<b>1</b>	<b>Electronic and Vibrational Energy Transfer in Gas Phase Systems</b>	
1.1	Introduction . . . . .	1
1.2	Energy transfer in atomic systems . . . . .	2
1.2.1	The quenching of the ( $6^3P_1$ ) and ( $6^3P_0$ ) states of mercury . . . . .	2
1.2.2	Electronic-vibration and electronic-translation energy transfer . . . . .	4
1.2.3	Electronic-electronic energy transfer . . . . .	16
1.3	Electronic and vibronic energy transfer from diatomic molecules . . . . .	21
1.4	Electronic and vibronic energy transfer from polyatomic molecules . . . . .	24
1.4.1	Aromatic excitation transfer . . . . .	25
1.4.2	Sensitization by transfer from excited states of other compounds . . . . .	38
1.4.3	Mechanisms for electronic relaxation of polyatomic molecules . . . . .	39
1.4.4	The lifetime of the triplet states of aromatic hydrocarbons in the gas phase . . . . .	43
1.4.5	Theories of bimolecular energy transfer . . . . .	46
1.4.6	Internal conversion between states . . . . .	47
1.4.7	Excited state stabilization . . . . .	48
1.5	Other energy transfer systems . . . . .	54
	References . . . . .	56
<b>2</b>	<b>Thermal Population of Excited Electronic States—Excitation and Emission in Shock Waves</b>	
2.1	Introduction . . . . .	64
2.2	Excitation of atomic species . . . . .	69
2.3	Excitation of molecular species . . . . .	77
2.4	Excitation of solid particles . . . . .	90
	References . . . . .	91

<b>3</b>	<b>Chemistry of Electronically Excited States of Organic Molecules</b>	
3.1	Introduction . . . . .	94
3.2	Production of electronically excited states . . . . .	95
3.2.1	Thermal excitation . . . . .	95
3.2.2	Chemical production . . . . .	96
3.2.3	Electrical discharge . . . . .	97
3.2.4	Excitation with ionizing radiation . . . . .	97
3.2.5	Excitation by absorption of ultraviolet and visible light . . . . .	97
3.3	Description of electronically excited states of organic compounds . . . . .	100
3.3.1	Singlet and triplet states . . . . .	100
3.3.2	Spin-orbit coupling . . . . .	101
3.3.3	Molecular orbital configurations . . . . .	103
3.4	Radiative and non-radiative transitions in organic molecules . . . . .	103
3.4.1	Singlet-singlet absorption . . . . .	104
3.4.2	Triplet-triplet absorption . . . . .	105
3.4.3	Singlet-triplet absorption . . . . .	106
3.4.4	Internal conversion . . . . .	106
3.4.5	Fluorescence . . . . .	107
3.4.6	Intersystem crossing . . . . .	110
3.4.7	Phosphorescence . . . . .	113
3.5	Properties of electronically excited states . . . . .	114
3.5.1	Excited state dipole moments . . . . .	114
3.5.2	Acidity constants of excited states . . . . .	120
3.5.3	Electronic energy transfer . . . . .	127
3.5.4	Quenching of excited states . . . . .	137
3.5.5	Photochemical reactions . . . . .	145
	References . . . . .	157
<b>4</b>	<b>Energy Transfer in Radiation Chemistry</b>	
4.1	Introduction . . . . .	161
4.2	Energy transfer from the incident charged particle . . . . .	162
4.2.1	Preliminary remarks . . . . .	162
4.2.2	Theory of stopping power . . . . .	163
4.2.3	Further consequences of stopping-power theory . . . . .	172
4.2.4	Geometrical effects in energy transfer from the incident particle . . . . .	177

## Contents

xv

4.3	Theoretical concepts of energy flow in tracks . . . . .	180
4.3.1	Some general notions . . . . .	180
4.3.2	The time scale of events . . . . .	182
4.3.3	Fate of electronic excitations . . . . .	184
4.3.4	Flow of low-grade heat . . . . .	186
4.4	Migration of electronic energy: special effects in tracks . . . . .	187
4.4.1	General nature of the energy transfer problem . . . . .	187
4.4.2	Excitation migration . . . . .	190
4.4.3	Charge migration . . . . .	195
4.4.4	General comment on electronic energy transfer . . . . .	196
4.5	Energy transfer to scintillators . . . . .	197
4.5.1	Real cases . . . . .	197
4.5.2	Energy transfer processes in scintillator systems . . . . .	199
4.6	Energy transfer effects in chemical yields . . . . .	209
4.6.1	Evidence for processes requiring energy transfer . . . . .	210
4.6.2	Extended energy transfer . . . . .	211
4.7	Conclusion . . . . .	213
	References . . . . .	214
