Relativistic Effects in the Many-Electron Atom

Lloyd Armstrong, Jr. and Serge Feneuille

I. Introduction	1
II. Basic Concepts	3
III. Nonrelativistic Limits	10
IV. Effective Operators	21
V. Relativity Plus Nonrelativistic Perturbations	40
VI. Relativistic Radial Wave Functions	42
References	50

The First Born Approximation

K. L. Bell and A. E. Kingston

I. Introduction	53
II. Excitation of Atoms by Electron and Proton Impact	54
III. Ionization of Atoms by Electron and Proton Impact	87
IV. Atom-Atom and Ion-Atom Collisions	113
References	125

Photoelectron Spectroscopy

W. C. Price

I. Introduction	131
II. X-Ray Photoelectron Spectroscopy	134
III. Ultraviolet Photoelectron Spectroscopy	136
IV. Physical Aspects of Photoelectron Spectroscopy	155
V. Conclusion	169
References	170

Dye Lasers in Atomic Spectroscopy*W. Lange, J. Luther, and A. Steudel*

I. Introduction	173
II. Properties of Dye Lasers	174
III. Applications of the High Spectral Density of Dye Lasers	177
IV. Applications of Tunable Dye Lasers with Extreme Narrow Bandwidth	197
References	217

Recent Progress in the Classification of the Spectra of Highly Ionized Atoms*B. C. Fawcett*

I. Introduction	224
II. Laboratory Light Sources	225
III. Measuring and Experimental Techniques	232
IV. Theoretical Calculations	236
V. Line Classifications of Highly Ionized Systems	239
VI. Identification of Emission Lines of Highly Ionized Atoms in the Solar Spectrum	262
VII. Discussion	284
References	285

A Review of Jovian Ionospheric Chemistry*Wesley T. Huntress, Jr.*

I. Introduction	295
II. Production of Ions by Photoionization	297
III. Ion-Neutral Reactions	300
IV. Terminal-Ion Loss Processes	309
V. Ion Loss Rates	322
VI. Ionization Processes of Photoelectrons	328
VII. Additional Photon Impact Processes	334
VIII. Concluding Remarks	335
References	338
