

CONTENTS

Aqueous Corrosion

Aqueous Corrosion of Ion Implanted Iron: H. Ferber and G.K. Wolf.	1
The Influence of Ion Implanted Chromium on the Electrochemical Behavior of Iron in Aqueous Solutions: P. A. Parrish, S. Kim and R.B. Benson, Jr.	12
Electrochemical Behavior of an Amorphous Fe-Ti-C Surface in Titanium-implanted Steel: G.K. Hubler, P. Trzaskoma, E. McCafferty and I.L. Singer.	24
Effects of Radiation Damage, Heat Treatment and Dose on the Corrosion and Electrochemical Behaviour of Implanted Iron: P.L. Bonora, G. Cerisola, C.Tosello and S. Tosto.	35
Attempts to Reduce the Oxygen Overpotential of Ni Anodes using Ion Beam Mixing and Ion Implantation Techniques: D.A. Thompson, U.Akano, J.A. Davies and W.W. Smeltzer.	46
The Influence of Ion-implantation on the Corrosion Resistance of Inconel Alloy 600: N. Pessall, M.Baron, J. Schreurs and J.B.P. Williamson.	55
RHEED, AES and XPS Studies of the Passive Films Formed on Ion Implanted Stainless Steel: C.R. Clayton, K.G.K. Doss, Y.F. Wang, J.B. Warren and G.K. Hubler.	67
The Effect of Chlorine Implantation on the Localized Corrosion Behaviour of Stainless Steel and Aluminium: V. Ashworth, E. Baron, W.A. Grant, P. Munn and R.P.M.Procter.	77
Anodic Oxidation of Aluminium: Ion Implantation Effects: R.A. Collins, A.D. Buonaquisti and G. Dearnaley.	87

Solute Redistribution during Corrosion of Titanium-Platinum Near-surface Alloys: B.D. Lichter, N.G.Thompson, B.R. Appleton and E.J. Kelly.	97
<u>Mechanical Properties:</u>	
Modification of the Surface Mechanical Properties of Ferrous Alloys by Nitrogen Ion Implantation: H. Herman.	102
Effects of Nitrogen Ion Implantation on the Wear Properties of Steel: E.B. Hale, T.H. Kaiser, C.P. Meng and R.A. Kohser.	111
Ion Implantation for Improving Wear Resistance of Metals: Xie Zhong-yin, Tu You-Mo, Qiao-Yong and Lin Chen-Ru.	117
The Use of Ion Implantation for Improved Abrasive Wear Resistance: B.G. Delves.	126
The Effects of N_2^+ Ion Implantation on the Hardness and Wear Behaviour of Brittle Materials: S.G. Roberts and T.F. Page.	135
Microhardness Tests with Penetration Depths Less than Ion Implanted Layer Thickness: J.B. Pethica.	147
The Ultra-microhardness of Ion-implanted Iron and Steel at Sub-micron Depths and Its Correlation with Wear Resistance: D. Newey, H.M. Pollock and M.A. Wilkins.	157
Use of Ion Implantation to Improve Adhesion between a Polymer Coating and a Metal: E.B. Hale, W.J. James, A.K. Sharma and H.K. Yasuda.	167
The Effects of Ion Implantation on Low Cycle Fatigue Behavior of Copper Single Crystals: P. Heydari, E. A. Starke, S.B. Chakraborty and K.O. Legg.	172
Interrelation between Wear and Oxidation in Ion-implanted Metals: G. Dearnaley.	180
<u>High Temperature Oxidation.</u>	
High Temperature Oxidation of Ion Implanted Metals: A. Galerie.	190
Aluminium or Boron Implantation into Iron for Improved Oxidation Resistance: M. Pons, M. Caillet and A.Galerie.	201
The Effects of Fe and Cr Ion Implantation on the Reaction of Iron with Oxygen : C.I. Howe, B. McEnaney, V.D.Scott and G. Dearnaley.	211
A Comparison of the Oxidation of Chromium and Nickel Implanted Iron and Bulk Alloys: P.J.K. Paterson, O. Spillecke and P.J. Osborne.	219

The Oxidation of Ion-implanted Nickel at High Temperatures: F.H. Stott, Zhou Peide, R.P.M. Procter and W.A. Grant.	231
The Influence of Ion Implantation on the Development of Cr_2O_3 Scales on Ni-20% Cr at High Temperature: F.H. Stott, J.S. Punni, G.C. Wood and G. Dearnaley.	245
Combined Applications of Ion Implantation and SIMS to Study the Influence of Dopants on the Growth of Oxide Films: D. Loison, J.C. Pivin and J. Chaumont.	255
The Influence of Cerium and Yttrium Ion Implantation Upon the Oxidation Behaviour of a 20% Cr/25% Ni/Nb Stabilised Stainless Steel, in Carbon Dioxide, at 825°C: M.J. Bennett, G. Dearnaley, M.R. Houlton and R.W.M. Hawes.	264
A Comparison Between the Effects of Implantation in Ultra-clean and Standard Vacuum Environments: K.O. Legg, M.W. Ribarsky, J.M. Cathcart and J.R. Stevenson.	277
<u>Other Properties and Effects.</u>	
The Influence of Amorphization by Ion Implantation on the Superconducting and Normal Conducting Properties of Evaporated Molybdenum Layers: G. Linker	284
Blistering and Exfoliation on Gold by 1-3.52 MeV Helium Particles: G. Mezey, F. Pászti, L. Pogány, A. Manuaba, M. Fried, E. Kótai, T. Lohner, L. Pócs and J. Gyulai.	293
Metal Ion Sources at GSI: B.H. Wolf and R. Keller	302
Studies of the Surface Composition of Ion-bombarded Metals Using Computer Analysed RBS Spectra: S.S. Eskildsen.	315
Electron Channeling in Ion Implanted Titanium: H. F. Solnick- Legg, K.O. Legg, J.M. Cathcart and J.R. Stevenson.	328
Mössbauer Study of Atomic Volume Effects in Elements of Carbon Family: J.A. Sawicki and B.D. Sawicka.	335
Atomic Volume Effects and Iron Interstitials in Implanted Alloys; Correlation with Miedema Model of Alloying: B.D. Sawicka and J.A. Sawicki.	341
Reactive Ion-beam Mixing in a Platinum-Metal Halide- Copper System: K.R. Padmanabhan and G. Sørensen.	352
The Effect of Ion Implantation on a Sputtered TiB_2 Film on a Stainless-steel Substrate: K.R. Padmanabhan and G. Sørensen.	361
