Ion-Ion Recombination in an Ambient Gas

D. R. Bates

I.	Introduction	1
II.	Ter-Molecular Recombination	2
III.	Inclusion of Mutual Neutralization Channel	21
IV.	Neutral-Neutral Channel	29
V.	Recombination in the Earth's Troposphere and Lower Stratosphere	33
VI.	Appendix	37
	References	37

Atomic Charges within Molecules

G. G. Hall

I.	Prologue	41
II.	Properties	42
III.	Population	45
IV.	Partitioning	53
V.	Point Charges	57
VI.	Purport and Prospect	60
	References	62

Experimental Studies on Cluster Ions

T. D. Märk and A. W. Castleman, Jr.

I.	Introduction	66
II.	Experimental	68
III.	Formation of Cluster Ions	81
IV.	Dissociation of Cluster Ions	102
V.	Thermochemical Properties	116

VI. Other Properties	136
References	142
 Nuclear Reaction Effects on Atomic Inner-Shell Ionization	
<i>W. E. Meyerhof and J.-F. Chemin</i>	
I. Introduction	173
II. Survey of Nuclear Reactions	176
III. Survey of Atomic Inner-Shell Ionization	182
IV. United-Atom Effects of Nuclear Reactions	189
V. Separated-Atom Effects of Nuclear Reactions	208
VI. Summary	226
VII. Appendix A: Sketch of the Statistical Theory of Nuclear Reactions	228
VIII. Appendix B: <i>K</i> X-Ray Emission in Second-Order Distorted Wave Approximation	231
References	234
 Numerical Calculations on Electron-Impact Ionization	
<i>Christopher Bottcher</i>	
I. Introduction	241
II. The Wave Packet Method	246
III. Box-Normalized Eigenstates	260
IV. Conclusions	265
References	265
 Electron and Ion Mobilities	
<i>Gordon R. Freeman and David A. Armstrong</i>	
I. Introduction	267
II. Electrons	270
III. Ions	296
References	320
 On the Problem of Extreme UV and X-Ray Lasers	
<i>I. I. Sobel'man and A. V. Vinogradov</i>	
I. Introduction	327
II. Preliminary Considerations	328
III. Inversion Schemes for Multicharged Plasma	333
IV. Conclusion	342
References	343

Radiative Properties of Rydberg States in Resonant Cavities*S. Haroche and J. M. Raimond*

I.	Radiative Properties of Rydberg States in Free Space	350
II.	Brief Survey of Experimental Techniques	358
III.	Single Rydberg Atom in a Resonant Cavity	363
IV.	Collective Behavior of N Rydberg Atoms in a Resonant Cavity	383
V.	Conclusion and Perspectives	408
	References	409

Rydberg Atoms: High-Resolution Spectroscopy and Radiation Interaction—Rydberg Molecules*J. A. C. Gallas, G. Leuchs, H. Walther, and H. Figger*

I.	Introduction	414
II.	General Properties of Rydberg Atoms	416
III.	Excitation and Detection of Rydberg States	419
IV.	Methods of High-Resolution Spectroscopy of Rydberg States	421
V.	Results of High-Resolution Spectroscopy of Rydberg States	427
VI.	Interaction of Rydberg Atoms with Blackbody Radiation	435
VII.	Radiation Interaction of Rydberg Atoms—a Test System for Simple Quantum Electrodynamical Effects	440
VIII.	Rydberg States of Molecules	450
IX.	Rydberg Molecules	457
	References	460
