

## CONTENTS

Preface .....	v
Welcoming address and introductory remarks, <i>J. Mandel</i> .....	vii
List of invited lectures .....	ix
List of contributions .....	xi
SESSION 1. Chairman: E. Kröner	
Aspects macroscopiques de la rupture ductile, <i>R. Labbens</i> .....	3
Mechanics and mechanisms of intergranular cavitation in creeping alloys, <i>A. S. Argon, I.-W. Chen and C. W. Lau</i> .....	23
Constitutive equation for plastic behavior of materials: origins of ductility, <i>J. H. Gittus</i> .....	51
Discussion on Session 1, <i>B. A. Bilby</i> .....	75
SESSION 2. Chairman: J. de Fouquet	
Crack separation energy rates for inclined cracks in an elastic-plastic material, <i>A. P. Kfouri and K. J. Miller</i> .....	83
Fatigue crack growth theory for ductile material, <i>J. Weertman</i> .....	111
Problems in environmentally-affected creep crack growth, <i>F. A. McClintock and J. L. Bassani</i> .....	123
Discussion on Session 2, <i>T. Mura</i> .....	147
SESSION 3. Chairman: D. McLean	
On certain macroscopic and microscopic aspects of plastic flow of ductile materials, <i>S. Nemat-Nasser, M. M. Mehrabadi and T. Iwakuma</i> .....	157

Creep cavitation of grain interfaces, <i>J. R. Rice</i> . . . . .	173
Experimental and numerical study of the different stages in ductile rupture: application to crack initiation and stable crack growth, <i>F. M. Beremin</i> . . . . .	185
Discussion on Session 3, <i>J. W. Hutchinson</i> . . . . .	207
Reply by F. M. Beremin . . . . .	209

#### SESSION 4. Chairman: Y. Yamada

The plastic work spent in ductile fracture, <i>H. P. Stüwe</i> . . . . .	213
Stability of tearing fracture in structural steels, <i>F. M. Burdekin</i> . . . . .	223
Discussion on Session 4, <i>R. Roche</i> . . . . .	243

#### SESSION 5. Chairman: R. Noel

A quantitative description of fracture toughness under plane stress conditions by the <i>R</i> -curve method, <i>B. Marandet and G. Sanz</i> . . . . .	249
Microlocalizations, <i>J. Christoffersen</i> . . . . .	275
On constitutive relations in thermoplasticity, <i>Th. Lehmann</i> . . . . .	289
Discussion on Session 5, <i>B. Storåkers</i> . . . . .	307
Reply by Th. Lehmann . . . . .	311

#### SESSION 6. Chairman: P. Germain

A thermodynamic description of the running crack problem, <i>Q. S. Nguyen</i> . . . . .	315
Finite deformation constitutive relations including ductile fracture damage, <i>G. Rousselier</i> . . . . .	331
Discussion on Session 6, <i>H. D. Bui</i> . . . . .	357

#### SESSION 7. Chairman: A. Sawczuk

Constitutive equations and global criteria for ductile fracture, <i>T. Yokobori, A. T. Yokobori, Jr., H. Sakata and I. Maekawa</i> . . . . .	365
---	-----

Limitation to ductility set by inclusion-induced disturbance of yielding, <i>A. Dragon</i> . . . . .	387
Ductility caused by progressive formation of shear cracks, <i>H. Lippmann</i> . . . . .	389
Discussion on Session 7, <i>Z. Mróz</i> . . . . .	405
Reply by T. Yokobori . . . . .	411
Reply by H. Lippmann . . . . .	413
SESSION 8. Chairman: D. Radenkovic	
Elastic-plastic fields in steady crack growth, <i>Y. C. Gao and K. C. Hwang</i> . . . . .	417
List of participants . . . . .	435
