List of Contributors vii
Contents of Previous Volumes ix

Correlation in Excited States of Atoms

A. W. Weiss

I. Introduction 1
II. The Correlation Problem 4
III. Methods of Treating Correlation 9
IV. Specific Correlation Effects 19
V. Concluding Remarks 43
References 44

The Calculation of Electron–Atom Excitation Cross Sections

M. R. H. Rudge

I. Introduction 48
II. High Energy Theory 49
III. High Energy Approximations 62
IV. Low Energy Theory 93
V. Low Energy Approximations 115
VI. Concluding Remarks 121
References 122

Collision-Induced Transitions Between Rotational Levels

Takeshi Oka

I. Introduction 127
II. Theory 134
III. Experiment 160
IV. Concluding Remarks 202
References 204

The Differential Cross Section of Low Energy Electron–Atom Collisions

D. Andrick

I. Introduction 207
II. Semitheoretical Background 208
III. Experimental Techniques 215
IV. Evaluation Techniques 221
V. Experimental Results 225
References 241

Molecular Beam Electric Resonance Spectroscopy

Jens C. Zorn and Thomas C. English

I. Introduction 244
II. MBER Spectrometer Configurations 247
III. Observations of Molecular Spectra with MBER 252
IV. State Selection with Electric Fields 255
V. Experimental Methods 264
VI. Energy Levels and Transitions 280
VII. Molecular Properties of $^1\Sigma$ Molecules 285
VIII. Quadrupole hfs in $^1\Sigma$ Molecules 289
IX. Magnetic hfs in $^1\Sigma$ Molecules 294
X. Stark–Zeeman Spectroscopy of $^1\Sigma$ Molecules 296
XI. MBER Studies of Non-$^1\Sigma$ Diatomic Molecules 301
XII. MBER Studies of Polyatomic Molecules 304
XIII. MBER Studies of Vibrational State Populations 307
XIV. Miscellaneous MBER Experiments and Applications 312
References 314

Atomic and Molecular Processes in the Martian Atmosphere

Michael B. McElroy

I. Introduction 323
II. Atmospheric Composition 325
III. Photochemistry of CO_2 335
IV. Chemistry of the Ionosphere 343
V. The Martian Dayglow 348
VI. Evolution of the Martian Atmosphere 355
VII. Concluding Remarks 359
References 360
