

## CONTENTS

Invariance and Symmetry Principles .....	1
G. Feinberg	
Quantum Electrodynamics: Experiment .....	15
Vernon W. Hughes	
Quantum Electrodynamics: Theory .....	53
S. D. Drell	
Precise Schrodinger Wave Functions for Two Electron Atoms .	71
Charles Schwartz	
Coherence .....	81
Marlan O. Scully	
The Variability of Atomic Constants .....	103
R. H. Dicke	
Many Body Theory of Atomic Structure .....	111
Keith A. Brueckner	
Atomic Structure, Transition Probabilities, and Theory of Electron Correlation in Ground and Excited States .....	131
Oktay Sinanoglu	
Radiative Transitions .....	161
A. Dalgarno	
Symmetry Properties of Atomic Structure .....	199
B. R. Judd	

Doubly Excited States of Atoms .....	209
U. Fano	
Double Resonance and Level-Crossing Spectroscopy .....	227
Gisbert zu Putlitz	
Theory of Electron Atom Collisions .....	265
P. G. Burke	
Electron Collisions with Positive Ions .....	295
M. J. Seaton	
Resonances in Electron-Atom Collisions .....	321
G. J. Schulz	
Rearrangement Collisions .....	333
Kenneth M. Watson	
Heavy Particle Collisions .....	353
Felix T. Smith	
Collisions of Light with Atoms .....	377
P. A. Franken	
Polarized Electrons .....	389
Wilhelm Raith	
Colliding Beams .....	417
Gordon H. Dunn	
Laser Sources .....	435
W. R. Bennett, Jr.	
rf-Spectroscopy of Stored Ions .....	475
H. G. Dehmelt	
Low Density Astrophysics: HI Regions .....	487
George B. Field	
Low Density Astrophysics: H <sup>+</sup> Regions and the Solar Corona .	501
M. J. Seaton	
Magnetic Hyperfine Anomalies .....	509
H. M. Foley	
Hyperfine Structure .....	523
H. H. Stroke	
Mesic Atoms .....	551
V. L. Telegdi	

CONTENTS

xiii

List of Participants .....	581
List of Contributed Papers .....	589
Subject Index.....	595
Index of Atomic Species .....	599
Author Index .....	601
