## Collective Effects in Photoionization of Atoms

*M. Ya. Amusia*

I. Introduction	2
II. RPAE and Many-Body Perturbation Theory	4
III. Calculation of Characteristics of Photoionization	13
IV. Collective Effects near Inner-Shell Thresholds	32
V. Collectivization of Vacancies	40
VI. Conclusion	51
References	52

## Nonadiabatic Charge Transfer

*D. S. F. Crothers*

I. Introduction	55
II. Phase Integrals and Comparison Equations	63
III. Perturbed Stationary States and Electronic Translation	83
IV. Nonmolecular Three-Body Analysis	91
V. Summary	93
References	93

## Atomic Rydberg States

*Serge Feneuille and Pierre Jacquot*

I. Introduction	99
II. Preparation and Detection of Rydberg States	101
III. Spectroscopy	119
IV. Rydberg Atoms in External Fields	131
V. Radiative Properties of Rydberg States	157
References	161

**Superfluorescence**

*M. F. H. Schuurmans, Q. H. F. Vreken, D. Polder,  
and H. M. Gibbs*

I. Introduction	168
II. Semiclassical Theory	172
III. Quantum Mechanical Description of SF	176
IV. The Effect of Homogeneous and Inhomogeneous Broadening on SF	193
V. Three-Dimensional and Multimode Effects	202
VI. Experimental Techniques	206
VII. Experimental Results	213
VIII. Conclusions	222
Appendix I	223
Appendix II	223
References	226

**Applications of Resonance Ionization Spectroscopy in Atomic and Molecular Physics**

*M. G. Payne, C. H. Chen, G. S. Hurst, and G. W. Foltz*

I. Introduction	229
II. Multiphoton Excitation with Broad Bandwidth Lasers	231
III. RIS Studies of Inert Gases	239
IV. Experiments Combining RIS and Pulsed Supersonic Nozzle Jet Beams	262
References	272

**Inner-Shell Vacancy Production in Ion-Atom Collisions**

*C. D. Lin and Patrick Richard*

I. Introduction	275
II. Experimental Measurements of Inelastic Ion-Atom Collisions	277
III. Theory of Inelastic Ion-Atom Collisions	303
IV. Comparison of Theories and Experiments	326
V. Concluding Remarks	347
References	348

**Atomic Processes in the Sun**

*P. L. Dufton and A. E. Kingston*

I. Introduction	355
II. Atomic Spectra	359

## CONTENTS

vii

III. Bound-State Wave Functions	361
IV. Spontaneous Decay of Bound States	370
V. Electron Excitation	381
VI. Proton Excitation	403
VII. Applications of Atomic Data to Solar Plasmas	406
VIII. Conclusions	414
References	415
INDEX	419
CONTENTS OF PREVIOUS VOLUMES	429
