

Contents

1. Introduction	1
1.1 General Overview	1
1.2 Scope of the Book	3
2. Scattering by a Potential Field	4
2.1 Formulation of the Problem	4
2.2 Solution of the Schrödinger Equation for Potential Scattering	6
2.3 The Radial Schrödinger Equation	8
2.4 Numerical Methods for the Solution of the Schrödinger Equation	9
2.5 Resonances	12
3. Collisions Between an Electron and a Composite Target	19
3.1 Static Potential Approximation	19
3.2 Radial Equation for Elastic Scattering	21
3.3 Inelastic Scattering. The Distorted-Wave Approximation	29
3.4 Close-Coupling Method	33
3.5 Total Angular Momentum Representation	34
3.6 Two-State Approximation Within the Close-Coupling Method	36
4. Single-Channel Theory of Resonance Scattering	43
4.1 Closed-Channel Resonances. Fano's Theory	43
4.2 Resonances in the Close-Coupling Method	48
4.3 Autoionizing States of Two-Electron Systems	53
5. Diagonalization Method	57
5.1 Basic Ansatz	57
5.2 Radial Equations	63
5.3 Example: Resonances in Elastic Electron Scattering by Helium Ions	65
6. Multichannel Resonance Scattering of Electrons by Complex Atoms	73
6.1 Complex-Atom Wave Functions	73
6.2 Initial System of Equations	78
6.3 Diagonalization Method Solution	84

6.4	Elastic Electron Scattering by Ions with Zero Orbital Angular Momentum in Their Ground State	89
6.5	Resonance Excitation of $np\ ^2P^0$ and Metastable $ns\ ^2S$ States of Ions with Ground State Zero Angular Momentum	94
7.	Survey of the Experimental and Theoretical Results	100
7.1	Experimental Techniques	100
7.2	Hydrogen Atom	106
7.2.1	Elastic Scattering	106
7.2.2	Inelastic Scattering	108
7.3	Helium Atom	111
7.3.1	Elastic Scattering	111
7.3.2	Inelastic Scattering	112
7.3.3	Other Noble Gases	116
7.4	Helium Ion	116
7.5	Alkali Metal Atoms	125
7.5.1	Lithium Atom	126
7.5.2	Sodium Atom	129
7.5.3	Potassium Atom	133
7.5.4	Caesium Atom	135
7.5.5	Comments on Alkali AIS	136
7.6	Alkaline-Earth and Alkali Ions	137
7.6.1	AIS of Beryllium and Magnesium Atoms	139
7.6.2	Resonances in Elastic $e + Be^+$ and $e + Mg^+$ Scattering	151
7.6.3	Resonances in Inelastic $e + Be^+$ and $e + Mg^+$ Scattering	155
7.6.4	Electron-Alkali Ion Scattering	161
7.7	Group II Atoms	161
7.8	Polarization Effects in Scattering	169
8.	Conclusion	174
	References	177
	Subject Index	187
