Preface	v	
Chapter 1	INTRODUCTION	1
1.1	Ion implantation	1
1.2	The advantages of ion implantation	3
1.3	Conclusion	5
Chapter 2	ION RANGES IN SOLIDS	7
2.1	Processes of energy loss	7
2.2	Classical collisions	8
2.3	Interatomic forces	11
2.4	Scattering during collisions	15
2.5	Electronic energy loss	21
2.6	Charge exchange losses	24
2.7	Ion ranges in amorphous solids	25
2.8	Ion ranges in compounds	31
2.9	Concentration profiles	31
2.10	Implantation masks	34
2.11	Experimental measurement of ion ranges	35
2.12	Recent measurements of ion ranges	39
2.13	Energy deposition and defect formation	39
2.14	Conclusion	43
Chapter 3	ION CHANNELLING	45
3.1	Introduction	45
3.2	Simple channelling theory	49
3.3	Motion in a channel	54
3.4	The comparison of theory and experiment	58
3.5	Ion ranges in channels	62
3.6	Channelling yields	63
Chapter 4	RADIATION DAMAGE	65
4.1	Introduction	65
4.2	Vacancies and interstitials	66
4.3	Displacement energies	74
4.4	Alternative processes in defect production and separation	75
4.5	Defect concentrations	77
4.6	Extended defects	78
4.7	Fission fragments and fission tracks	79
4.8	Dislocations	79
4.9	Bubbles and voids	84
4.10	Summary	86

<i>Chapter 5</i>	DIFFUSION AND THERMAL ANNEALING	88
5.1	Diffusion and annealing	88
5.2	Backscattering measurements of diffusion	90
5.3	Diffusion in thin films	93
5.4	Stress assisted diffusion	95
5.5	The stoichiometry of thin films	96
5.6	Glancing incidence Rutherford backscattering	98
5.7	Interstitial diffusion	105
5.8	Ion implantation gettering of damage	106
5.9	The diffusion of helium in copper	107
<i>Chapter 6</i>	SPUTTERING	111
6.1	Introduction	111
6.2	Sputtering theory	112
6.3	The Thompson model of sputtering	115
6.4	The Sigmund model of sputtering	117
6.5	The angular dependence of the sputtering yield	126
6.6	The velocity spectrum of ejected atoms	126
6.7	Surface topography	128
6.8	A comparison of sputtering and chemical dissolution	132
6.9	Secondary processes in surface topography	136
6.10	Sputtering of crystalline solids	142
6.11	Transmission sputtering	143
6.12	Sputter deposition	143
6.13	Conclusion	145
<i>Chapter 7</i>	ION BEAM EQUIPMENT	148
7.1	Ion accelerators	148
7.2	Ion sources	149
7.3	Radiofrequency ion sources	151
7.4	The duoplasmatron or Von Ardenne source	153
7.5	Surface ionisation sources	157
7.6	Scandinavian sources	160
7.7	Harwell ion source	161
7.8	Multiply charged ion sources	164
7.9	Other ion sources	165
7.10	Beam handling	166
7.11	The sector magnet mass analyser	167
7.12	The velocity filter	170
7.13	Beam scanning	171
7.14	Target manipulation	173
7.15	Beam transport	175
7.16	The measurement of dose	176
<i>Chapter 8</i>	ANALYSIS TECHNIQUES WITH ION BEAMS	181
8.1	Introduction	181
8.2	Rutherford backscattering	181
8.3	Channelling	198
8.4	Resonant elastic scattering	207
8.5	Nuclear reaction analysis	210

CONTENTS

ix

8.6	Ion induced X-rays	218
8.7	Analysis by electron irradiation and sputtering	225
8.8	Conclusions	240
<i>Chapter 9</i>	THE APPLICATIONS OF SPUTTERING	247
9.1	Introduction	247
9.2	Machining and figuring	248
9.3	Polishing and the reduction of strain and scatter	249
9.4	Sample preparation for electron microscopy and surface analysis	251
9.5	The tuning of quartz crystal resonators	252
9.6	Piezoelectric transducers	253
9.7	High definition etch patterns	253
9.8	Surface acoustic waves	256
9.9	Sputtering used in integrated optics	256
9.10	Biological applications	258
9.11	Sputter deposition	258
9.12	Conclusion	259
<i>Chapter 10</i>	APPLICATIONS OF ION IMPLANTATION AND ION BEAM ANALYSIS	262
10.1	Introduction	262
10.2	Semiconductors	262
10.3	Phosphors	263
10.4	Chemical effects	266
10.5	Electrochemistry	267
10.6	Corrosion and oxidation studies	269
10.7	Location of passivating implants	271
10.8	Potentiostatic measurements	272
10.9	Implantation of impurities for lattice site studies	275
10.10	Depth profile of fluoride in tooth enamel	278
10.11	Analysis of varnish layers of violins	279
10.12	Integrated optics	280
10.13	Friction and wear	287
10.14	Superconductivity	292
10.15	Ion implantation and magnetic bubbles	294
10.16	Simulation studies of damage in reactor materials	296
<i>Appendix I</i>	RANGE - ENERGY DATA	304
<i>Appendix II</i>	TABLE OF Z, A AND NATURAL ABUNDANCE OF THE ISOTOPES	317
<i>Appendix III</i>	ELECTRONICS FOR SURFACE ANALYSIS	326
Index		329
