Subnatural Linewidths in Atomic Spectroscopy

Dennis P. O'Brien, Pierre Meystre, and Herbert Walther

I.	Introduction	1
II.	Summary of Improvements of Spectroscopic Resolution	2
III.	"Fundamental" Ways to Overcome the Natural Linewidth	10
IV.	Time-Biased Coherent Spectroscopy	25
V.	Conclusion	45
	References	47

Molecular Applications of Quantum Defect Theory

Chris H. Greene and Ch. Jungen

I.	Introduction	51
II.	Quantum Defect Concepts and Formalism	54
III.	Rovibrational Channel Interactions	66
IV.	Electronic Interactions at Short Range	97
V.	Discussion and Conclusions	115
	References	118

Theory of Dielectronic Recombination

Yukap Hahn

I.	Introduction	124
II.	Electron-Ion Collision Theory	128
III.	The Dielectronic Recombination Cross Sections	146
IV.	The Dielectronic Recombination Rate Coefficients	157
V.	Discussion and Summary	171
	Appendix A: Radiative Widths and Coupled Equations	178
	Appendix B: Auger Probabilities A_a in LS Coupling	180
	Appendix C: Radiative Probabilities A_r in LS Coupling	184

Appendix D: Scaling Properties of A_a , A_r , ω , and α^{DR}	185
Appendix E: Extrapolation to High Rydberg States	189
References	194
Recent Developments in Semiclassical Floquet Theories for Intense-Field Multiphoton Processes	
<i>Shih-I Chu</i>	
I. Introduction	197
II. The Floquet Theory and General Properties of Quasi-Energy States	199
III. Computational Methods for Multiphoton Excitation of Finite-Level Systems	208
IV. Non-Hermitian Floquet Theory for Multiphoton Ionization and Dissociation	226
V. Many-Mode Floquet Theory	239
VI. Conclusion	248
References	249
Scattering in Strong Magnetic Fields	
<i>M. R. C. McDowell and M. Zaccaro</i>	
I. Introduction	255
II. Center-of-Mass Separation	258
III. Potential Scattering	261
IV. Ensembles of Landau Levels	277
V. The Low-Field Limit of the Cross Section	281
VI. Photoionization	285
VII. Photodetachment of Negative Ions	293
VIII. Charge Exchange	297
References	303
Pressure Ionization, Resonances, and the Continuity of Bound and Free States	
<i>R. M. More</i>	
I. Introduction	306
II. Continuity of Pressure Ionization	318
III. Resonances	324
IV. Applications	333
V. Conclusions	346
Appendix A: Properties of the Jost Function	347
Appendix B: Green's Function	348
Appendix C: Electron Density of States	349

CONTENTS

vii

Appendix D: Resonance Perturbation Theory	351
Appendix E: Convergence for the δ -Potential Model	352
References	354
