

CONTENTS

<i>Chapter 1</i>	
Introduction	1
<i>Chapter 2</i>	
Heavy Particle Collisions	4
2.1 Phenomena	4
2.2 Cross Section Measurements	7
2.3 Differential Cross Section Measurements	9
2.4 Total Cross Section Measurements	10
2.5 The Intermediate Case: Cross Sections That Are Neither Total nor Differential	11
<i>Chapter 3</i>	
Experimental Methods	12
3.1 Beam-Gas Configuration	12
3.2 Projectile Molecule Dissociation Measurements	15
3.3 Target Molecule Dissociation Measurements	23
3.4 Crossed-Beam Dissociation Measurements	25
<i>Chapter 4</i>	
Experimental Data Index	26
<i>Chapter 5</i>	
Evaluation Criteria for Measurements	100
5.1 Significance of Criteria	100
5.2 Beam Specification	101
5.2.1 Atomic or Molecular Constituents	101
5.2.2 Kinetic Energy of Constituents	103
5.2.3 Internal Energy of Constituents	103

5.2.4	<i>Beam Contamination</i>	107
5.2.5	<i>Measurement of Particle Flux</i>	108
5.2.6	<i>Beam Particle Blockage</i>	109
5.2.7	<i>Influence of Secondary Collisions</i>	110
5.2.8	<i>Angular Divergence and Density Profile</i>	111
5.2.9	<i>Spontaneous Dissociation</i>	111
5.3	Gas Target Specification	112
5.3.1	<i>Number Density</i>	112
5.3.2	<i>Number Density Profile</i>	113
5.3.3	<i>Contamination</i>	114
5.3.4	<i>Thermal Effects</i>	114
5.3.5	<i>Influence of Secondary Collisions</i>	117
5.4	Product Specification	117
5.4.1	<i>Atomic and Molecular Species Identification</i>	117
5.4.2	<i>Emission Angle and Kinetic Energy Discrimination</i>	118
5.4.3	<i>Detector Efficiency</i>	118
5.4.4	<i>Secondary Collision Effects</i>	119
5.4.5	<i>Stray Field Effects</i>	119
5.4.6	<i>Spontaneous Dissociation</i>	120
<i>Chapter 6</i>		
Qualitative Conclusions Based on Experimental Data		121
6.1	General Conclusions	121
6.2	Ion Source Effects	122
6.3	Dissociation Fragment Energy and Angle Distributions	125
6.4	Fragmentation Mode Studies	128
6.5	General Phenomenology	129
6.6	Structure of Cross Section versus Energy Curves	130
<i>Chapter 7</i>		
Theory of Dissociative Collisions Between Heavy Particles		132
7.1	Introduction	132
7.2	Notation	134
7.3	Theoretical Techniques	137
7.4	Literature Survey	151
7.5	Discussion	166
7.5.1	H_2^+ — <i>Structureless Charged Particle Collisions</i>	166
7.5.2	H_2^+ — <i>Neutral Particle Collisions</i>	168

CONTENTS

xi

7.5.3	<i>Angular and Velocity Distribution of H₂⁺ Dissociation Fragments</i>	171
7.6	Concluding Remarks	174
	<i>Appendix I</i>	
	Information Obtained Through Author Correspondence	175
	References	189
	Index	197
