

CONTENTS

Foreword (C. Troyanowsky)	VII
Avant-propos (C. Troyanowsky)	IX
Introduction (L. Néel)	XI
Acknowledgements	XV
List of participants	XVII
Nonlinear optical response of atoms, ions and molecules: a survey (N. Bloembergen)	1
Cooperative effects in radiation-matter interaction and transition phenomena in quantum optics (F.T. Arecchi)	21
Optical dephasing in molecular iodine (R.G. Brewer and S.S. Kano)	45
Towards an understanding of infrared multiphoton absorption and dissociation (K.L. Kompa, W. Fuss, D. Proch, W.E. Schmid, S.D. Smith and H. Schröder)	55
Present thinking on infrared multiple-photon excitation (C.P. Robinson)	65
Dissociation of polyatomic molecules by two infrared laser pulses (R.V. Ambartsumian, I.N. Knyazev, V.V. Lobko, G.N. Makarov and A.A. Puretzky)	79
Two-photon spectroscopy and multi-photon ionization of polyatomic molecules (H.J. Neusser)	97
Second harmonic generation of laser beam in electrically polarized atomic and molecular fluid mixtures (S. Kielich)	111
Spectroscopy and induced molecular heating by four wave mixing in SF ₆ , MoF ₆ , UF ₆ , WF ₆ , CCl ₄ (J. Cahen, M. Clerc, P. Isnard, P. Rigny and J.M. Weulersse)	127
Analysis of reactive media by coherent Anti-Stokes Raman scattering (J.-P.E. Taran)	141
Hyper Rayleigh and hyper Raman spectroscopy (D.A. Long)	153
Analyse des contributions à l'effet Kerr des verres optiques par l'étude de sa dépendance en température (M. Paillette)	165
The separation of short-range and long-range dipole correlations in the Kerr effect and in electrically induced NMR line splitting (P. Bordewijk)	177
Trends in the optical nonlinearities of conjugated molecules and polymers (C. Flytzanis)	185
Hyperpolarizability of some organic compounds in relation with their molecular structure (D. Chemla, J.L. Oudar and J. Jerphagnon)	209
Hyperpolarizability (A.D. Buckingham)	217
Hyperpolarisabilities of halogenated methane molecules: a critical survey (B.J. Orr)	227
Electronic properties of molecules from studies in gases and liquids (M.R. Battaglia) .	237
Light absorption and light scattering in the field of the electrochemical double layer (W.J. Plieth)	251
Influences of high electric fields on surface reactions of sulfur on metals, investigated by field desorption (G. Abend, R.-G. Abitz and J.H. Block)	261
Mesures par spectroscopie optique sous champ électrique des moments dipolaires et des polarisabilités des états excités de molécules en phase cristalline (J.P. Galaup et H.P. Trommsdorff)	277
Electrochromism of organic dyes at high fields (P. van Pelt and E.E. Havinga)	291

Aspects of electric and magnetic field interaction with molecules in liquid phases (M. Davies)	301
Nonlinear electric permittivity as a tool for investigating structure and interaction (A.H. Piekara)	321
Non-linear dielectric properties of liquid mixtures near a consolute critical point (J. Goulon, D. Oxtoby, J.M. Thiebaut and J.L. Greffe)	343
The nonlinear dielectric effect and chemical relaxation: a happy marriage (M. de Maeeyer, R. Nackaerts, R. Ooms and L. Hellemans)	355
Dependence of the field dissociation effect on electric field strength (T. Honda, J. Everaert and A. Persoons)	369
The dynamics of nonlinear processes in electrolytic resistances at high electric fields (K. Clinkspeer, J. Everaert and A. Persoons)	381
Nonlinear electrical properties (G.R. Olhoeft)	395
Recent investigations of the influence of dipole-dipole coupling on dielectric and Kerr effect relaxation (W.T. Coffey and A. Morita)	411
Nonlinear electric polarizabilities of dipolar molecules determined from the time- evolution of dielectric saturation (J. Buchert)	423
Magnétisme sous champs magnétiques intenses (R. Pauthenet)	439
Comportement de solutions aqueuses de micelles en présence d'un champ mag- nétique intense (G. Porte et Y. Poggi)	457
Fluctuations d'orientation moléculaire au voisinage des points d'ordre nématique- isotrope et smectique a-nématique (Y. Poggi, J.C. Filippini et B. Malraison)	467
Polyelectrolytes in high magnetic fields (G. Maret, J. Torbet, E. Senechal, A. Domard, M. Rinaudo and H. Milas)	477
Propriétés magnétiques et magnétooptiques des ions de terres rares trivaux couplés par échange dans un grenat ferrimagnétique (P. Feldmann, H. Le Gall et M. Guillot)	487
Utilisation des champs magnétiques intenses pour la caractérisation et la détermi- nation des propriétés électroniques des semiconducteurs (R.L. Aulombard, C. Bernard, C. Bousquet, A. Raymond et J.L. Robert)	497
High magnetic field anticrossing spectroscopy (R. Jost and M. Lombardi)	509
