

CONTENTS

Part I. ATOMS AND LASERS

Theory of atomic structure and transition probabilities (IAEA-SMR-12/21)	3
S. Feneuille	
Theory of atomic structures, transitions, and molecular potential curves with electron correlation in ground and excited states (IAEA-SMR-12/52)	57
O. Sinanoğlu	
Observed structure of atomic spectra (IAEA-SMR-12/4, 5)	93
B. Edlén	
Line width and line broadening (IAEA-SMR-12/12)	133
W.R. Hindmarsh	
Radiofrequency spectroscopy (IAEA-SMR-12/9)	175
A. Kastler	
Nuclear effects in atomic spectra (IAEA-SMR-12/7)	213
J. Bauche	
Highly excited atoms (IAEA-SMR-12/45)	241
I.C. Percival	
Astrophysical applications of atomic physics (IAEA-SMR-12/44, 46, 48)	261
M.J. Seaton	
Laser theory (IAEA-SMR-12/32, 35)	283
H. Haken	
Lasers: experimental and applications (IAEA-SMR-12/31, 32)	315
D.J. Bradley	

Part II. MOLECULES

Foundation of the theory of diatomic molecules (IAEA-SMR-12/11)	377
I. Kovács	
Perturbations in the spectra of diatomic molecules (IAEA-SMR-12/42)	411
Hélène Lefebvre-Brion	
Multiplet structure of spectra of diatomic molecules (IAEA-SMR-12/30, 37)	449
L. Klynning	

Part III. COLLISIONS

Atomic collision theory (IAEA-SMR-12/14)	471
B.L. Moiseiwitsch	

Analysis of electron-atom scattering and photoionization processes (IAEA-SMR-12/17, 19)	525
P.G. Burke	
Collisions between electrons and molecules (IAEA-SMR-12/26, 27)	567
F.H. Read	
Heavy-particle collision (IAEA-SMR-12/40, 41)	619
R. McCarroll	
Photionization (IAEA-SMR-12/50)	679
M. Gavrilă	
Faculty and participants	703
