
CONTENTS

CHAPTER 1 AN OVERVIEW OF SURFACE MODIFICATION

by J. M. Poate and G. Foti

I.	Introduction	1
II.	Surface Heating	2
III.	Crystal Growth: Epitaxy	6
IV.	Metastable Phases	7
V.	Ion Beam Effects	7
VI.	Applications and Future Directions	11

CHAPTER 2 ENERGY DEPOSITION AND HEAT FLOW FOR PULSED LASER, ELECTRON AND ION BEAM IRRADIATION

by E. Rimini

I.	Introduction	16
II.	Interaction of Laser Beams with Semiconductors	17
III.	Interaction of Laser Beams with Metals	30
IV.	Electron Beam Irradiation of Materials	40
V.	Ion Beam Irradiation of Materials	43
VI.	Conclusion	46

CHAPTER 3 CRYSTAL GROWTH AND PHASE FORMATION

by K. A. Jackson

I.	Introduction	51
II.	Crystal Growth	52
III.	Solute Trapping	59
IV.	Amorphous Silicon	64
V.	Crystallization of Amorphous Silicon	68
VI.	Explosive Crystallization	69
VII.	Heat Flow and Crystallization	70
VIII.	Constitutional Supercooling	71
IX.	Defects Produced by Laser Irradiation	73

CHAPTER 4 SEGREGATION, SUPERSATURATED ALLOYS AND SEMICONDUCTOR SURFACES	81
by C. W. White, D. M. Zehner, S. U. Campisano and A. G. Cullis	
I. Introduction	82
II. Segregation, Supersaturated Alloys and Solute Trapping	83
III. Surface Properties	117
CHAPTER 5 SOLID PHASE RECRYSTALLIZATION PROCESSES IN SILICON	133
by J. S. Williams	
I. Introduction	133
II. Overview of Experimental Observations	134
III. Regrowth Models	152
IV. Summary and Conclusions	159
CHAPTER 6 METASTABLE ALLOYS AND SUPERCONDUCTIVITY	165
by B. Stritzker	
I. Introduction	166
II. Non-Equilibrium Methods	169
III. Internal Energy Considerations	171
IV. Vapor Quenching, Comparison with Other Non-Equilibrium Techniques	173
V. Liquid Quenching; Comparison with Other Non-Equilibrium Techniques	178
VI. Ion Irradiation and Implantation; Methods to Produce Amorphous Metals	181
VII. Te-Au; A Comparison of the Different Non-Equilibrium Techniques	182
VIII. Conclusion	184
CHAPTER 7 COLLISION CASCADES AND SPIKE EFFECTS	189
by J. A. Davies	
I. Introduction	189
II. Collision Cascade Concepts	191
III. Deposited Energy Density, θ	193
IV. Ion-Beam Mixing	198
V. Experimental Examples of Spike Effects	201
VI. Thermal Spike Concepts - and Complications	205
VII. Conclusions	208

CHAPTER 8 SOLUTE REDISTRIBUTION AND PRECIPITATE STABILITY: POINT-DEFECT MEDIATED EFFECTS 211**by A. D. Marwick**

I.	Introduction	211
II.	Mechanisms	212
III.	Redistribution Effects	223
IV.	Phase Stability Under Irradiation	232
V.	Conclusions and Future Trends for Surface Processing	237

CHAPTER 9 ION BEAM MIXING 241**by J. W. Mayer and S. S. Lau**

I.	Introduction	242
II.	Mixing Effects in Compound Forming Systems; Pt-Silicide	244
III.	Mixing Effects in Silicide Forming Systems	251
IV.	Metal/Metal Bilayer Systems	252
V.	Multi-Layer Metal/Metal Systems	255
VI.	Eutectic Systems	256
VII.	Conclusions and Speculations	258

CHAPTER 10 SPUTTERING AND COMPOSITIONAL CHANGES 261**by H. Wiedersich**

I.	Introduction	261
II.	Processes Involved in Surface Compositional Changes	262
III.	Model Calculations	275
IV.	Summary and Conclusions	281

CHAPTER 11 SURFACE MODIFICATION AND ALLOYING: ALUMINUM 287**by S. T. Picraux and D. M. Follstaedt**

I.	Introduction	288
II.	Electron, Laser and Ion Beam Heating	289
III.	Ion Implantation and Pulsed Heating	291
IV.	Summary of Pulsed Melting Microstructures	313
V.	Ion Beam Mixing and Pulsed Melting of Layers	318
VI.	Conclusions	320

CHAPTER 12 MATERIALS MODIFICATION BY ION IMPLANTATION	323
by J. K. Hirvonen and C. R. Clayton	
I. Introduction	324
II. Ion Implantation - Advantages and Limitations of the Technique	324
III. Tribological and Mechanical Property Changes	326
IV. Mechanisms of Friction and Wear	337
V. Fatigue	341
VI. Applications of Ion Implantation to Corrosion Science and Engineering	349
VII. Chemical Applications of Ion Implantation - Catalysts and Hydrogen Migration	361
VIII. Radiation Damage and Pulsed Annealing of Superconductors with A15 Structure	365
IX. Ion Implantation as a Tool in Fundamental Alloy Research - Interstitials in Metals	372
CHAPTER 13 LASER SURFACE ALLOYING	385
by C. W. Draper and J. M. Poate	
I. Introduction	385
II. Metallurgy	386
III. Ferrous Based Systems	394
IV. Nonferrous Based Systems	396
V. Metal Silicides	400
VI. Conclusions	401
