITO	405
The Degree of Localization for Eigenstates in One-Dimensional Random System. By T. HIROTA	407
Lorenz Number and Thermal Conductivity of Liquid Ga, Hg and Hg-In. By G. BUSCH, H.-J. GÜNTHERODT, W. HALLER and P. WYSSMANN	409
The Absolute Thermoelectric Powers of Liquid Alloys in Six Ternary Systems. By R. TOUGAS	411
Spin-Wave Theory of Amorphous Ferromagnets. By T. KANEYOSHI	413
Theory of the Spin Relaxation of Conduction Electrons in Liquid Metals and their Alloys. By J. S. HELMAN and R. A. B. DEVINE	415
The Electronic Structure and Metal-Insulator Transition of Mercury in the Supercritical Region. By Y. ISHIDA, M. NAKAMURA, M. WATABE and F. YONEZAWA	417

### 3. Thermodynamic Properties of Liquid Metals and Alloys

Interpretation of the Thermodynamic Properties of Liquid Metals and Alloys. (Review paper.) By M. SHIMOJI	421
The Compressibility of Liquid Alloys. By T. E. FABER	433
Electron Theory of Thermodynamic Properties of Liquid Metals. By M. HASEGAWA and M. WATABE	439
The Velocity of Sound in Liquid Magnesium-Bismuth Alloys. By S. P. MCALISTER, E. D. CROZIER and J. F. COCHRAN	445
The Liquid-Vapour Density Transition for Simple Liquids. By C. A. CROXTON	451
Immiscibility of Liquid Li-Na Alloys. By S. TAMAKI	455
Study of Physicochemical Properties in Alloys Applying Metallic-Bond Electronegativity. By K. FURUKAWA	461
Immiscibility in Binary Alloys of Group II Metals: A Semi-empirical Approach. By R. KUMAR	467

Chemical Potentials and Critical Exponents of Metal-Ammonia Solutions. By K. ICHIKAWA and J. C. THOMPSON	477
Heats of Mixing in Liquid Copper, Silver and Gold Alloys. By K. ITAGAKI and A. YAZAWA	483
On the Heat of Mixing of Liquid Copper Alloys. By S. TAKEUCHI, O. UEMURA and S. IKEDA	489
Thermodynamic Investigation of Liquid Germanium Alloys. By B. PREDEL and D. W. STEIN	495
Enthalpies of Mixing of Binary Chalcogen B-metal Melts. By T. MAEKAWA, T. YOKOKAWA and K. NIWA	501
Short-range Ordering in Liquid Iron-Phosphorus Alloys. By I. DRAGOMIR	507
Velocities of Sound of Liquid Indium-Mercury Alloys. By T. YOSHIOKA and H. SUZUKI	513
A Theory of Sound Waves in Liquid Metals. By M. TOKITA, I. YOKOTA and S. KATAYAMA	515
Interaction of Non-metallic Impurities of Low Concentration in Liquid Sodium. By H. KATSUTA and K. FURUKAWA	517
 <b>4. Atomic Transport Properties in Liquid Metals and Alloys</b>	
Atomic Transport Properties in Liquid Metals. (Review paper.) By N. H. NACHTRIEB	521
Impurity Diffusion in Liquid Copper and Silver. By T. EJIMA and T. YAMAMURA	537
Diffusion of Various Elements in Molten Carbon-Saturated Iron. By Y. ONO	543
Mutual Diffusion in Indium-Lead Liquid Alloys. By J. F. RIALLAND and J. ROBERT	549
Viscosity of Liquid Rare-earth and Actinide Metals. By L. J. WITTENBERG and R. DEWITT	555
The Viscosity of Molten Fe-Ni Alloys. By A. ADACHI, Z. MORITA, Y. OGINO and M. UEDA	561
Densities and Viscosities of Molten Thallium-Tellurium Alloys. By Y. NAKAMURA and M. SHIMOJI	567
Molecular Dynamical Studies on Soft Core Model. By Y. HIWATARI, H. MATSUDA, T. OGAWA, A. UEDA and N. OGITA	571
Thermodynamic Model of Liquid Metals. By H. RUPPERSBERG and P. HICTER	577
The Diffusion of Oxygen in Liquid and Solid Silver. By T. TOKUDA and H. HARADA	583
The Viscosity of Liquid Pb-Sn Alloys. By A. ADACHI, Z. MORITA, Y. OGINO, Y. KITA and M. SHIRAISHI	585

## 5. Melting Phenomena of Metals

Theories of Melting in Simple Metals. (Review paper.) By N. W. ASHCROFT	589
'Ideal Three-phase Model' and the Melting of Molecular Crystals and Metals. By Y. HIWATARI and H. MATSUDA	601
The Change of Volume on Melting. By T. E. FABER	607
Melting Curve Maxima and Solid-Solid Transitions at High Pressures. By Y. KURAMOTO and H. FURUKAWA	609
Melting of Metals at High Pressures: Existence of a Maximum in Melting Curves. By T. YOSHIDA and S. KAMAKURA	615
Effect of Pressure on the Thermoelectric Power of Caesium. By R. OSHIMA, O. SHIMOMURA, S. MINOMURA and H. ENDO	623
The Relation between the Formation Energy of a Vacancy in Concentrated Random Alloys and the Heat of Fusion. By M. DOYAMA and J. S. KOEHLER	629
A Modification of the Percus-Yevick Equation to Incorporate the Solid-Fluid Phase Transition. By C. A. CROXTON	635
Theory of Melting. By T. OGAWA, H. OGURA and M. TANEMURA	637

Index of Authors	639
