Electron Capture in Collisions of Hydrogen Atoms with Fully Stripped Ions

B. H. Bransden and R. K. Janev

I.	Introduction	2
II.	Basic Properties of the One-Electron Two-Coulomb Centers System	3
III.	The Calculation of Cross Sections by Expansion Methods Using a Molecular Orbital Basis	10
IV.	Atomic and Pseudostate Expansions	35
V.	Charge Exchange at High Velocities	48
VI.	Classical Descriptions	50
VII.	Conclusions	61
	References	62

Interactions of Simple Ion-Atom Systems

J. T. Park

I.	Introduction	67
II.	Experimental Methods	68
III.	Theoretical Methods	78
IV.	Excitation	82
V.	Electron Capture	100
VI.	Ionization	117
VII.	Elastic Scattering	123
VIII.	Conclusions	127
	References	129

High-Resolution Spectroscopy of Stored Ions*D. J. Wineland, Wayne M. Itano, and R. S. Van Dyck, Jr.*

I.	Introduction	136
II.	Ion Storage Techniques	137
III.	Lepton Spectroscopy	149
IV.	Mass Spectroscopy	159
V.	Atomic and Molecular Ion Spectroscopy	166
VI.	Negative Ion Spectroscopy	176
VII.	Radiative Lifetime Measurements	180
	References	181

Spin-Dependent Phenomena in Inelastic Electron–Atom Collisions*K. Blum and H. Kleinpoppen*

I.	Introduction	188
II.	Exchange Effects in Inelastic Collisions between Electrons and Light Atoms	189
III.	Excitation of Intermediate and Heavy Atoms: Spin Polarization and Asymmetry Studies	192
IV.	Influence of Spin-Dependent Interactions on Coherence Parameters	204
V.	Excitation of Heavy Atoms by Polarized Electrons: Stokes Parameter Analysis	225
VI.	Electron–Photon Coincidence Experiments with Polarized Electrons	236
VII.	Ionization	241
	Appendix A	259
	Appendix B	260
	References	261

The Reduced Potential Curve Method for Diatomic Molecules and Its Applications*F. Jenč*

I.	Introduction	266
II.	Methods for Construction of Potential Curves	267
III.	Reduced (Internuclear) Potential of Diatomic Molecules	271
IV.	Applications of RPC Method	294
V.	Comments on Some Misunderstandings about the RPC Method	302
VI.	Conclusions	305
	References	306

The Vibrational Excitation of Molecules by Electron Impact*D. G. Thompson*

I. Introduction	309
II. Theoretical Considerations	311
III. Applications and Comparison with Experiment	323
References	340

Vibrational and Rotational Excitation in Molecular Collisions*Manfred Faubel*

I. Introduction	345
II. Theoretical Methods	347
III. Experimental Techniques	354
IV. Studies of Rotational Scattering Cross Sections	362
V. Studies of Vibrational Excitation	380
VI. Summary of Detailed Scattering Experiments and Concluding Remarks	385
References	389

Spin Polarization of Atomic and Molecular Photoelectrons*N. A. Cherepkov*

I. Introduction	395
II. Theory of Spin Polarization Phenomena in Atoms	397
III. Comparison with Experiment and Applications	416
IV. Spin Polarization of Molecular Photoelectrons	434
V. Conclusion	442
References	443
