The Selected Ion Flow Tube (SIFT): Studies of Ion-Neutral Reactions

D. Smith and N. G. Adams

I. Introduction	1
II. Principles and Experimental Aspects of the SIFT Technique	3
III. SIFT Studies of Ion-Neutral Reactions: Some Illustrative Results	23
IV. The Variable-Temperature Selected Ion Flow Drift Tube, VT-SIFDT	33
V. VT-SIFDT Studies: Some Illustrative Results	39
VI. Concluding Remarks	44
References	46

Near-Threshold Electron-Molecule Scattering

Michael A. Morrison

I. Introduction and Overview	52
II. Basic Quantum Mechanics of Low-Energy Electron-Molecule Scattering	56
III. Approximate Collision Theories and Their Woes near Threshold	75
IV. The Behavior of Near-Threshold Cross Sections—Explained	88
V. Beyond the Born-Oppenheimer Approximation: Special Methods for Near-Threshold Scattering	115
VI. Variations on an Enigma: Threshold Structures in Vibrational Excitation Cross Sections	131
VII. Conclusions and Conundrums	143
Acknowledgments	144
Appendix A: Notation and Nomenclature	144
Appendix B: Recent Reviews of Electron-Molecule Scattering	150
References	151

Angular Correlation in Multiphoton Ionization of Atoms

S. J. Smith and G. Leuchs

I. Introduction	157
II. Theory of Photoelectron Angular Distributions	161
III. Experimental Methods	174
IV. Applications to Atomic Structure and Dynamics	183
V. Conclusions	216
Acknowledgments	217
References	218

Optical Pumping and Spin Exchange in Gas Cells

R. J. Knize, Z. Wu, and W. Happer

I. Introduction	224
II. Optical Pumping	224
III. Description of Spin-Polarized Atoms in Optical Pumping Experiments	229
IV. Detection of Polarized Atoms	
V. Spin-Transfer Collisions	238
VI. Relaxation	243
VII. Frequency Shifts	254
VIII. Applications	257
References	265

Correlations in Electron-Atom Scattering

A. Crowe

I. Introduction	269
II. Excitation	270
III. Ionization	292
Acknowledgments	317
References	317
