

Contents

Preface	v
1 Introduction to the Theory of Electron Scattering from Atoms and Molecules	1
2 A Survey of Theoretical Methods for Obtaining Atomic and Molecular Wave Functions	61
3 The Measurement of Charge Densities in Atoms	80
4 The Measurement of Charge Densities in Molecules	108
5 Electron Scattering and Momentum Densities	149
6 High-Energy Electron-Impact Spectroscopy	186
7 Electron Beam Sources	216
8 Velocity Analyzers	232
9 Electron Detection Devices	256
10 Atomic and Molecular Jets and Corrections for Deviations from the Single Scattering Theory	272
11 High-Precision Electron-Diffraction Units for Gaseous Targets	291
Index	303
