

## CONTENTS

PREFACE	i
LIST OF SYMBOLS	iii
INTRODUCTION	vii
<b>PART I. FUNDAMENTALS OF THE THERMO-MAGNETIC EFFECTS</b>	
Ch. 1. Definitions of the thermomagnetic effects	3
Ch. 2. Short review of the literature on the thermomagnetic effects	6
<b>PART II. THEORY OF THE THERMOMAGNETIC EFFECTS</b>	
Ch. 3. Preliminary remarks	15
Ch. 4. The transport equation	30
Ch. 5. The relaxation time	45
Ch. 6. Isothermal effects (impurity conduction)	76
Ch. 7. Isothermal effects (mixed conduction)	90
Ch. 8. Isothermal effects (effect of diffusion)	95
Ch. 9. Nernst-Ettingshausen effect in a semiconductor with an impurity band	102
Ch. 10. Adiabatic effects	108
Ch. 11. Thermomagnetic effects in the case of an anisotropic quadratic dispersion law	118
Ch. 12. Qualitative analysis of the thermomagnetic effects	124
Ch. 13. Phonon drag	130
Isotropic quadratic dispersion law	130
Anisotropic quadratic dispersion law	154
Ch. 14. Degeneracy of the electron gas	165

## CONTENTS

### PART III. REVIEW OF EXPERIMENTAL RESULTS

Ch. 15.	Measurement techniques	179
Ch. 16.	Elemental semiconductors	187
	Tellurium	188
	Germanium	195
Ch. 17.	Compounds of $A^{III}B^V$ type	228
	Indium antimonide	228
	Indium and gallium arsenides	247
Ch. 18.	Compounds of $A^{II}B^{VI}$ type	248
	Mercury selenide	248
	Mercury telluride	265
Ch. 19.	Compounds of $A^{IV}B^{VI}$ type	275
	PbS group	275
Ch. 20.	Compounds of $A^{V}B^{VI}$ type	285
	Bismuth selenide	285
Ch. 21.	Compounds of $A^{I}B^{VI}$ type	292
	Silver telluride	292
Ch. 22.	Metal oxides	299
	Cuprous oxide	299
	Cadmium oxide	302
	Zinc oxide	305
