Part I Structure

1. Structural Determination of Surfaces and Overlayers with Diffraction Methods By K.H. Rieder (With 7 Figures)	2
1.1 Introduction	2
1.2 Surface Diffraction Kinematics	2
1.3 Low-Energy Electron Diffraction (LEED)	4
1.4 Reflection High-Energy Electron Diffraction (RHEED)	5
1.5 Photoelectron Diffraction	7
1.6 Glancing Incidence X-Ray Diffraction	8
1.7 Atomic-Beam Diffraction	9
References	12
2. Defects at Surfaces By M. Henzler (With 17 Figures)	14
2.1 Introduction	14
2.2 Systematic Description of Defects	15
2.3 Experimental Techniques	16
2.4 Schematic Description of Quantitative Evaluation	20
2.5 The Kinematic Approximation and Inclusion of Dynamic Effects ..	24
2.6 Instrumental Limitations	26
2.7 Examples	27
2.8 Conclusion	32
References	33
3. Metal-Metal Superlattices	
By C.M. Falco, W.R. Bennett, and A. Boufelfel (With 11 Figures) ..	35
3.1 Introduction to Metal-Metal Superlattices	35
3.2 Preparation of Metallic Superlattices by Sputtering	37
3.3 Characterization	40
3.3.1 Rutherford Backscattering Spectroscopy (RBS)	40
3.3.2 X-Ray Diffraction	41
3.3.3 Auger Electron Spectroscopy (AES)	44
3.4 Summary	45
References	46
4. Advances in Semiconductor Superlattices, Quantum Wells and Heterostructures By L. Esaki	48
4.1 Superlattice Band Model and Experiment (1969-1972)	48
4.2 Multibarrier Tunneling and Quantum Wells: Theory and Experiment (1973-1974)	49

4.3 Optical Absorption for Quantum Wells and Superlattices (1974-1975)	49
4.4 Raman Scattering (1976-1980)	50
4.5 Modulation Doping (1978) and Subsequent Developments	50
4.6 Quantized Hall Effect (1980-1981) and Discovery of Fractional Filling (1982)	50
4.7 Variety of Heterojunctions and Superlattices and Relevant Topics	51
4.8 InAs-GaSb Superlattices (1977-1982) and Quantum Wells (1982-)	53
References	55

Contributions

Electronic Surface Transitions in Si(111)2x1 Studied by Polarized Light By A. Cricenti, F. Ciccacci, S. Selci, P. Chiaradia, and G. Chiarotti (With 2 Figures)	60
Short Range Bonding Interaction at Metal-Metal Interfaces By W.R. Bennett, J.A. Leavitt, and C.M. Falco (With 2 Figures) ...	62

Part II Lattice Dynamics

5. Phonons at Interfaces and Superlattices

By G. Benedek and V.R. Velasco (With 8 Figures)	66
5.1 Introduction	66
5.2 Interface Lattice Dynamics	68
5.3 Dynamics of Superlattices	71
5.3.1 Compositional Superlattices	73
5.3.2 Doping Superlattices	74
References	77

6. Pseudopotentials and Dynamical Properties of Metallic Surfaces

By C. Calandra and A. Catellani (With 3 Figures)	80
6.1 Introduction	80
6.2 Total Energy	81
6.2.1 Bulk Case	82
6.2.2 Surface Case	83
6.3 Determination of the Selfconsistent Potential	85
6.4 Dynamical Matrix	86
6.5 Applications	87
6.6 Conclusions	90
References	90

7. One-Phonon Scattering of He Atoms from the Ag (111) Surface

By V. Bortolani, A. Franchini, and G. Santoro (With 6 Figures) ...	92
7.1 Introduction	92
7.2 DWBA Cross-Section	92
7.3 Atom-Surface Potential	94
7.4 Calculation for the (111) Surface	96
References	99

8. Electron Energy-Loss Spectroscopy for Metal Surfaces	
By F. Nizzoli (With 9 Figures)	101
8.1 Introduction	101
8.2 Dipole Scattering	101
8.2.1 Dipole EELS in Nickel (111)	103
8.2.2 Dipole EELS in Nickel (001)	105
8.3 Impact Scattering	107
References	108
9. Electron Energy-Loss Spectroscopy of Surfaces and Absorbates	
By H. Ibach (With 5 Figures)	109
9.1 Introduction	109
9.2 Electron Energy-Loss Spectroscopy	110
9.3 Application to Oxidation Processes	111
9.4 Bonding of Hydrocarbons on Transition Metals	112
9.5 Surface Phonons	113
References	115

Contributions

High Resolution Inelastic He-Atom Scattering from Crystal Surfaces	
By U. Harten, J.P. Toennies, and Ch. Wöll (With 3 Figures)	117
Surface Lattice Dynamics of Ordered Overlayers on Metals	
By T.S. Rahman	120
Bulk and Surface Phonons in Superlattices	
By B. Djafari-Rouhani	122

Part III Phase Transitions

10. Surface Reconstruction Phase Transformations	
By R.F. Willis (With 17 Figures)	126
10.1 Introduction	126
10.2 Landau Theory of Structural Phase Transformations	127
10.2.1 Order-Disorder Transitions at Surfaces: Critical Exponents	128
10.2.2 Classification of the Au(110)(2x1) Order-Disorder Transition	130
10.2.3 Leed Spot-Profile Analysis of Au(110)(2x1) Phase Transition	132
10.2.4 X-Y Model with Cubic Anisotropy $W(100)(\sqrt{2}\times\sqrt{2})$	134
10.3 Landau Theory of Incommensurate Surface Phases	136
10.3.1 'Soliton Superlattice' Structure of Incommensurate Phase	139
10.3.2 Incommensurate Phase Fluctuations	141
10.4 Related Systems	143
10.4.1 Au, Ir, Pt(100) and Au(111) Reconstructed Surfaces ...	143
10.4.2 Semiconductor Reconstructed Surfaces	144
References	145
11. Structural Phase Transitions on W and Mo Surfaces	
By S.C. Ying (With 1 Figure)	148
11.1 Introduction	148

11.2 Driving Mechanisms for the Structural Transition	148
11.3 Monte-Carlo Simulations of Model Two-Dimensional Hamiltonian	149
11.4 Effect of Adsorbate on the Transition	151
11.5 Soliton Picture for the Commensurate-Incommensurate Transition	152
References	155

Contributions

Charge Density Waves in Layered Compounds By P.C. Klipstein (With 2 Figures)	157
Dynamics of Mismatched Overlayers By K.M. Martini, S. Burdick, M. El-Batanouny, and G. Kirczenow (With 1 Figure)	159

Part IV Electronic States

12. Electronic Structure of Surfaces, Interfaces, and Superlattices By A.J. Freeman	162
12.1 Introduction	162
12.2 Surfaces and Overlayers	162
12.2.1 Introduction	162
12.2.2 Local-Spin-Density-Functional (LSDF) Theory	163
12.2.3 Methodology and Approach	164
12.2.4 Surface and Interface Magnetism	166
12.2.4.1 Magnetism of Ni(001) and Fe(001)	166
12.2.4.2 Interface Magnetism of Ag/Fe(001)	168
12.2.4.3 Magnetism of the Ni/Cu Interface	168
12.2.5 Surface Multilayer Relaxation: W(001)	169
12.3 Metallic Superlattices	170
12.3.1 Introduction	170
12.3.2 Theoretical Approach	171
12.3.3 Results for NiCu and PdAu	171
12.3.3.1 CuNi	171
12.3.3.2 PdAu	173
References	174
13. Electrons and Phonons in One and Two Dimensions in Semiconductor Structure By M. Pepper (With 26 Figures)	176
Strong Localisation	176
Weak Localisation	180
Dimensionality Transitions in the Conductivity	186
(a) 3D to 2D	186
(b) 2D to 1D	189
The Quantum Hall Effect	191
References	193
14. RHEED and Photoemission Studies of Semiconductors Grown in-situ by MBE By P.K. Larsen, B.A. Joyce, and P.J. Dobson (With 20 Figures)	196
14.1 Overview	196
14.2 Basis of Experimental Approach	197

14.2.1	Molecular Beam Epitaxy	197
14.2.2	Surface Reconstruction and RHEED	198
14.2.3	Angular Resolved Photoemission	201
14.3	The Growth Process	203
14.3.1	Growth Dynamics	203
14.3.2	Surface Stoichiometry and Reconstruction	205
14.3.3	Surface Morphology Effects	206
14.4	Electronic Surface Structure Determination	209
14.4.1	Identification of Surface and Bulk States	209
14.4.2	Bulk Valence Bands	210
14.4.3	Surface States: Energy Bands and Symmetries	211
14.4.4	Semiconductor Heterojunctions	214
14.5	Core Level Photoemission	215
14.5.1	Surface Chemistry	215
14.5.2	Heterojunctions	216
	References	217
15.	Metal-Semiconductor Interfaces and Schottky Barriers	
	By G.W. Rubloff (With 11 Figures)	220
15.I	Introduction	220
15.II	Metal/Semiconductor Interface Reactions	221
15.III	Metal/Si Interface Chemistry	223
15.III.A.	Simple-Metal/Si and Noble-Metal/Si Interfaces	223
15.III.B.	Transition-Metal/Si and Rare-Earth/Si Interfaces ..	224
15.III.C.	Interfacial Silicide Formation	224
15.III.D.	The Silicide/Si Interface	228

17.II.C. Light Scattering by the Modes of the Folded Acoustic Branch	261
17.III Brillouin Scattering by Rayleigh Surface Waves	262
17.III.A. Rayleigh Surface Wave Propagation	262
17.III.B. Experimental Results	263
17.IV. Conclusion	265
References	265
18. Nonlinear Surface Polaritons	
By G.I. Stegeman and C.T. Seaton (With 8 Figures)	266
18.1 Introduction	266
18.2 Nonlinear Single Interface Waves	266
18.3 A Film Bounded by Nonlinear Media	269
18.3.a. Bounding Media with Positive Nonlinearities	269
18.3.b. Bounding Media with Negative Nonlinearities	273
18.3.c. Bounding Media with Positive and Negative Nonlinearities	273
18.4 Experimental Verification	273
18.5 Discussion	274
References	275
19. Surface Plasmon Emission as a Probe of Hot-Electron Dynamics	
By J.R. Kirtley, T.N. Theis, D.J. DiMaria, J.C. Tsang, M.V. Fischetti, and S.D. Brorson (With 12 Figures)	276
19.I Introduction	276
19.II Light Emission from Tunnel Junctions	277
19.III Electron Injector Structures	284
References	289
20. Spectroscopy of Two Dimensional Plasmas in Semiconductor Heterostructures	
By A. Pinczuk (With 7 Figures)	291
20.1 Introduction	291
20.2 Light Scattering Spectroscopy	292
20.3 Optical Processes of 2D Plasma	298
20.4 Concluding Remarks	301
References	301

Contribution

Surface Coherent Anti-Stokes Raman Spectroscopy	
By R.M. Fortenberry	304

Part VI Magnetic Properties

21. Surface Magnetism by Spin Polarized Electrons	
By H.C. Siegmann (With 1 Figure)	306
21.1 Introduction	306
21.2 Elastic Exchange Scattering of Electrons	307
21.3 Inelastic Exchange Scattering of Electrons	309
21.4 Spin Polarization of Auger-Electrons	311
21.5 Low-Energy Cascade and Threshold Photoelectrons	312
21.6 Conclusion	313
References	314
22. Magnetism at Interfaces and Surfaces, as Probed by Neutron Scattering	
By G.P. Felcher (With 7 Figures)	316
22.1 Introduction. Why Neutrons?	316
22.2 Magnetic Superlattices	317
22.3 Magnetism at the Surface	321
22.4 Conclusions	325
References	325
