LIST OF CONTRIBUTORS	vii
CONTENTS OF PREVIOUS VOLUMES	ix

Dissociative Recombination

J. N. Bardsley and M. A. Biondi

I. Introduction	1
II. Experimental Studies	5
III. Theory	35
IV. Recombination in the Upper Atmosphere	48
V. Conclusions	52
References	54

Analysis of the Velocity Field in Plasmas from the Doppler Broadening of Spectral Emission Lines

A. S. Kaufman

I. Introduction	60
II. Thermal Motion and Mass Motion	63
III. Classification of the Methods of Separating Thermal Motion from Commotion (Random Mass Motion)	70
IV. Separation of Thermal Motion from Commotion—The Method of Different Ionic Species	71
V. Conclusion	94
Appendix A. Electrostatic Screening in a Plasma—The Case of Thermodynamic Equilibrium	95
Appendix B. Contribution of Unresolved Commoving Elements to the Line Width	96
Appendix C. Selection of Ionic Species	97
List of Symbols	99
Note Added in Proof	99
References	100

The Rotational Excitation of Molecules by Slow Electrons

Kazuo Takayanagi and Yukikazu Itikawa

I. Introduction	105
II. General Considerations	108
III. Born Approximation	116
IV. More Accurate Calculations	130

V. Summary of Numerical Calculations	140
VI. Resonance Effects	144
VII. Effects of Molecular Vibration	148
VIII. Effects of Unpaired Electron Spin	149
Appendix Asymptotic Interaction between an Electron and a Linear Molecule	150
References	151
Note Added in Proof	153

The Diffusion of Atoms and Molecules

E. A. Mason and T. R. Marrero

I. Introduction and Historical Sketch	156
II. Phenomenological Description	160
III. Molecular Theory of Continuum Diffusion	176
IV. Diffusion in Rarefied Gases	200
V. Determination of Diffusion Coefficients	204
VI. Experimental Results	213
References	226

Theory and Application of Sturmian Functions

Manuel Rotenberg

I. Introduction	233
II. Mathematical Preliminaries	234
III. The Close-Coupling Method for Scattering in the ($e^+ - H$) and ($e^- - H$) Problems	242
IV. Application of Sturmians to the Faddeev Equations	245
V. Charge Transfer in ($H - H^+$) Collisions	255
VI. The Sturmian Functions with More Than One Potential	266
References	267

Use of Classical Mechanics in the Treatment of Collisions between Massive Systems

D. R. Bates and A. E. Kingston

I. Introduction	269
II. Fast Collisions	269
III. Slow Collisions	312
References	318

Author Index	323
Subject Index	335
