

Contents

Preface	vii
1. What is Solid State Chemistry?	1
2. Preparative Methods.....	4
3. Characterization of Inorganic Solids: Applications of Physical Techniques	47
4. Thermal Analysis.....	102
5. X-Ray Diffraction	115
6. Point Groups, Space Groups and Crystal Structure.....	187
7. Descriptive Crystal Chemistry.....	212
8. Some Factors which Influence Crystal Structures.....	263
9. Crystal Defects and Non-Stoichiometry.....	318
10. Solid Solutions.....	358
11. Interpretation of Phase Diagrams.....	374
12. Phase Transitions	417
13. Ionic Conductivity and Solid Electrolytes	452
14. Electronic Properties and Band Theory: Metals, Semiconductors, Inorganic Solids, Colour.....	497
15. Other Electrical Properties.....	525
16. Magnetic Properties	553
17. Optical Properties: Luminescence, Lasers.....	583
18. Glass	594
19. Cement and Concrete.....	638
20. Refractories.....	654
21. Organic Solid State Chemistry	666
Appendices.....	680
Formula Index.....	714
Subject and Author Index.....	720
