

CONTENTS

Preface	ix
Introduction: Elementary Reaction Steps in Heterogeneous Catalysis R.W. Joyner and R.A. van Santen	1
<i>Session 1: Catalytic Reactivity</i>	
Surface Science as a Basis for Understanding Heterogeneous Catalysis G.A. Somorjai	3
Organometallic Chemistry as a Basis for Understanding Heterogeneous Catalysis J.M. Basset, S.L. Scott, A. Choplin, M. Leconte, F. Quignard, C. Santini and A. Theolier	39
The Organic Chemical Approach to Heterogeneous Catalysis J.J. Rooney	51
Electrochemical Activation of Catalysed Reactions C.G. Vayenas	73
Selective Oxidation Pathways at Oxide Surfaces: The Transformation of Alkanes on Vanadyl Pyrophosphate G. Centi	93
Theory of Bronsted Acidity in Zeolites R.A. van Santen, G.J. Kramer and W.P.J.H. Jacobs	113
Discussion Summary: Session 1 Rapporteur P.B. Wells	133
<i>Session 2: Surface Science Studies in Catalysis</i>	
Surface Reactivity of Oxides E. Bordes	137
Adsorption and Reactions of CO, NO, H ₂ and O ₂ on Group VIII Metal Surfaces B.E. Nieuwenhuys	155

Model Catalyst Studies of Titania Supported Rhodium	179
J. Evans, B.E. Hayden, J.F.W. Mosselmans and A.J. Murray	
The Dynamics of Alkane Adsorption on Metals	197
G.W. Coulston and G.L. Haller	
The Study of Dynamics at Catalytic Surfaces with Nuclear Magnetic Resonance Spectroscopy	221
T.M. Duncan	
Discussion Summary: Session 2	243
Rapporteur H.P.C.E. Kuipers	
<i>Session 3: In-situ Methods in Catalysis</i>	
Applications of Synchrotron Radiation in Catalysis	249
R.W. Joyner	
Infrared Spectroscopy as a Probe of Surface Acidity	267
H. Knözinger	
The Effects of Coadsorbates on the Behaviour of Surface Species and Sites in Catalysis by Means of EXAFS and FTIR	287
Y. Iwasawa	
How Can Scanning Tunneling Microscopy, Coupled with Theory, Help Us Understand Some Elementary Steps in Catalysis	305
P. Sautet, J.C. Dunphy and M.B. Salmeron	
Discussion Summary: Session 3	313
Rapporteur V. Ponec	
<i>Session 4: The Contribution of Theory to Catalytic Understanding</i>	
Quantum Chemistry of Chemisorption at Metal and Oxide Surfaces: A Cluster Model Approach	317
G. Pacchioni and P.S. Bagus	
Reaction Dynamics at Surfaces	341
S. Holloway	
Chemical Reactivity as a Function of Coverage	359
V.P. Zhdanov	
Solvent Effects on the Diels-Alder Reaction of Methyl Vinyl Ketone and Cyclopentadiene from Computer Simulations	377
W.L. Jorgensen, D. Lim and J.F. Blake	

Molecular Modeling and Molecular Graphics of Sorbates in Molecular Sieves	389
D.P. Vercauteren, L. Leherste, D.J. Vanderveken, J.A. Horsley, C.M. Freeman and E.G. Derouane	
Discussion Summary: Session 4	403
Rapporteur E. Shustorovich	
<i>Session 5: Chemical Kinetics and Chemical Engineering</i>	
Reaction Modelling on the Basis of the Published Potential Energy Diagram	407
K.C. Waugh	
Transient Kinetics in Catalysis by Metals	423
A. Frennet	
Reaction Kinetics and Industrial Catalysis	441
J. Rostrup-Nielsen	
Discussion Summary: Session 5	461
Rapporteur J.C. Vedrine	
<i>Summary Lectures</i>	
Toward Next Century's Industrial Catalysis	465
J.J. Lerou and L.E. Manzer	
Elementary Reaction Steps in Heterogeneous Catalysis: A Workshop Overview	473
G.L. Haller and G.W. Coulston	
List of Contributors	485
Index	489
