

CONTENTS

I.	BASIC PRINCIPLES OF THE THEORY OF IONIZATION	1
§1.	<i>Boundary Conditions</i>	1
§2.	<i>Relationship Between the Ionization Amplitudes</i>	5
§3.	<i>Effective Ionization Cross Section</i>	11
§4.	<i>Flux Conservation in Ionization</i>	18
§5.	<i>Structure of the Wave Function</i>	23
II.	ASYMPTOTIC EXPANSION OF THE WAVE FUNCTION FOR A SYSTEM OF CHARGED PARTICLES	31
§6.	<i>Asymptotic Expansion of the Wave Function for the Ionization of Hydrogen by an Electron</i>	31
§7.	<i>The Asymptotic Expansion in the General Case</i>	39
§8.	<i>Transformations of the Asymptotic Series</i>	45
§9.	<i>Various Forms for the Logarithmic Part of the Phase</i>	50
§10.	<i>Validity of the Asymptotic Forms</i>	59
§11.	<i>Asymptotic Behavior for Finite r_{12} and Nonspherical Asymptotic Forms</i>	63
III.	THE METHOD OF K HARMONICS IN THE IONIZATION PROBLEM	73
§12.	<i>The Method of K Harmonics</i>	73
§13.	<i>Asymptotic Form for the Expansion in K Harmonics</i>	78
§14.	<i>Model Calculation</i>	86
IV.	MULTIDIMENSIONAL COULOMB WAVE FUNCTIONS	103
§15.	<i>Plane Wave in Multidimensional Space</i>	103
§16.	<i>Multidimensional Coulomb Wave Functions</i>	108

V.	INTEGRAL REPRESENTATIONS OF THE IONIZATION AMPLITUDE	123
§17.	<i>Derivation of the Integral Representation</i>	123
§18.	<i>The Limit $E \rightarrow 0$ in the Integral Representation</i>	129
§19.	<i>Method of Complex Energies</i>	134
§20.	<i>Variational Principle in the Ionization Problem</i>	136
VI.	ELECTRON EXCHANGE IN IONIZATION	141
§21.	<i>Phase Shift of the Scattered-Electron Wave Function</i>	141
§22.	<i>Exchange Effects in Ionization of Hydrogen</i>	145
§23.	<i>Allowance for Exchange in the Ionization of the Helium Atom</i>	149
VII.	THRESHOLD BEHAVIOR OF THE IONIZATION CROSS SECTION	161
§24.	<i>Threshold Behavior of the Ionization Cross Section in Classical Mechanics</i>	161
§25.	<i>Semiclassical Approximation in the Multidimensional Case</i>	175
§26.	<i>Semiclassical Expressions for Multidimensional Coulomb Wave Functions</i>	183
§27.	<i>Semiclassical Approximation in Low-Energy Ionization</i>	194
§28.	<i>Experimental Results on the Threshold Behavior of the Ionization Cross Section</i>	209
VIII.	APPROXIMATE METHODS OF CALCULATING THE EFFECTIVE IONIZATION CROSS SECTION	215
§29.	<i>The Classical Binary-Encounter Approximation</i>	215
§30.	<i>Quantum-Mechanical Approximations</i>	225
