

# Table of Contents

<b>1.</b>	<b>Non-linear Plasma Kinetics in Modern Physics</b>	1
1.1	Introduction	1
1.2	Controlled Fusion Research and Non-linear Plasma Physics	4
1.3	Laser Plasmas; Laser-Matter Interactions and Collective Plasma Processes	5
1.4	Powerful Relativistic Electron Beams	7
1.5	Powerful Accelerators and Collective Acceleration Methods	8
1.6	Dynamic Chaos, Self-organisation, and Turbulence	9
1.7	Vortex Turbulence and Self-organisation	12
1.8	Self-organisation in a Gas Discharge Plasma	13
1.9	Non-linear Processes in Dusty Plasmas	14
1.10	Non-linearities of the Ionospheric Plasma	15
1.11	Space Physics Research	15
1.12	Plasma Astrophysics	17
1.13	Cosmic-Ray Physics. Gravitational Fields	18
1.14	Outline of the Remainder of this Book	19
1.15	Recommended Literature	21
<b>2.</b>	<b>Collective Plasma Oscillations</b>	23
2.1	Elementary Description of Collective Plasma Oscillations	23
2.2	Some Definitions. Debye Screening	27
2.3	Number of Particles in the Debye Sphere as a Fundamental Plasma Parameter	31
2.4	Kinetic Theory of Linear Collective Plasma Oscillations	36
2.5	Kinetic Theory of Langmuir and Ion-Sound Plasma Oscillations	40
2.6	Landau Damping	47
2.7	Beam-Plasma Instability	51
	Problems	53

## VIII    Contents

<b>3. Kinetics of Random Collective Excitations.</b>		
<b>Quasi-linear Interactions</b>	.....	55
3.1 Introduction. Distribution Function for Plasma Oscillations	.....	55
3.2 Correlation Functions for Random Fields	.....	57
3.3 Energy Density of Random Oscillations	.....	61
3.4 Stimulated Vavilov-Cherenkov Emission and Landau Damping	.....	63
3.5 Quasi-linear Equation for the Particle Distribution	.....	65
3.6 Quasi-linear Relaxation of Beams in a Plasma	.....	68
3.7 Quasi-linear Description and Fluctuating Fields	.....	72
Problems	.....	74
<b>4. Fluctuations and Particle Collisions</b>	.....	75
4.1 Introduction. Averaged Distributions and Fluctuations	....	75
4.2 Fluctuations of Independent Particles	.....	79
4.3 Fluctuations of Charged Particles	.....	81
4.4 Landau-Balescu Collision Integral	.....	83
4.5 Structure of the Collision Integral. Examples	.....	86
4.6 Conservation Laws. Kinetic and Hydrodynamic Descriptions	.....	92
4.7 Probabilities for Particle Collisions in a Plasma	.....	96
Appendix: Belyaev-Budker Collision Integral	.....	104
Problems	.....	106
<b>5. General Theory of Non-linear Interactions</b>	.....	107
5.1 Classification of Interactions	.....	107
5.2 General Theory of Weak Non-linear Interactions	.....	113
5.3 Non-linear Plasma Responses	.....	119
5.4 Approximate Expressions for the Non-linear Responses for Langmuir Waves	.....	122
5.5 Approximate Expressions for the Non-linear Responses for Ion-Sound Waves	.....	125
5.6 Non-linear Changes in the Particle Distributions	.....	129
5.7 Non-linear Changes in the Particle Distributions for the Case of Random Fields	.....	134
Problems	.....	135
<b>6. Stimulated Scattering of Waves by Particles</b>	.....	137
6.1 A Simple Physical Picture of the Scattering Process	.....	137
6.2 Description of the Stimulated Scattering Processes of Waves in a Plasma. Non-linear Landau Damping	.....	142
6.3 Conservation Laws in an Elementary Scattering Process	..	146
6.4 Scattering Probabilities for Langmuir Waves	.....	150

6.5	Scattering Probabilities for Ion-Sound Waves .....	156
6.6	Transition Scattering .....	162
6.7	Change in the Particle Distribution Due to Stimulated Wave Scattering .....	165
	Appendix: Scattering Processes Involving Transverse Waves .....	169
	Problems .....	171
<b>7.</b>	<b>Plasma Turbulence .....</b>	<b>173</b>
7.1	The General Concept of Turbulence .....	173
7.2	Langmuir Turbulence .....	178
7.3	Non-linear Stabilisation of a Beam-Plasma Instability .....	184
7.4	Solar Radio Bursts .....	186
7.5	Ion-Sound Turbulence .....	187
7.6	Anomalous Plasma Resistivity .....	192
7.7	Turbulent Shock Waves and Turbulent Magnetic Reconnection .....	195
	Problems .....	198
<b>8.</b>	<b>Non-linear Decay Interactions .....</b>	<b>201</b>
8.1	General Concepts .....	201
8.2	The Balance Equation; the Conservation Laws .....	204
8.3	Probabilities of the Decay Interactions .....	206
8.4	Decay Processes and the Turbulent Spectrum .....	209
8.5	Decay Processes and Plasma Diagnostics .....	211
8.6	Scattering in a Strongly Turbulent Plasma .....	213
8.7	Decay Processes and Emission in a Turbulent Plasma. Interaction of Strong Radiation with a Plasma .....	215
	Problems .....	218
<b>9.</b>	<b>Non-linear Modulational Interactions .....</b>	<b>219</b>
9.1	Non-linear Frequency Shift and Modulational Interactions .....	219
9.2	Kinetic and Hydrodynamic Linear Instabilities .....	222
9.3	General Theory of Modulational Interactions .....	225
9.4	Averaging over the Plasma Frequency .....	229
9.5	Modulational Instability .....	231
9.6	Conservation Laws .....	235
9.7	Solitons. Self-contracting Cavitons .....	239
	Appendix: Non-linear Frequency Shifts Produced by Ion-Sound Waves .....	243
	Problems .....	244
<b>10.</b>	<b>Dissipative Structures and Strong Langmuir Turbulence .....</b>	<b>247</b>
10.1	Introduction. Self-organisation and Strong Turbulence .....	247

## X      Contents

10.2	Resonant Interactions of Strong Regular Fields with Uniformly Distributed Particles .....	250
10.3	Self-consistent Description of the Interaction Between Structures and Resonant Particles .....	253
10.4	Excitation and Damping of Structures in Beam-Plasma Interactions .....	257
10.5	Non-linear Landau Damping of Structures .....	263
10.6	Coherent Landau Damping. Arrest of the Self-contraction ..	266
10.7	Coherent Transition Damping of Cavitons .....	269
10.8	Interaction Between Structures and Random Fields .....	272
10.9	General Theory of the Interaction Between Regular and Random Fields .....	274
10.10	Interactions Between Regular Structures and Inhomogeneous Turbulence .....	276
10.11	Inhomogeneity of the Turbulence Excited by Interactions with Regular Structures .....	277
10.12	Development of Self-organisation .....	278
10.13	Some General Statements About Strong Langmuir Turbulence .....	281
10.14	Collective Laser-Plasma Interaction Processes Problems .....	282
<b>11.</b>	<b>Plasma Maser Effect and Adiabatic Invariants in Non-linear Interactions .....</b>	<b>285</b>
11.1	Introduction .....	285
11.2	Damping Due to Inhomogeneities Created by External Sources .....	289
11.3	Non-linear Permittivity in the Presence of Random Resonant Waves .....	292
11.4	Non-linear Interactions of Resonant and Non-resonant Random Waves .....	293
11.5	Adiabatic Invariants in the Interaction of Resonant and Non-resonant Waves .....	294
11.6	The Plasma Maser Effect for Weak Turbulence .....	299
11.7	The Plasma Maser Effect for Strong Turbulence .....	301
	Problems .....	305
<b>12.</b>	<b>Non-linear Interactions of Collective Oscillations and Waves with Particle Fluctuations .....</b>	<b>307</b>
12.1	Introduction .....	307
12.2	General Relations .....	309
12.3	Interactions Unconnected with Fluctuations in the Particle Distribution .....	311
12.4	Virtual Field Fluctuations .....	313

12.5	Interactions Produced by Particle Fluctuations. Contribution from Virtual Fields .....	314
12.6	Direct Interactions with Particle Fluctuations .....	315
12.7	Spontaneous Scattering Processes .....	316
	Problems .....	320
<b>13.</b>	<b>Collective Effects in Bremsstrahlung of Plasma Particles .....</b>	<b>321</b>
13.1	Introduction. Elementary Concepts of Bremsstrahlung of Colliding Particles .....	321
13.2	Qualitative Description of Collective Effects in Bremsstrahlung of Particles in a Plasma .....	324
13.3	Bremsstrahlung of Longitudinal Waves by Bare Particles ..	326
13.4	Bremsstrahlung Probabilities and Balance Equations .....	329
13.5	Bremsstrahlung Probabilities for Particles in a Plasma Including Collective Effects .....	331
13.6	Analysis of the Bremsstrahlung Cross-Sections for Particles in a Plasma .....	339
13.7	Collective Effects in Bremsstrahlung in Electron-Electron, Ion-Ion, and Electron-Ion Collisions .....	341
	Problems .....	344
<b>14.</b>	<b>Some Remarks on Plasma Non-linear Kinetics in External Magnetic Fields. Conclusion .....</b>	<b>347</b>
14.1	Summary of Problems Considered .....	347
14.2	External Magnetic Fields .....	349
14.3	Plasma Inhomogeneities .....	353
14.4	Electromagnetic Effects .....	354
14.5	Relativistic Effects .....	356
14.6	Quantum Effects .....	357
14.7	Conclusion. Acknowledgements .....	358
	Glossary .....	359
	Index .....	365
