
CONTENTS

<i>Preface</i>	v
1. Principles	
1-1 Optics of Neutrons and Electromagnetic Waves....	1
1-2 Coherence Effects in Neutron Scattering.....	7
1-3 Index of Refraction.....	17
1-4 Diffraction.....	26
2. Experimental Methods	
2-1 Neutron Sources.....	32
2-2 Production of Monoenergetic Neutrons.....	36
2-3 Small Angle Scattering.....	41
2-4 Refraction and Reflection.....	44
2-5 Diffraction Techniques.....	48
3. Measurement of Nuclear Interactions	
3-1 Direct Measurements of Coherent Cross Sections..	55
3-2 Determination of Coherent Cross Sections from Free Atom Cross Sections.....	59
3-3 Neutron-Proton Scattering.....	66
3-4 Neutron-Electron Interaction.....	76
4. Measurement of Crystal Lattice Structures	
4-1 Location of Hydrogen Atoms.....	85
4-2 Analysis of Crystals not Containing Hydrogen....	89
4-3 Further Structure Applications of Neutron Diffraction.....	92
4-4 Lattice Vibrations.....	95
5. Magnetic Scattering	
5-1 Principles of Magnetic Scattering.....	104
5-2 Verification of Magnetic Scattering Theory.....	111
5-3 Analysis of Ferromagnetic and Antiferromagnetic Crystals.....	116
5-4 Paramagnetism.....	121
5-5 Polarized Neutrons.....	125
