PREFACE	Page v
-------------------	-----------

SECTION I

SLOW ELECTRON SCATTERING BY ATOMS

MASSEY, H. S. W.: The present state of the study of atomic collisions	3
SLOAN, I. H. and H. S. W. MASSEY: The exchange polarisation approximation for the elastic scattering of slow electrons and positrons by atoms and ions: Electron scattering by helium ions	14
BAUER, E. and H. N. BROWNE: Elastic scattering of electrons by the many-electron atom	16
TIETZ, T.: Elastic scattering of low energy electrons in the Thomas-Fermi theory	28
GÁSPÁR, R.: Pseudopotentials in the theory of electron scattering	31
WALKER, J. F. and M. BOLSTERLI: Treatment of exchange in scattering of electrons by hydrogen atoms	35
BELL, K. L., B. L. MOISEWITSCH and D. B. SHIELDS: Rearrangement collisions: Elastic scattering of electrons by helium atoms	40
KHARE, S. P. and B. L. MOISEWITSCH: The effect of polarization on the angular distribution of electrons scattered by atoms	49
ABERTH, W., G. SUNSHINE and B. BEDERSON: Absolute measurement of total cross sections for the scattering of low energy electrons by argon, nitrogen and oxygen	53
MEYERAND, JR., R. G. and R. K. FLAVIN: Measurement of the elastic collision cross section of low energy electrons with cesium atoms using electron-cyclotron resonance	59
PORTEUS, J. O.: Low-energy electron scattering by many-electron atoms	72
MALIK, F. B.: The application of the variational method to the elastic scattering of electrons by hydrogen atom	80

SECTION II

RESONANCES

BURKE, P. G. and K. SMITH: Resonances and Regge poles in e^- -H scattering	89
HERZENBERG, A., K. L. KWOK and F. MANDL: The theory of the narrow resonances in the scattering of electrons by hydrogen	98
TEMKIN, A.: Structure of electron-hydrogen resonances just below the inelastic threshold	107
MARRIOTT, R.: The excitation of helium by electron impact	114
SCHULZ, G. J.: Resonances in the elastic scattering of electrons on atoms and molecules	124
SIMPSON, J. A.: Anomalous transmission of rare gases for electrons of sub-excitation energies	128

SECTION III

POLARISATION OF RADIATION EMITTED ON
ELECTRON IMPACT

HEDDLE, D. W. O. and M. J. SEATON, The excitation and ionization of atoms by electron impact	137
JOHN, R. M., ST. and C. C. LIN: Absolute electron excitation functions of helium and their pressure dependence	163
McFARLAND, R. H.: The cause of the observed polarization of electron-induced radiation from helium	169
HEDDLE, D. W. O. and R. G. KEESING: Excitation and polarization in helium.	179
EISSNER, W.: Calculations for excitation of the M shell of H near the threshold	183
KUYATT, C. E. and J. A. SIMPSON: Inelastic electron scattering from rare gases; determination of oscillator strengths in the continuum	191
FELDMAN, P. and R. NOVICK: Observations on the $(1s2s2p)^4P_{3/2}$ metastable state in lithium	201

SECTION IV

EXCITATION AND IONISATION OF ATOMS
BY ELECTRON IMPACT

CZYZAK, S. J. and T. K. KRUEGER: On the calculation of electron excitation cross sections for forbidden lines occurring in gaseous nebulae	213
GRYZIŃSKI, M.: Further development of classical theory of atomic collisions	226
BURGESS, A.: The semi-classical treatment of the excitation and ionization of atoms and positive ions by electron impact	237
PRESNYAKOV, L., I. SOBELMAN and L. VAINSHTEIN, On one model for the calculation of excitation cross sections for atoms	243
VELDRE, V., I. VINKALNS and E. KARULE, Ionization of hydrogen by electrons allowing for distortion of incident and outgoing waves	253
BURKE, P. G. and A. J. TAYLOR: Ionization of hydrogen atoms using close coupling wave functions	256
OMIDVAR, K. and E. SULLIVAN, Electron impact ionization of highly excited atomic hydrogen	263
ORMONDE, S. and K. SMITH, Close coupling approximation cross sections for the scattering of electrons by hydrogen atoms ($n = 3, 4, 5, 6$)	274
PEACH, G. and M. R. C. McDOWELL: Ionizations of lithium by electrons	277
KYLE, H. L. and A. TEMKIN: Nonadiabatic theory of inelastic scattering	282

SECTION V

FURTHER THEORY (MAINLY ELECTRON-ATOM
COLLISIONS)

LOVELACE, C. and I. C. PERCIVAL: Unstable particles and three-body systems.	295
BELY, O., D. MOORES and M. J. SEATON: Many-channel quantum defect theory	304
HAHN, YU., TH. F. O'MALLEY and L. SPRUCH: Calculation of the s-wave phase shift for positron hydrogen scattering by a minimum principle	312
OMIDVAR, K.: Electron impact 2s and 2p excitations of atomic hydrogen.	318

TAYLOR, A. J. and P. G. BURKE: The scattering of electrons by hydrogen calculated by the second Born and close coupling approximations with the inclusion of coupling to the $n = 3$ states	324
POMILLA, F. R. and J. SHAPIRO: The 2s-3s excitation of hydrogen atoms by electron impact	330
BURKE, P. G., D. D. McVICAR and K. SMITH: The scattering of electrons by He ⁺	339
CALLAN, E. J., P. NIKOLAI and W. L. McDAVID: Hydrogenic continuum electrostatic integrals	348
SARAPH, H. E.: Application of the iteration variation method to coupled equations	359
CORNALDESI, E.: An equation for systems of identical particles.	364
Theoretical discussion session	370
Parallel information session on experimental problems	382

SECTION VI

ELECTRON-MOLECULAR COLLISIONS

MCDOWELL, C. A.: Inelastic electron-molecule collisions	395
BARDSLEY, J. N., A. HERZENBERG and F. MANDL: The dissociation of hydrogen molecules by resonant electron scattering	415
CHEN, J. C. Y.: Vibrational excitation of molecules by slow electron impact	428
SHERIDAN, W. F. and O. OLDENBERG and N. P. CARLETON: Secondary effects in electron excitation of some nitrogen bands	440
HUTCHISON, D. A.: Experimental threshold laws for ionization in the rare gases	443
BURNS, J. F.: Auto-ionization and the ionization efficiency curves for krypton and xenon	451
RAPP, D. and P. ENGLANDER-GOLDEN: Ionization of atoms and diatomic molecules by electron impact. I. Studies of H ₂ with a total ionization apparatus	461
PETERSON, J. R.: Electron-impact ionization of atoms and molecules using a fast crossed-beam method	465
SJÖGREN, H.: Higher ionization potentials measured by electron impact	474
CHANIN, L. M. and G. D. RORK, Measurements of the first Townsend ionization coefficient in neon and hydrogen	478

SECTION VII

RECOMBINATION

BATES, D. R.: Electron-ion recombination	487
BRONDI, M. A.: Afterglow atomic collision processes	491
MAKIN, B. and J. C. KECK: Phase space calculation of three body electron-ion recombination rates	510
COLLINS, C. B., W. B. HURT and W. W. ROBERTSON: The molecular spectrum in a helium afterglow	517

SECTION VIII

NEGATIVE IONS

DOUGHTY, N. A. and P. A. FRASER, The bound-free absorption coefficient of the negative hydrogen ion	527
---	-----

STEINER, B., M. L. SEMAN and L. M. BRANSCOMB: Energy dependence for the photodetachment of I^- near threshold	537
BERRY, R. S. and C. W. DAVID: Radiative capture of electrons by halogen atoms	543
ASUNDI, R. K. and J. D. CRAGGS: Measurement of electron attachment and ionisation cross sections in carbon dioxide	549
FROMMHOLD, L., Simultaneous determination of the electron attachment and detachment rates in oxygen	556
CHANTRY, P. J.: Afterglow measurements in xenon and xenon-water vapour mixtures	565
DUTTON, J., F. M. HARRIS and F. LLEWELLYN-JONES: The three-body process of electron attachment in air.	574

SECTION IX

PHOTO-PROCESSES

CLARK, K. C. and C. E. FAIRCHILD: Resonance absorption by nitrogen atoms in afterglows	581
TAIT, J. H., The calculation of the photo-ionization cross section of lithium	586
COOPER, J. W.: The calculation of auto-ionization probabilities	595
PRATS, F. and U. FANO: Metastable levels in the continuum and the independent particle model	600

SECTION X

INELASTIC HEAVY PARTICLE COLLISIONS

DALGARNO, A.: Inelastic heavy particle collision processes.	609
PRETZER, D., B. VAN ZYL and R. GEBALLE: Cross sections for Lyman α emission resulting from proton and deuteron-rare gas collisions	618
VAN ECK, J., F. J. DE HEER and J. KISTEMAKER: Excitation of helium and polarization of the resulting light induced by collisions with protons and hydrogen atoms (5-35 keV)	624
DE HEER, F. J. and J. VAN ECK: Excitation of Ne induced by H^+ and He^+ impact (5-35 keV)	635
THOMAS, E. W. and H. B. GILBODY: Excitation by positive ions in the energy range 60-500 keV	644
NEFF, S. H. and N. P. CARLETON: Excitation and change of charge in ion molecule collisions in the adiabatic region	652
UTTERBACK, N. G.: Ionization cross sections for neutral helium atoms on helium, neon and nitrogen	661
IRELAND, J. V. and H. B. GILBODY: Experimental study of proton-atom hydrogen collisions in the energy range 60-450 keV	666
LEE, A. R. and H. B. GILBODY: Positive ion stripping and neutralization studies in the energy range 100-450 keV	672
MARTIN, D. W., R. A. LANGLEY, J. W. HOOPER, D. S. HARMER and E. W. MCDANIEL: Production of slow electrons and positive ions in He, Ne, Ar, H_2 , N_2 , O_2 and CO by energetic helium ions	679
SOLOV'EV, E. S., R. N. IL'IN, V. A. OPARIN and N. V. FEDORENKO: Ionization of gases by fast helium atoms and singly-charged helium ions.	692
WOLKE, R. L. and V. J. SODD: Charge states of fast carbon ions	700

SIDENIUS, G.: Measurement of dE/dR in gases with low energy heavy particles	709
ALLISON, S. K.: Measurements of atomic and ionic partial stopping powers for H and He beams in gaseous hydrogen	717
BERKNER, K. H., J. R. HISKES, S. N. KAPLAN, G. A. PAULIKAS and R. V. PYLE: The excitation and Lorentz ionization of 10 MeV hydrogen atoms	726
RIVIERE, A. C. and D. R. SWEETMAN: Formation of hydrogen atoms in excited states by electron capture	734
BARNETT, C. F. and J. A. RAY: The dissociation cross section of H_2^+ in hydrogen gas	743
GUIDINI, J.: Dissociation des ions H_2^+	751
CHESHIRE, I. M.: Resonant charge transfer by fast protons in atomic hydrogen	757
MITTLEMAN, M. H.: High energy charge exchange.	766
BASU, D., S. C. MUKHERJEE and N. C. SIL: Double electron capture of alpha particles passing through helium	769
FENNEMA, J. W. R.: On the impact parameter treatment of excitation ionization and charge transfer processes	779
ELLISON, W. D. and S. BOROWITZ: A model for charge transfer in near adiabatic collisions	790
HASTED, J. B., A. R. LEE and M. HUSSAIN: Inelastic collisions involving curve-crossing	802
MARINO, L. L.: Charge transfer between cesium atoms and rubidium 85 and rubidium 87 ions	807
STEBBINGS, R. F., A. C. H. SMITH and H. EHRHARDT: Charge transfer between oxygen atoms and O^+ and H^+ ions.	814
EDMONDS, P. H. and J. B. HASTED: A charge transfer collision involving accidental resonance	823
DEMCOV, JU. N.: Charge exchange with small energy transfer	831
BAILEY, J. M. and V. W. HUGHES: Muonium and positronium physics	839
AMME, R. C. and N. G. UTTERBACK: Effects of ion beam excitation on charge transfer cross section measurements	847
MCGOWAN, J. W., P. MARMET and L. KERWIN: Concerning the measurement of charge transfer reaction cross sections at thermal energies.	854
JONES, P. R., G. VAN DYK and N. EDDY: Resonant electron capture in collisions of Ne^+ on Ne and Ar^+ on Ar	862
EVERHART, E., H. F. HELBIG and G. J. LOCKWOOD: Differential and total cross sections for charge transfer in 1 keV He^+ on He collisions	865
SAYERS, J. and D. SMITH: Ion-atom interchange processes	871
VARNEY, R. N.: Recent discoveries concerning ions	877
PIVOVAR, L. I., M. T. NOVIKOV and V. M. TUBAEV: Differential scattering cross section and charge state distribution of an argon-ion beam in single collisions with gas atoms at 250 keV-1400 keV	883

SECTION XI

ELASTIC HEAVY PARTICLE COLLISIONS

BERNSTEIN, R. B.: Elastic scattering of atoms and molecules in the thermal energy range	895
DALGARNO, A. and R. J. W. HENRY: Transport properties and scattering in molecular gases	914

BROWN, JR., H. H., K. LULLA and B. BEDERSON: Scattering of a velocity selected potassium beam by neon, argon and xenon gases at different temperatures	921
ROTHE, E. W., P. K. ROL, R. H. NEYNABER and S. M. TRUJILLO: Interaction potentials from the velocity dependence of total atom-atom scattering cross sections	927
AMDUR, I., J. E. JORDAN and R. R. BERTRAND: Recent experimental results on elastic scattering of high velocity neutral beams: Reliability of derived intermolecular potentials	934
FONTANA, P. R.: Factors affecting the long range interatomic potential and scattering cross section	944
DAVIES, P. G., J. DUTTON and F. LLEWELLYN-JONES: Drift velocities of low energy nitrogen ions in nitrogen	950
FITE, W. L. and R. T. BRACKMANN: Scattering of hydrogen atoms by deuterium molecules	955
THORSON, W. R.: Non-adiabatic effects in high energy atomic scattering.	964
HERSCHBACH, D. R. and G. H. KWEI: Elastic scattering of chemically reactive molecules	972
WOLFGANG, R.: Kinetics of hot-atom chemical reaction: Evaluation of average collisional energy loss	983
MANN, A.: Some properties of atom recombination by three-body collisions	988
DUNN, G. H.: Studies of photodissociation of molecular ions	997

SECTION XII

COLLISIONS WITH MOLECULES AND OTHER TOPICS

PATEL, C. K. N.: Collision processes leading to optical masers in gases	1009
BIENIEWSKI, T. M.: Collision broadening of spectral lines by identical atoms	1055
JEFIMENKO, O.: Satellite bands in the spectra of gaseous mixtures and the shape of potential curves for neutral atoms and molecules in the state of collision.	1065
MUSCHLITZ, JR., E. E. and M. J. WEISS, Inelastic collisions of metastable atoms in gases dissociative ionization	1073
CERMAK, V.: Mass spectrometer investigations of reactions of electronically excited neutral particles with alkali metal atoms	1080
BOUTHILLETTE, D. B., J. A. HEALEY and S. N. MILFORD: Double inelastic collisions of hydrogen atoms with excited hydrogen atoms in 2, 3, 4 states	1081
NEYNABER, R. H., S. M. TRUJILLO, L. L. MARINO and E. W. ROTHE, Low-energy electron scattering from metastable helium	1089
RAPP, D., Vibrational energy transfer in molecular collisions involving large transition probabilities	1096
HEIL, H. and W. G. WAGNER: The quenching of inverted populations in vibrational levels by collisional excitation transfer	1103
TOENNIES, J. P.: Molecular beam measurements of inelastic cross sections for the excitation of the rotational transition T1F (2,0) \rightarrow (3,0) in collisions with atoms	1113
WRAY, K. L. and J. D. TEARE: Excitation mechanism for the N ₂ (1 +) band system in shock-heated nitrogen	1123
KENTY, C.: Collisions involving metastable N ₂ molecules in discharges and afterglows in a rare gas plus N ₂	1133

DAVIES, D. K., F. LEWELLYN-JONES and C. G. MORGAN: The role of delayed photon processes and metastable atoms in ionization growth in helium . . .	1140
LUNT, R., D. MAHON-SMITH, E. P. TUFFY and S. J. B. CORRIGAN: Experimental evidence on the deactivation by collision with molecules in the ground state of molecules in electronically excited states	1145
AUTHOR INDEX	1159
