<b>1. The Molecular Surface Science of Heterogeneous Catalysis: History and Perspective.</b> By G.A. Somorjai (With 21 Figures) .....	1
References .....	21
<b>2. Fourier-Transform Infrared Spectroscopy in Heterogeneous Catalysis</b>	
By A.T. Bell (With 13 Figures) .....	23
2.1 Introduction .....	23
2.2 Optical Principles .....	24
2.3 Techniques for the Acquisition of Spectra .....	27
2.3.1 Transmission Spectroscopy .....	27
2.3.2 Diffuse-Reflectance Spectroscopy .....	29
2.3.3 Photoacoustic Spectroscopy .....	30
2.4 Applications .....	31
2.4.1 Transmission Spectroscopy .....	32
2.4.2 Diffuse-Reflectance Spectroscopy .....	34
2.4.3 Photoacoustic Spectroscopy .....	35
2.5 Conclusions .....	36
References .....	37
<b>3. Magnetic Resonance in Surface Science</b>	
By R.F. Howe (With 16 Figures) .....	39
3.1 Introduction .....	39
3.2 Background .....	40
3.2.1 EPR Spectroscopy .....	40
3.2.2 NMR Spectroscopy .....	41
3.3 Applications of EPR Spectroscopy .....	45
3.3.1 Identification of Adsorbed Radicals .....	45
3.3.2 Transition Metal Ions on Surfaces .....	48
3.3.3 Mobility of Adsorbed Radicals .....	49
3.3.4 Pulsed EPR Experiments .....	52

3.3.5 Well-Defined Surfaces .....	55
3.4 Applications of NMR Spectroscopy .....	57
3.4.1 $^{29}\text{Si}$ NMR of Zeolites .....	57
3.4.2 $^{13}\text{C}$ NMR of Adsorbed Molecules .....	59
3.5 Concluding Remarks .....	62
References .....	62
 4. Mössbauer Spectroscopy: Applications to Surface and Catalytic Phenomena. By B.J. Tatarchuk and J.A. Dumesic (With 14 Figures) ..	65
4.1 Introduction .....	65
4.2 Physical Principles Important to Surface-Specific Mössbauer Spectroscopy .....	66
4.2.1 Background .....	66
4.2.2 Feasibility and Limitations of Mössbauer Studies .....	67
4.2.3 Physical Bases for Backscattered Mössbauer Spectroscopies .....	69
4.3 Surface-Specific Mössbauer Studies: Equipment and Applications	71
4.3.1 Backscattered Photon Detection .....	71
4.3.2 Backscattered Electron Detection: Gas-Filled Electron Counters .....	73
4.3.3 Backscattered Electron Detection: Magnetic Spectrometers	76
4.3.4 Backscattered Electron Detection: Retarding Field and Electrostatic Analyzers .....	80
4.4 Theoretical Description Pertinent to Surface-Specific Mössbauer Techniques .....	81
4.4.1 Generation and Focusing of Source Radiation .....	82
4.4.2 Transmission of Source Radiation in the Solid .....	82
4.4.3 Generation of Backscattered Radiation .....	82
4.4.4 Transmission of Backscattered Radiation in the Solid ..	83
4.4.5 Detection of Scattered Species .....	83
4.4.6 Summary .....	86
4.5 New Developments in Surface-Specific Mössbauer Spectroscopy ..	86
4.5.1 Experimental .....	86
4.5.2 Theoretical .....	91
4.5.3 Experimental Measurements of Percent Effect: Verification of Proposed Model .....	104
4.6 Potential for Future Developments in Surface-Specific Mössbauer Spectroscopy .....	105
References .....	106

<b>5. Heterogeneous Photocatalysis with Semiconductor Particulate Systems.</b> By K. Kalyanasundaram and M. Grätzel (With 10 Figures) .....	111
5.1 Introduction .....	111
5.2 Studies with Colloidal Semiconductor Dispersions .....	114
5.2.1 General Considerations .....	114
5.2.2 Dynamics of Reduction of Methyl Viologen by $e_{cb}^-$ of Colloidal $TiO_2$ .....	115
5.2.3 Consecutive and Simultaneous Two-Electron Reduction of Viologens on Colloidal $TiO_2$ .....	119
5.2.4 Reduction of $Rh(bipy)_3^{3+}$ on Colloidal $TiO_2$ .....	119
5.2.5 Dynamics of Hole Transfer Reactions on Colloidal $TiO_2$ .....	121
5.2.6 Halide Oxidation of Colloidal $Fe_2O_3$ Sols .....	122
5.2.7 Colloidal $TiO_2$ in the Visible Light Induces Cleavage of Water .....	122
5.2.8 Photoluminescence of Colloidal CdS Particles .....	124
5.2.9 Luminescence and Photodegradation of Aerated Colloidal CdS Sols .....	124
5.3 Photoprocesses on 'Catalyst-Loaded' Semiconductor Dispersions .....	126
5.3.1 Characterization of Catalyst/Semiconductor Junctions ..	127
5.3.2 Photodecomposition of Water on Catalyst-Loaded Semiconductors .....	128
5.3.3 Photocleavage of Hydrogen Sulfide and Photosynthesis of Thiosulfate .....	131
5.3.4 Photoassisted Water-Gas Shift Reaction over Platinized Titania .....	132
5.3.5 Photoreactions of Organic Compounds .....	134
5.3.6 Photo-Kolbe Reaction .....	135
5.4 Conclusion .....	135
References .....	136

## 6. Laser Studies of Surface Chemical Reactions

By R.R. Cavanagh and D.S. King (With 11 Figures) .....	141
6.1 Introduction .....	141
6.2 Gas Phase Inelastic Scattering .....	142
6.3 Molecule-Surface Inelastic Scattering .....	143
6.4 Reactive Scattering .....	146
6.5 Thermal Desorption .....	147
6.6 Time Domain .....	156
6.7 Summary .....	156
References .....	157

<b>7. Surface Compositional Changes by Particle Bombardment</b>	
By R. Kelly (With 14 Figures) .....	159
7.1 Introduction .....	159
7.2 Changes Correlating with Mass .....	160
7.3 The Role of Chemical Bonds in Slow Collisional Sputtering ...	166
7.4 The Role of Chemical Bonds in Prompt Thermal Sputtering .....	171
7.5 The Role of Gibbsian Segregation .....	173
7.6 Conclusions .....	179
References .....	181
<b>8. Structure Determination of Small Metal Particles by Electron Microscopy.</b> By M.J. Yacaman (With 20 Figures) .....	183
8.1 Introduction .....	183
8.2 Weak-Beam Dark Field .....	183
8.3 Electron Diffraction of Individual Particles .....	185
8.4 Single-Twinned Particles .....	187
8.5 Icosahedral and Decahedral Particles .....	187
8.6 Regular fcc Shapes .....	190
8.7 Particle Surface Roughness .....	193
8.8 Surface Sites on Rough Particles .....	195
8.9 Correlation of Catalytic Activity with Structure .....	196
8.10 Anomalous Structure in Electron Diffraction Patterns from Small Particles .....	198
8.11 Conclusions .....	203
References .....	204
<b>9. Reconstruction of Metal Surfaces.</b> By P.J. Estrup (With 22 Figures)	205
9.1 Introduction .....	205
9.2 Surface Structures .....	206
9.2.1 Survey .....	206
9.2.2 fcc{110} Surfaces .....	209
9.2.3 fcc{100} Surfaces .....	213
9.2.4 fcc{111} Surfaces .....	216
9.2.5 bcc{100} Surfaces .....	217
9.3 Origin of Reconstruction .....	223
9.4 Reconstruction Effects on Chemisorption .....	226
References .....	227

<b>10. Surface Crystallography by Means of SEXAFS and NEXAFS</b>	
By J. Stöhr (With 13 Figures) .....	231
10.1 Introduction .....	231
10.2 Principles of SEXAFS and NEXAFS .....	232
10.2.1 Physical Processes which Determine SEXAFS and NEXAFS	232
10.2.2 The Basic Equations .....	236
10.3 Measurement Technique .....	239
10.4 Applications .....	241
10.4.1 NEXAFS Studies .....	242
10.4.2 SEXAFS Studies .....	247
10.5 Conclusions .....	252
References .....	253
<b>11. Determination of Surface Structure Using Atomic Diffraction</b>	
By T. Engel (With 17 Figures) .....	257
11.1 Introduction .....	257
11.2 The Atom-Surface Potential .....	258
11.3 Quantum Theory of Particle Diffraction .....	261
11.3.1 General Considerations on Diffraction .....	261
11.3.2 The Corrugated Hard Wall Model .....	263
11.3.3 The Inversion Problem in the Hard Corrugated Wall Limit .....	265
11.3.4 The Coupled Channel Method for Calculating Diffraction Intensities .....	266
11.4 Experimental Tests of the Atom-Surface Potential .....	268
11.5 Current Applications of Atom Diffraction in Surface Science	274
11.5.1 Atom Diffraction as a Surface Technique .....	274
11.5.2 Chemisorption of Hydrogen on Surfaces .....	275
11.5.3 Reconstruction of Adlayer Surfaces .....	276
11.5.4 Diffraction from Incommensurate Layers or Layers with Large Unit Cells .....	278
11.5.5 Insulator Surfaces .....	280
11.6 Summary .....	280
References .....	281
<b>12. An Atomic View of Crystal Growth</b>	
By G. Ehrlich (With 12 Figures) .....	283
12.1 Introduction .....	283
12.2 Observation of Single Adatoms .....	284

12.3	The Atomic Steps in Layer Growth .....	285
12.3.1	Capture and Condensation of Atoms .....	285
12.3.2	Atom Diffusion .....	287
12.3.3	Adatoms at Surface Steps .....	290
12.3.4	Clustering of Adatoms .....	291
12.4	Summary .....	294
	References .....	295
<b>13.</b>	<b>Ising Model Simulations of Crystal Growth</b>	
	By G.H. Gilmer (With 15 Figures) .....	297
13.1	Introduction .....	297
13.2	Model of Crystal Growth .....	297
13.3	Equilibrium Surface Structure .....	299
13.4	Crystal Growth Kinetics .....	304
13.5	Conclusions .....	314
	References .....	315
<b>14.</b>	<b>Phase Transitions on Surfaces.</b> By P. Bak (With 20 Figures) .....	317
14.1	Introduction .....	317
14.1.1	2D Physics and Adsorption .....	317
14.1.2	Experiments .....	318
14.2	The Commensurate-Incommensurate Transition and Quantum Solitons .....	322
14.3	The Melting Transition and the Phase Diagram-Dislocations and Soliton Liquids .....	328
	References .....	336
<b>15.</b>	<b>Finite Size Effects, Surface Steps, and Phase Transitions</b>	
	By P. Kleban (With 7 Figures) .....	339
15.1	Introduction .....	339
15.1.1	Goals .....	339
15.1.2	Phase Transitions on Surfaces .....	340
15.2	Overlayer Ordering and Adatom Binding Energy at Step Edges .....	345
15.3	Phase Transitions and Finite-Size Effects .....	349
15.3.1	First-Order Transitions: Ordered Overlays .....	349
15.3.2	First-Order Phase Transitions: Liquid-Gas Coexistence .....	352
15.3.3	Finite-Size Scaling Theory: Second-Order Transitions .....	353
15.3.4	Finite-Size Scaling Theory: First-Order Transitions .....	357

15.4	Summary, Conclusions and Future Directions .....	360
15.4.1	Summary .....	360
15.4.2	Future Directions .....	360
	References .....	362
<b>16.</b>	<b>Recent Developments in the Theory of Epitaxy</b>	
	By J.H. van der Merwe (With 7 Figures) .....	365
16.1	Introduction .....	365
16.1.1	Nomenclature and Techniques .....	365
16.1.2	Deposition .....	366
16.1.3	Governing Principles and Models .....	367
16.1.4	Growth Modes .....	368
16.1.5	Orientation .....	368
16.1.6	Misfit Accommodation .....	372
16.2	Growth Modes .....	375
16.2.1	Adsorption-Desorption .....	375
16.2.2	Bauer's Criteria .....	377
16.2.3	Young's Equation .....	379
16.2.4	Supersaturation .....	380
16.2.5	Electronic Influence of the Substrate .....	382
16.2.6	Intermixing .....	383
16.2.7	Misfit Accommodation .....	384
16.2.8	Kinetic Constraints .....	384
16.3	Epitaxy of {111} fcc Metals on {110} bcc Metal Substrates ..	386
16.3.1	Model .....	386
16.3.2	Ideal Epitaxial Configurations .....	389
16.3.3	Accommodation of Misfit .....	391
16.4	Concluding Remarks .....	397
	References .....	399
<b>17.</b>	<b>Angle-Resolved Secondary Ion Mass Spectrometry</b>	
	By N. Winograd (With 13 Figures) .....	403
17.1	Introduction .....	403
17.2	Background Information .....	403
17.3	Theory of Ion/Solid Interactions .....	408
17.3.1	Momentum Dissipation and Classical Dynamics Calculations .....	408
