

CONTENTS

Preface	vii
J. Pritchard, T. Catterick and R.K. Gupta, Infrared spectroscopy of chemisorbed carbon monoxide on copper	1
J.C. Fuggle and D. Menzel, Coverage dependent shifts of XPS peaks during chemisorption on metals	21
R.A. van Santen, Theory of chemisorption of hydrogen on transition metals and their alloys	35
S.P. Singh-Boparai, M. Bowker and D.A. King, Crystallographic anisotropy in chemisorption: nitrogen on tungsten single crystal planes	55
D.W. Bassett, Surface atom displacement processes	74
E. Bauer, F. Bonczek, H. Poppa and G. Todd, Thermal desorption of metals from tungsten single crystal surfaces	87
C. Webb and P.M. Williams, Appearance potential spectroscopy of layer materials	110
M.M. Traum and N.V. Smith, Repeated zones and Mahan cones in the angular dependence of photoemission	121
J.W. Gadzuk, Angle resolved photoemission from chemisorbed layers: further theoretical considerations	132
R.F. Willis and B. Feuerbacher, Angular-resolved secondary-electron-emission spectroscopy of clean and adsorbate covered tungsten single-crystal surfaces	144
S.A. Flodström, G.V. Hansson, S.B.M. Hagström and J.E. Endriz, Photoemission with polarized light from free-electron and transition metals	156
M.P. Seah, Interface adsorption embrittlement and fracture in metallurgy – a review	168
M. Guttmann, Equilibrium segregation in a ternary solution: a model for temper embrittlement	213
H.J. Mathieu and D. Landolt, Quantitative Auger electron spectroscopy analysis of Ag–Pd and Ni–Pd alloys	228
C.T.H. Stoddart, R.L. Moss and D. Pope, Determination of the surface composition of palladium–nickel alloy film catalysts using Auger electron spectroscopy	241
J.S.L. Leach, The role of surface films in corrosion and oxidation	257
C. Lea and M.P. Seah, Site competition in surface segregation	272
J.E. Castle and D.C. Epler, The correlation of XPS analysis with electrochemical history in aqueous corrosion	286
J.J. McCarroll, Surface physics and catalysis	297
B. Lang, A LEED study of the deposition of carbon on platinum crystal surfaces	317
J.M. Wilson, LEED and AES study of the interaction of H ₂ S and Mo(100)	330
P.E.C. Franken and V. Ponc, Ethylene adsorption on thin films of Ni, Pd, Pt, Cu Au and Al; work function measurements	341
K. Besocke and H. Wagner, Adsorption of tungsten on stepped tungsten surfaces studied by work function measurement	351
M. Leynaud and G. Allan, Adsorption of transition metal monolayers on tungsten surfaces	359
H. Papp and J. Pritchard, The adsorption of Xe and CO on a Cu(311) single crystal surface	371
W. Heiland, F. Iberl, E. Taglauer and D. Menzel, Oxygen adsorption on (110) silver	383
B. Kasemo and L. Walldén, Photon and electron emission during halogen adsorption on sodium	393
V. Heine, Electron states at surfaces (abstract only)	408

R.O. Jones, P.J. Jennings and G.S. Painter, Cluster calculations of the electronic structure of transition metal surfaces	409
M.C. Desjonquères and F. Cyrot-Lackmann, Electronic surface states in cleaved transition metals	429
N. Nicolaou and A. Modinos, Band-structure effects in field-emission energy distributions in tungsten (abstract only)	443
H. Ibach, Relations between electronic properties of clean surfaces and activated adsorption	444
J.E. Rowe, Anisotropic photoemission and chemisorption—bond geometry on Ge(111) and Si(111) surfaces	461
H. Clemens, W. Mönch and J. von Wienskowski, On electronic properties of cleaved and cesiated GaAs(110) and Ge(111) surfaces (abstract only)	473
J.C. Phillips, Theory of semiconductor surfaces	474
Y. Margoninski, D. Segal and R.E. Kirby, The interference of an electron beam with the surface reaction between oxygen and germanium	488
P.A. Taylor, R. Leysen and B.J. Hopkins, Some properties of clean and alkali metal covered ZnO surfaces (abstract only)	500
P.M. Marcus, J.E. Demuth and D.W. Jepsen, Determination of the structure of ordered adsorbed layers by analysis of LEED spectra	501
A. Salwén and J. Rundgren, The structure of the p(2×2) tellurium overlayer on the (001) surface of copper investigated by LEED	523
D.P. Woodruff, Surface structure from angular dependence of Auger electron emission	538
M. Baines, A. Howie and S.K. Andersen, Crystalline effects in backscattering and Auger production	546
M.J. Southon, E.D. Boyes, P.J. Turner and A.R. Waugh, Some applications of field-ionization and field-evaporation techniques in the study of surfaces	554
I.G. Higginbotham, R.H. Williams and A.J. McEvoy, Adhesion at gold—mica interfaces (abstract only)	581
P. Staib, Highly sensitive Auger electron spectroscopy (abstract only)	582
G.G. Summers and H.N. Southworth, The effect of temperature and electrostatic field on tungsten and iridium field-ion emitters	583
A. Benninghoven, Developments in secondary ion mass spectroscopy and applications to surface studies	596
K. Wittmaack, Energy dependence of the secondary ion yield of metals and semiconductors	626
M. Gettings and J.P. Coad, A preliminary study of pure metal surfaces using Auger electron spectroscopy (AES), X-ray photoelectron spectroscopy (XPS) and secondary ion mass spectroscopy (SIMS)	636
H.H. Brongersma and T.M. Buck, Selected topics in low-energy ion scattering: surface segregation in Cu/Ni alloys and ion neutralization	649
C. Argile and G.E. Rhead, Calibration in Auger electron spectroscopy by means of coadsorption	659
E. Legrand-Bonnyns and A. Ponslet, Pre-oxidation structures at 650°C on Cu(100), (210) and (841) surfaces studied by RHEED and microscopy	675
M. Salmerón, A.M. Baró and J.M. Rojo, Interatomic Auger processes and the density of states	689
T.E. Gallon and J.D. Nuttall, Solid state broadening in Auger spectra	698
J.A.D. Matthew and Y. Komninos, Transition rates for interatomic Auger processes	716
Author index	726
Subject index	730
