

CONTENTS

List of Contributors	vii
Preface	ix
1. MOLECULAR BEAMS FROM NOZZLE SOURCES	1
James B. Anderson	
List of Symbols	3
I. Introduction	5
II. Historical Summary	6
III. General Principles of Operation	15
IV. The Continuum Free Jet	19
V. Transition Flow in Free Jets	26
VI. Internal Relaxation Processes in Free Jets	37
VII. Free Jets of Gas Mixtures	41
VIII. Interaction of Jets with Background Gases	47
IX. Skimmer Interference	51
X. The Free Jet as a Beam Source	56
References	62
Figures	67
2. CLUSTER BEAMS FROM NOZZLE SOURCES	93
Otto F. Hagen	
List of Symbols	94
I. Introduction	96
II. Cluster Beam System-General	99

III. Condensation and Cluster Formation in Nozzle Flows	106
IV. Performance of Cluster Beam Sources	128
V. Cluster Size Measurement	140
VI. Experiments with Cluster Beams	153
VII. Concluding Remarks	158
Notes	160
References	161
Figures	167
 3. LOW-DENSITY HYPERSONIC WIND TUNNELS	 183
J. Leith Potter	
List of Symbols	184
I. Introduction	187
II. Simulation Requirements	197
III. Design Considerations	221
IV. Effects of Flow Nonuniformity	249
V. Flow Calibration Measurements	256
VI. Concluding Remarks	276
Notes	279
References	279
Figures	291
 4. DIAGNOSTIC TECHNIQUES IN HIGH TEMPERATURE GASDYNAMICS	 313
R. I. Soloukhin	
List of Symbols	314
I. Introduction	315
II. Gasdynamics of Molecular and Chemical Relaxation Zones behind a Shock Wave	316
III. High Speed Photography and Instrumentation	319
IV. Density Measurements	323
V. Gas Temperature Measurements	343
VI. Electrical Conductivity Measurements in Shock Waves	349

CONTENTS

v

VII. Pressure Measurements	351
VIII. Complex Shock Tube Experiments and Illustrations	353
IX. Concluding Remarks	363
Notes	363
References	367
Figures	377
 Author Index	 407
Subject Index	417
