Differential Cross Sections for Excitation of Helium Atoms and Heliumlike Ions by Electron Impact

Shinobu Nakazaki

I.	Introduction	1
II.	Theory	3
III.	Excitation of Helium Atoms	14
IV.	Excitation of Heliumlike Ions	33
V.	Concluding Remarks	40
	Acknowledgments	41
	References	41

Cross-Section Measurements for Electron Impact on Excited Atomic Species

S. Trajmar and J. C. Nickel

I.	Introduction	45
II.	General Remarks	47
III.	Production of Excited Species	48
IV.	Detection of Excited Species	60
V.	Cross-Section Measurements	66
	Acknowledgments	98
	References	99

The Dissociative Ionization of Simple Molecules by Fast Ions

Colin J. Latimer

I.	Introduction	105
II.	The Dissociative Ionization Process	107
III.	Energy Distributions of Fragment Ions	112
IV.	Energy Distributions of Fragment Ion Pairs: Coulomb Explosions	121
V.	Angular Distributions of Fragment Ions: Orientated Molecules	129
VI.	Partial Dissociative Ionization Cross Sections	132
	References	136

Theory of Collisions Between Laser Cooled Atoms*P. S. Julienne, A. M. Smith and K. Burnett*

I.	Introduction	141
II.	Cold Collisions in the Absence of Light	143
III.	Cold Collisions in a Light Field	157
	Acknowledgments	195
	References	195

Light Induced Drift*E. R. Eliel*

I.	Introduction	199
II.	Gas Kinetic Effects of Light	208
III.	Models for the Drift Velocity	213
IV.	Techniques for Measuring the Drift Velocity	234
V.	Drift Velocities for Na	244
VI.	Light Induced Drift in Astrophysics	267
VII.	Other Light Induced Kinetic Effects	279
VIII.	Conclusions	280
	Acknowledgments	281
	References	281

Continuum Distorted Wave Methods in Ion-Atom Collisions*Derrick S. F. Crothers and Louis J. Dubé*

I.	Introduction and Overview	287
II.	Notation	290
III.	Time-Dependent Impact Parameter Formalism	296
IV.	Time-Independent Wave Formalism	314
V.	Conclusions and Future Perspectives	321
	Acknowledgments	323
	Appendix A: Recent Reviews of Ion-Atom Scattering	323
	Appendix B: Subject Oriented Index	324
	References	329
