

VOLUME II

31. ELECTRON IMPACT EXCITATION OF MOLECULES

- | | | |
|-------|--|-----|
| 31.01 | Attachment of low-energy electrons to O ₂ molecules in Ar-N ₂ -O ₂ gas mixtures.
I. Ogawa and T. Sugiyama | 646 |
| 31.02 | Electron excitation of the B ³ Π _g state of N ₂ with cascade correction.
D.J. Burns and C.R. Hummer | 648 |
| 31.03 | Electron impact excitation of a and b quartet states of NO and the "quintet" state of N ₂ .
D. Vichon, R.I. Hall, F. Greteau and J. Mazeau | 650 |
| 31.04 | Spectroscopy of S ₈ by electron impact.
S. Trajmar and A. Chutjian | 652 |
| 31.05 | Investigation of threshold electron impact excitation of NH ₃ .
D. Cvejanović, J. Jureta and S. Cvejanović | 654 |
| 31.06 | Electron scattering from ozone.
R.J. Celotta, N. Swanson and M. Kurepa | 656 |
| 31.07 | Electron scattering by lithium fluoride.
L. Vuskovic, S. Srivastava and S. Trajmar | 658 |
| 31.08 | Low energy electron scattering from SF ₆ molecules.
K. Rohr | 660 |

31.09	Absolute total electron scattering cross sections for N_2 and O_2 R.E. Kennerly and R.A. Bonham	662
-------	--	-----

32. AUTOIONIZATION OF ATOMS AND MOLECULES BY ELECTRON IMPACT

32.01	Ejected electron spectra from autoionizing levels in alkali metal vapours excited by low energy electron impact. G. Kavei, T.W. Ottley, V. Pejčev, D. Rassi and K.J. Ross	664
32.02	Autoionizing levels and Auger transitions in alkali - earth atoms, excited by low energy electron impact. T.W. Ottley, V. Pejčev, D. Rassi and K.J. Ross	666
32.03	Autoionization transitions in helium in the (e, 2e) experiment (theoretical interpretation). V.V. Balashov and V.N. Mileev	668
32.04	A unified description of resonances in the scattered and ejected electron spectra in the excitation of autoionizing states : neon and argon. V.V. Balashov, A.N. Grum-Grzhimailo, N.M. Kabachnik, A.I. Magunov and S.I. Strakhova	669
32.05	Decay of the aligned autoionizing $3s\ 3p^6\ 4p$ -state of argon. K. Jung, E. Schubert and H. Ehrhardt	670
32.06	Decay modes for highly excited resonances in helium. J.A. Baxter, J. Comer, P.J. Hicks and J.W. McConkey	672
32.07	Excitation of He autoionizing states in the near-threshold region. J.A. Baxter, J. Comer, P.J. Hicks and J.W. McConkey	674

33. POST COLLISION INTERACTIONS AND RELATED EFFECTS

33.01	Electron impact excitation of autoionizing states of krypton. S.K. Srivastava and S. Trajmar	676
33.02	Observation of resonance structures in the autoionization region of neon by electron impact excitation of metastable states. E. Bolduc, D.Huard and P. Marmet	678
33.03	Autoionizing states of CO studied using an electron-electron coincidence technique. D.G. Wilden, P.J. Hicks and J. Comer	679
33.04	Autoionization of simple molecules : measurements using the electron-electron time-of-flight coincidence technique. D.G. Wilden, J. Comer and P.J. Hicks	680
33.05	Parametrized close coupling calculations on the electron impact excitation of helium in the autoionization region. F.B. Kets and H.G.M. Heideman	681
33.06	The excitation of $n=3$ states of helium by electrons near the threshold of the $(2p^2)^1D$ autoionizing state. H.G.M. Heideman, W. van de Water, J. van Eck and P.H. Peeters	682
33.07	A new look on "shake down" effect in constant energy loss measurements. A. Delage, D. Roy and J.D. Carette	684
33.08	Effects of the post-collision interaction on the presence of ejected electrons in energy loss spectra in helium. J.D. Carette, A. Delage and D. Roy	686
33.09	Autoionization of the two-electron atom in the dipole approximation. S.I. Nikitin, V.N. Ostrovsky	688

33.10	Autoionization widths of two-electron systems below the $n=2$ threshold. M.J. Conneely and L. Lipsky	690
33.11	Angular correlation between two outgoing electrons from autoionizing state in helium. H. Nishimura, A. Danjo and S. Ohtani	691
33.12	On the form of the polarization resonances in helium excited by electron impact at around 60 eV. A. Defrance and G. de Froment	692

34. HEAVY PARTICLE COLLISIONS, OUTER SHELL EXCITATION (MEDIUM AND LOW ENERGIES)

34.01	Differential cross sections and coherence effects for K-Ar and K-Xe collisions. P.J. Martin, E. Clemens, V. Kempter and L. Zehnle	696
34.02	Study of the optical emission in sodium rare gas collisions at low energies. V. Kempter, J. Schön, E. Speller and W. Mecklenbrauck	698
34.03	Systematic trends in resonance line excitation for quasi-one-electron systems : Li, Na, K, Be^+ , Mg^+ , Ca^+ , Zn^+ - rare gas collisions, 1-100 keV. N. Andersen, T. Andersen and J. Ø. Olsen	700
34.04	Impact-parameter theory for quasi-one-electron systems. S.E. Nielsen and J.S. Dahler	702
34.05	A comparison of model potential calculations for resonance line excitation in quasi-one-electron systems : Li, Na, Be^+ , Mg^+ -He, Ne collisions. S.E. Nielsen and J.S. Dahler	704
34.06	Excitation processes in Na-Ne collisions at low and medium energies. C. Gaussorgues, V. Sidis and M. Barat	706
34.07	Elastic and inelastic scattering of 5.5-10 keV He^+ by He. D. Bordenave-Montesquieu, R. Dagnac, P. Mounguengui, J. Baudon	708
34.08	Doubly differential cross sections for charge exchange process. N. Nose, S. Hayakawa and T. Makita	710
34.09	Electron capture during collisions between ions and atoms of noble gases in the energy range 200-4000 eV. B.I. Kikiani, Z.E. Salia, I.G. Bagdasarova, M.R. Gochitashvili and T.M. Kereselidze	712
34.10	Determination of nonadiabatic coupling potentials by inversion of scattering data. R.B. Gerber, B. Carmeli and M.S. Child	714
34.11	Collision spectroscopy of the C^+ -Ne system. D. Dowek, J. Fayeton, J. Alaman and V. Sidis	716
34.12	Ionization of He and Ne atoms by slow Li^+ , C^+ , N^+ , Ne^+ , Na^+ , Mg^+ ions Z.Z. Latypov and A.A. Shaporenko	718
34.13	Electron capture of $\text{N}^+(3\text{P})$ and (^5S) state on rare gases. V. Sidis and M. Matic	720
34.14	Determination of the "triple peak" location in heavy particle collisions. J. Fayeton and M. Barat	722
34.15	Simultaneous excitation of the $2\text{p}^53\text{p}$ configuration in Ne + Ne collisions. P.J. Martin, G. Riecke, L. Zehnle and V. Kempter	724
34.16	Diabatic orbitals for the Ne_2 system. J.P. Gauyacq	726
34.17	Al^+ -rare gas collision spectroscopy. D. Dowek, J. Fayeton and M. Barat	728

34.18	Electronic excitation effects on the differential scattering cross section in ion-atom collisions. A. Russek	730
34.19	Fine structure in the differential cross section from rotational coupling. R.W. Wijnaendts Van Resandt, C. De Vreugd and J. Los	732

35A. LOW ENERGY HEAVY PARTICLE SCATTERING THEORY OF POTENTIALS

35.01	Interpretation of avoided-crossing patterns of the maximum-amplitude-trajectory for low-energy $\text{Li}^+\text{-He}$ scattering. S. Tani and M. Inokuti	734
35.02	A simple theoretical model for the anisotropic van der Waals potential. K.T. Tang and J.P. Toennies	736
35.03	The inversion symmetry of the polarization potentials. Yu.N. Demkov	738
35.04	Long-range interactions of ions with atoms in P states. C.F. Giese and W.R. Gentry	740
35.05	Theoretical study of the H_3^- system : ground and 1st excited states. R. Garcia, A. Rossi and A. Russek	742
35.06	Molecular configuration interaction. J. Aguilar, C. Murez, H. Nguyen Ngoc	743
35.07	The evaluation of two-center integrals appearing in molecular calculations involving Simons type model potentials. Application to charge exchange. A. Valance and G. Simons	744
35.08	Variable-screening model for diatomic molecules. J. Aguilar, C. Murez and H. Nakamura	746
35.09	Model potential calculations for excited state helium on inert gases. G. Peach and A.R. Malvern	748

35B. LOW ENERGY HEAVY PARTICLE COLLISIONS INELASTIC SCATTERING

35.10	Classical trajectory study of differential cross sections for $\text{Li}^+\text{-CO}$ and N_2 inelastic collisions. L.D. Thomas	752
35.11	Collision dynamics of trajectory ensembles : $\text{Li}^+ + \text{H}_2$. G.D. Barg	754
35.12	State-to-state differential cross sections for sudden rotationally inelastic collisions. A.S. Dickinson and D. Richards	756
35.13	Cross sections and rate coefficients of rotational excitations of H_2 by H_2 collisions. J. Schäfer	757
35.14	Collision-induced rotational transitions in the Π -states of diatomic molecules. I.V. Lebed, E.E. Nikitin, S.Ya. Umanskii	758

35.15	Investigations of inelastic ion collisions by infrared luminescence. A. Ding and A. Redpath	759
35.16	Vibrational excitation in the scattering of neutrals : K + CO. F. Pühl, W. Schepper and D. Beck	760
35.17	Impact parameter calculations of vibrational excitation in H^+-H_2 collisions for energies $E_{CM} \gtrsim 10$ eV. R. Schinke	762
35.18	A comparison between a l_2 -conserving approximation and infinite order sudden approximation. V. Khare	763
35.19	State selected He-HCl collision cross sections. L. Monchick	764
35.20	Scattering theory and coupled-channel computations of multiple- surface transitions in nonreactive collisions of $F(2P)$ with $H_2(1\Sigma_g^+)$. F. Rebentrost and W.A. Lester Jr.	766
35.21	Vibrational inelasticity calculations for $H, D + H_2$ non reactive collisions. F.A. Gianturco and U.T. Lamanna	767
35.22	Rotational excitation of H_2 molecules by proton scattering at low energies. F.A. Gianturco	768
35.23	Coupled-states calculations of vibrational excitation of H_2 by H^+ impact for collision energies $E_{cm} \leq 10$ eV. P. McGuire and M.E. Berbenni	769
35.24	New semiclassical treatments of rotational excitation in H^+-H_2 and Li^+-H_2 collisions. M.R. Flannery and K.J. McCann	770
35.25	Rotational and vibrational transitions for $Li + H_2$ collisions. B.H. Choi, R.T. Poe and K.T. Tang	771
35.26	Semiclassical perturbation scattering theory : comparison of vibratio- nal excitation of CO and N_2 by Li^+ . A.P. Hickman, F.T. Smith and W.H. Miller	772
35.27	Perturbed rotational state treatment of polar molecule collisions. K. Takayanagi, P. Baille, S. Tsuchiya and M. Hashi	774
35.28	Helicity representations of some rotational transition resonances of H_2 by H_2 collisions. J. Schäfer	776
35.29	Strong-coupling correspondence principle approximation for simultaneous vibrational-rotational transitions in $He + H_2$ A.S. Dickinson and A.P. Clark	777
35.30	Inelastic rotational collision cross section of space oriented CsF on Ar and Kr at small angles. J.M. Henrichs, R.P.M. De Bie, C.G.H. Simons and N.F. Verster	778
35.31	Rotationally inelastic scattering of K on NH_3 , observed by TOF. I. Kusunoki	780
35.32	Vibrational excitation of simple molecules by Li^+ impact in the range 70 eV-1100 eV. N. Kobayashi, Y. Itoh and Y. Kaneko	782
35.33	Inelastic scattering of low energy protons from small molecules. J. Krutein and F. Linder	784
35.34	Rotational quantum transitions in H^+-H_2 collisions : comparison between beam experiment and quantum theory. H. Schmidt, P. McGuire, V. Hermann, F. Linder	786
35.35	Rotationally resolved beam measurements of vibrational excitation in low energy H^+-H_2 scattering. V. Hermann, H. Schmidt, F. Linder	788

36. ELECTRON SCATTERING BY POLAR MOLECULES

36.01	Electron attachment to polar molecules : structure in the dissociative attachment cross sections for HCl, HBr, HF. R. Abouaf and D. Teillet-Billy	792
36.02	Vibrational excitation of HCl by electrons at threshold. L. Dubé and A. Herzenberg	794
36.03	Resonance states of HCl ⁻ and electron HCl scattering process. H.S. Taylor, E. Goldstein and G.A. Segal	796
36.04	Close coupling calculations for HF and HCl molecules rotational excitation in collisions with electrons. F.A. Gianturco and N.K. Rahman	798

37. POSITRON SCATTERING

37.01	Scattering of low energy positrons by helium. J.W. Humberston and R.I. Campeanu	800
37.02	Total cross section measurements for scattering of intermediate energy positrons and electrons by helium. W.E. Kauppila, T.S. Stein, G. Jesion and V. Pol	802
37.03	Direct measurements of total cross sections for low energy positrons colliding with the inert gases. T.S. Stein, W.E. Kauppila, V. Pol, G. Jesion and J.H. Smart	804
37.04	Experimental determination of total cross sections for the scattering of low-energy positrons by helium and neon. A.G. Brenton, J. Dutton and F.M. Harris	806
37.05	Measurement of total cross-sections for intermediate energy positrons scattering from inert-gas atoms. T.R. Twomey, T.C. Griffith and G.R. Heyland	808
37.06	High-resolution time-of-flight spectroscopy with low-energy positrons. W.G. Wilson and W. Raith	810
37.07	Are there two-channel resonances in positron-hydrogen scattering ? R.J. Drachman and A.K. Bhatia	812
37.08	Nonadiabatic polarization potentials for positron-atom elastic scattering. Y.C. Jean and D.M. Schrader	813
37.09	Scattering of positrons from hydrogen in the second-order Eikonal approximation. A.C. Roy	814
37.10	Scattering of positrons by hydrogen atoms. P.A. Massaro and C.R. Garibotti	816
37.11	Variationally optimized s and p pseudo states for low energy e ⁺ -H scattering and annihilation. J.W. Darewych and J. Sokoloff	818
37.12	Positron scattering from neon and argon. A.G. Ryman, R.P. McEachran and A.D. Stauffer	820
37.13	e ⁺ -H and H ⁺ -H rearrangement collisions. N.C. Sil and B.C. Saha	822
37.14	The investigation of channels of positron atomic shell formation and decay. P.U. Arifov, V.M. Malyan and A.A. Paisiev	824
37.15	Total cross section measurements for scattering of low energy positrons by molecules. W.E. Kauppila, T.S. Stein, J.H. Smart and V. Pol	826

37.16	Positron drift in gases in a uniform electric field. J.S. Tsai and D.A.L. Paul	828
-------	---	-----

38. DISSOCIATIVE ELECTRON ATTACHMENT

38.01	Experimental evidence for a still unknown H^- formation process. M. Bacal, E. Nicolopoulou and H.J. Doucet	832
38.02	Cross sections for electron attachment to chlorine molecules. M.V. Kurepa and D.S. Belic	834
38.03	New processes for dissociative attachment in NO, O ₂ and H ₂ . C. Schermann, P. Delon, R.I. Hall and M. Tronc	836
38.04	Dissociative attachment of electron to diatomic molecules H ₂ , HD, D ₂ . G.F. Drukarev and S.A. Pozdnev	838
38.05	Dissociation of diatomic molecules under resonant electron scattering. G.V. Golubkov, F.I. Dalidchik and G.K. Ivanov	840
38.06	Laser-induced dissociative attachment in sulphur hexafluoride. J.P. Schermann, R. Barbe and S. Avrillier	842
38.07	Dissociative electron attachment in H ₂ S : energy and angular distributions of H^- fragments. R. Azria, Y. Le Coat and G. Lefevre	844
38.08	Translational energies from triatomic negative ions fragmentation S. Coursaud, M. Sizun and F. Fiquet-Fayard	846
38.09	Shapes of dissociative attachment cross sections for diatomics. G.V. Nazaroff	848

39. HIGH ENERGY ION-ATOM COLLISIONS

II. CHARGE EXCHANGE

39.01	Charge transfer and $He^+(2s)$ formation in fast He^{2+} -H and He^+ -H collisions. M.B. Shah and H.B. Gilbody	850
39.02	Ionization and charge transfer in fast H^+ - He^+ collisions. G.C. Angel, J.B.A. Mitchell, K.F. Dunn, R. Browning and H.B. Gilbody	852
39.03	Charge exchange cross sections for relativistic ions. G.M. Raisbeck, H.J. Crawford, P.J. Lindstrom, D.E. Greiner, F.S. Beiser and H.H. Heckman	854
39.04	Auger dissociation and excitation in He^{2+} -H ₂ collisions. V.V. Afrosimov, G.A. Leiko and M.N. Panov	856
39.05	$He(2^1S)$ formation in He^+ -H ₂ collisions and search for a long lived doublet state of He^- . K.F. Dunn, B.J. Gilmore, F.R. Simpson and H.B. Gilbody	858
39.06	Charge exchange in ion-molecule collisions : He^+ and Ar^+ on H ₂ , D ₂ and N ₂ . W.L. Hodge Jr., A.L. Goldberger, M. Vedder and E. Pollack	860
39.07	Direct and charge exchange scattering in Ar^+ + CO collisions. A.L. Goldberger, D.S. Newman, M. Vedder and E. Pollack	862
39.08	Mechanisms for electron capture from hydrogen atoms by protons incident at very high velocities. R. Shakeshaft and L. Spruch	864

39.09	Formation of fast metastable helium atoms in one electron capture by He^+ ions in Na, K and Cs. R.W. McCullough, T.V. Goffe and H.B. Gilbody	865
39.10	The energy of the adiabatic maximum in some σ_{21} cross sections between noble gases. A. Guilbaud, H.C. Suk and B. Hird	866
39.11	Charge exchange cross sections in proton-barium collisions. T.J. Morgan, F.J. Eriksen and D. Mariani	868
39.12	D^- yield by multiple charge-transfer collisions of 0.3-10 keV D^+ in cesium vapor. A.S. Schlachter, K.R. Stalder and J.W. Stearns	870
39.13	Electron capture and impact ionization cross sections of He^{++} in atomic hydrogen. R.E. Olson, A. Salop, R.A. Phaneuf and F.W. Meyer	872
39.14	Electron capture from helium by protons : total cross sections. D.S.F. Crothers and J.G. Hughes	874
39.15	Cross sections for charge-changing collisions of 20- to 120 keV oxygen ions and atoms in hydrogen. W.G. Graham	876
39.16	High energy behaviour of transition probability and total cross sections for charge exchange. Dz. Belkic	878
39.17	Formation of fast excited hydrogen atoms through dissociation of H_2^+ and H_3^+ ions of high energy D. Hasselkamp, A. Scharmann and K.H. Schartner	880
39.18	Charge exchange of $\text{O}^+(4\text{S and } 2\text{D})$ ions colliding with N_2 and Ar. M. Matic, B. Cobic and M. Vujovic	882
39.19	Electron capture to D_2^- repulsive states by D_3^+ in Cs. C. Cisneros, I. Alvarez, R. Garcia, C.F. Barnett and A. Russek	884
39.20	Electron capture from carbon by protons. Chau-Chin Wei	886

40. HEAVY PARTICLE COLLISIONS. INNER SHELL IONIZATION THROUGH ROTATIONAL OR RADIAL COUPLING

40.01	On the impact parameter dependence of K-shell excitation in near adiabatic heavy ion collisions. N. Luz, S. Sackmann, H.O. Lutz, R.V. Reenen, R. McMurray and I.V. Heerden	888
40.02	Coupled-state calculations in a molecular basis generated from the variable-screening model. U. Wille and W. Fritsch	890
40.03	Charge state dependence of K-shell excitation in collisions of nitrogen and neon ions on carbon, nitrogen, oxygen and neon targets. R.H. Woerlee, R.J. Fortner, T.P. Hoogkamer and F.W. Saris	892
40.04	Neon characteristic X-ray production in neon-neon collisions as a function of incident projectile charge state. R.S. Peterson, F.K. Chen, S.B. Elston, J.P. Forester, P.M. Griffin, H.C. Hayden, R. Laubert, C.A. Peterson, R.S. Thoe, C.R. Vane and I.A. Sellin	894
40.05	The effects of spin-orbit coupling on $2p\sigma-2p\pi$ rotational coupling transitions. R. Anholt, W.E. Meyerhof and A. Salin	896

40.06	Differentiation in L-subshell vacancy production in iodine ions by atomic collisions. S. Hagmann, P. Armbruster and P.H. Mokler	898
40.07	Analysis of couplings leading to inner shell vacancies in heavy ion-atom collisions in the adiabatic collision region. S. Hagmann, P. Armbruster and P.H. Mokler	900
40.08	KL-vacancy sharing in collisions of 35- to 600 keV C ⁺ , N ⁺ and O ⁺ on Ar. N. Stolterfoht, D. Schneider and D. Brandt	902
40.09	Radial couplings in K-vacancy sharing in ion-atom collisions. A. Riera and A. Macias	904

41. HEAVY PARTICLE COLLISIONS. INNER SHELL MO-X RAYS RADIATIVE ELECTRON CAPTURE

41.01	Angular distributions of MO X-ray emission. J.S. Briggs, J.H. Macek and K. Taulbjerg	908
41.02	The velocity dependence of the MO K-X-ray anisotropy peaks. Ch. Stoller, W. Wölfli, G. Bonani, M. Stöckli and M. Suter	910
41.03	The Z-dependence of the MO K-X-ray anisotropies. Ch. Stoller, W. Wölfli, G. Bonani, M. Stöckli and M. Suter	912
41.04	Emitter velocity of characteristic and non-characteristic X-rays in heavy ion collisions. P. Vincent and J.S. Greenberg	914
41.05	Cl quasimolecular L X-ray radiation in heavy ion collisions. P. Vincent and J.S. Greenberg	916
41.06	Quasimolecular K X-ray production in Ge + Ge, Ni + Nb, and Nb + Nb collisions. P. Vincent and J.S. Greenberg	918
41.07	Theoretical interpretation of noncharacteristic K, L and M MO X-rays in heavy ion-atom collisions. T. Morovic, B. Fricke, W.D. Sepp, A. Rosen and D.E. Ellis	920
41.08	Evidence for K-molecular orbital radiation in high-energetic heavy ion collisions. H. Schmidt-Böcking, K. Bethge, W. Lichtenberg, G. Nolte, R. Schuch, R. Schule, H.J. Specht and I. Tserruya	922
41.09	Auger transitions in quasimolecules at small internuclear distances. V.V. Afrosimov, Yu.S. Gordeev, A.N. Zinoviev, A.A. Korotkov and A.P. Shergin	924
41.10	δ-rays from K-shell ionization induced by heavy ions. D.H. Jakubassa, P. Kienle, M. Kleber and C. Kozhuharov	926
41.11	Radiative electron capture in heavy ion-atom collisions. H.D. Betz, E. Spindler and F. Bell	928
41.12	Radiative electron capture. R.H. Pratt, D.J. Botto and C.M. Lee	930

42. LOW ENERGY ELECTRON SCATTERING BY ATOMS

42.01	Threshold electron spectroscopy of atoms. J.N.H. Brunt, S. Cvejanović and F.H. Read	934
42.02	High resolution threshold spectroscopy. J. Jureta and S. Cvejanović	936
42.03	Resonances below the $n=3$ double excited states of helium. D. Roy and A. Delage	938
42.04	Feshbach resonances in elastic scattering of electrons from He, Ne, Ar and Kr observed with an ultra-high resolution photoionization electron source. R.J. Van Brunt and A.C. Gallagher	940
42.05	Near-threshold excitation of ultraviolet-emitting levels of atoms and molecules by electron impact. J.N.H. Brunt, G.C. King and F.H. Read	942
42.06	Near-threshold measurement of the differential cross section for electron impact excitation of the metastable states of atomic ($2^2S_{1/2}$) hydrogen and molecular ($c^3\Pi_u$) hydrogen. J.C. Zorn, C. Vargas and D.A. Crosby	944
42.07	Low energy electron-helium total scattering cross section. R.H. Bullis	946
42.08	Direct measurements of total cross sections for low energy electrons colliding with helium and argon in a curved axial magnetic field. T.S. Stein, W.E. Kauppila, G. Jesion and V. Pol	948

43. HEAVY PARTICLE COLLISIONS : OUTER SHELL EXCITATION AT MEDIUM AND LOW ENERGIES. INTERFERENCE EFFECTS AND POLARIZATION

43.01	Polarized photon-scattered atom coincidence measurements in 1.5 keV He^+-He collisions. D.H. Jaecks, F.J. Eriksen and L. Fornari	952
43.02	Predominance of $\Sigma_g-\Pi_g$ secondary coupling in the 3^1P excitation of He in the low energy He^+-He collision. G. Vassilev, G. Rahmat and J. Baudon	954
43.03	Super-radiance in atom-atom collisions. J. Macek	956
43.04	Outer-shell inelastic processes in low-energy two-body heavy particle collisions on surfaces. N.H. Tolk, J.C. Tully and J.S. Kraus	958
43.05	Investigation of charge-transfer collisions by high-resolution laser spectroscopy. G. Moruzzi, K.R. Anton, S.L. Kaufman, W. Klempt, R. Neugart, E.W. Otten and B. Schinzler	960
43.06	The classical approximation for the detachment and capture in slow collisions of the negative ion and the charged particle. Yu.N. Demkov, E.A. Solov'yev	962
43.07	Inverse population in a system of $3p, 3s$ states of neon in slow Na^+-Ne collisions. S.V. Bobashev, V.A. Kharchenko	964
43.08	On interference of continuum quasimolecular states in ion-atom collisions. Ju.F. Bydin, S.S. Godakov, V.M. Lavrov	966

43.09	Oscillations of the polarization function of Sr^+ spectral line ($5^2\text{P}_{3/2}-5^1\text{S}_0$) emitted in slow $\text{Sr}^+ + \text{Ar}$ collision. S.V. Bobashev and V.A. Kharchenko	968
43.10	Cross sections for production of atomic magnetic sublevels in collisions between alkali ions and mercury atoms. V. Aquilanti, P. Casavecchia and G. Grossi	970
43.11	Radiative inelastic processes in ion-neutral collisions between .03 and 3 keV. J. Weiner, J. Caddick and A.V. Hellfeld	972
43.12	Particle-photon coincidence-counting measurements in Ne^+-Ne collisions. P.R. Jones and E.J. McGrath	973
43.13	Ion-ion recombination and ion-pair formation processes in hydrogen-alkali atom systems. R.K. Janev and Z.M. Radulovic	974
43.14	Mechanism of alkali atom excitation under slow collisions. E.E. Nikitin and A.I. Shushin	976
43.15	Double charge transfer in H^+-H^- collisions. F. Brouillard, W. Claeys, G. Rahmat and G. Van Wassenhove	977

44. HIGH ENERGY ION-ATOM COLLISIONS

III. IONIZATION AND AUTOIONIZATION

44.01	Magnus approximation for K-shell ionization by heavy ion impact. J. Eichler	980
44.02	Magnus approximation cross sections for ionization of hydrogen atoms by He^{++} collisions. A. Salop and J. Eichler	982
44.03	Doubly differential cross sections for electron production by impact of H^+ , H_2^+ , $^3\text{He}^+$ and $^4\text{He}^+$ on helium. J. Fryar, M.E. Rudd and J.S. Risley	984
44.04	Doubly differential cross sections for electron production by impact of neutral hydrogen on helium. M.E. Rudd, J.S. Risley and J. Fryar	986
44.05	Energy distribution of secondary electrons ejected from krypton by proton impact ionization. S.T. Manson, L.H. Toburen and Y.K. Kim	988
44.06	Energy and angular distribution of electrons ejected from Kr by 1 MeV proton impact ionization : theory and experiment. S.T. Manson and L.H. Toburen	990
44.07	Relationship between the cross sections of the outer 1s, 2s and 2p electron loss by the ions of the light elements ($Z=2-12$). I.S. Dmitriev, Yu.A. Tashaev, V.S. Nikolaev, Ya.A. Teplova	992
44.08	Asymmetric line shapes in autoionization spectra of He excited by H^+ , He^+ and He^{2+} . M. Prost, R. Morgenstern, D. Schneider and N. Stolterfoht	994
44.09	Total excitation cross sections for the first autoionizing states of helium in H^+ , He^+ and He^0 on He collisions (10 to 150 keV). A. Bordenave-Montesquieu, P. Benoit-Cattin, M. Boudjema and A. Gleizes	996
44.10	Excitation of the autoionizing states of helium in He^0 -He collisions (above 10 keV). P. Benoit-Cattin, A. Bordenave-Montesquieu, M. Boudjema and A. Gleizes	998

44.11	Molecular excitation of the autoionizing states of helium in He^+/He collisions (above 10 keV). A. Bordenave-Montesquieu, P. Benoit-Cattin, M. Boudjema and A. Gleizes	1000
44.12	Alignment of the $2p53s^2\ 2P_{3/2}$ state of Na excited by proton and electron impact. P. Ziem, R. Morgenstern and N. Stolterfoht	1002
44.13	Ionization collisions between two excited hydrogen atoms. H. Nakamura, T. Shirai, K. Iguchi and Y. Nakai	1004
44.14	Ionization of noble gases by equal velocity He^+ , He^{++} , H^+ ions. L.H. Toburen and W.E. Wilson	1006
44.15	Electron loss by fast He atoms in atomic hydrogen. P. Hvelplund, L. Larsen and J.V. Mikkelsen	1008
44.16	Electron loss for fast, metastable He atoms. E.H. Pedersen	1010
44.17	Electron capture to continuum states for H^+ (10 keV-1.5 MeV) in H_2 , He, Ne and Ar. M. Rødbro and F.D. Andersen	1012
44.18	Spin-dependent excitation of autoionizing states of Li produced in collisions with noble gas targets. S. Schumann, S.B. Elston, C.R. Vane, J.P. Forester, P.M. Griffin, D.J. Pegg, I.A. Sellin, R.S. Thoe and J.J. Wright	1014
44.19	Anisotropic electron emission from autoionizing states excited in 15 keV- $\text{Li}^+ + \text{He}$ collisions. U. Leithäuser, D. Schneider, N. Stolterfoht and D. Brandt	1016
44.20	Ion-electron angular correlation in autoionization following ion impact obtained from ion-electron coincidence measurements. U. Thielmann, R. Morgenstern and A. Niehaus	1018
44.21	Energy spectra of electrons ejected in slow $\text{Li}^+ + \text{He}$ collision. H. Oomoto, A. Yagishita, K. Wakiya and H. Suzuki	1020
44.22	High resolution electron spectroscopy of Li and Be core-excited in single collisions with gaseous targets. P. Bisgaard, R. Bruch, P. Dahl, B. Fastrup and M. Rødbro	1022
44.23	Angular distributions of Auger electrons from Be^+ ions excited in collisions with CH_4 and Ne. P. Bisgaard, R. Bruch, P. Dahl, B. Fastrup and M. Rødbro	1024

45. LOW ENERGY CHARGE TRANSFER, TRANSFER IONIZATION AND ION-MOLECULE REACTIONS

45.01	Study of transfer ionization systems. W. Hultsch, W. Kronast, A. Niehaus and M.W. Ruf	1028
45.02	Kinetic energy dependence of the reactions of N^+ ions with NO , CO , CO_2 , N_2O and SO_2 . D.L. Albritton, I. Dotan and F.C. Fehsenfeld	1030
45.03	The cross section for symmetric charge exchange of He^+ in helium at energies between 0.3 and 8 eV. H. Helm	1032
45.04	Measurement of resonant charge transfer in collisions between 0.1 and 200 eV using the merging beams technique. R.D. Rundel, D.E. Nitz, M.W. Geis, K.A. Smith and R.F. Stebbings	1034
45.05	He^+/He charge exchange and the mobility of He^+ in He. J.N. Bardsley and S.L. Lin	1036
45.06	Angular coupling between electronic states in an ion-molecule reaction. E. Herbst and J.B. Delos	1037

45.07	Thermal energy charge transfer reactions between rare gas ions and small molecules : internal and kinetic energy of the products. R. Marx, G. Mauclaire, R. Deraï, M. Gerard and T.R. Govers	1038
45.08	Model calculations for the transfer ionization in slow collisions of He^{++} with Hg. A. Niehaus and M.W. Ruf	1040
45.09	Asymmetric charge transfer between atomic ions and atoms below a few eV. Y. Kaneko, M. Namiki and N. Kobayashi	1042
45.10	Inelastic collisions of molecular ions in the injected ion drift tube. J.B. Hasted, K. Naveed-Ullah and K. Birkinshaw	1044
45.11	Vibronic excitation in ion-molecule collisions. G.H. Bearman, H.H. Harris, J.J. Leventhal and J.D. Kelley	1046
45.12	Partial charge transfer in low energy collisions of Ar^{++} . W. Lindinger, E. Alge, H. Störi, P. Helm, M. Pahl and R.N. Varney	1048
45.13	Low energy charge transfer collisions of He^+ with N_2 . C.F. Giese, H. Udseth and W.R. Gentry	1050
45.14	Spin dependence of the resonance charge transfer. V.D. Ob'edkov	1052
45.15	Calculation of charge-transfer cross sections for $\text{Cs}^+ + \text{Rb} \rightarrow \text{Rb}^+ + \text{Cs}$ (adiabatic potential energy for CsRb^+). A. Valance	1054
45.16	Flow-drift system for the investigation of the energy dependence of ion-neutral reactions. W. Lindinger, E. Alge, P. Holzmann, H. Störi, P. Helm, M. Pahl and R.N. Varney	1056
45.17	Internal energy of CH^+ produced by the reaction $\text{C}^+(\text{H}_2, \text{H})\text{CH}^+$ W.S. Koski, C.A. Jones and K.L. Wendell	1058

46. THRESHOLD EFFECTS IN IONIZATION (ELECTRONS AND PHOTONS)

46.01	The geometry of escape in multiple ionization near threshold. A.R.P. Rau	1060
46.02	Post collision interaction in the xenon $\text{N}_{4,5}\text{-OO}$ Auger spectrum excited by photon impact. V. Schmidt, N. Sandner, W. Mehlhorn, F. Wuilleumier and M.Y. Adam	1062
46.03	Correlation effects in the inner and outer shell ionization of noble gas atoms by electrons. W. van de Water, J. van Eck and H.G.M. Heideman	1064
46.04	Triple differential cross sections for electron impact ionization of helium at 30 to 35 eV collision energy. E. Schubert, A. Schuck, K. Jung and H. Ehrhardt	1066
46.05	Experimental verification of the threshold law for double ionization by electron impact. F.B. Kets, H.G.M. Heideman and W.P. Ingenegeren	1068

47. IONIZATION BY ELECTRON IMPACT

47.01	Mass spectrometric study of the electron impact ionization of the rare gases. T.D. Märk, F. Egger, E. Hille, M. Cheret, H. Störi and K. Stephan	1070
47.02	Atomic energy levels in xenon. P. Marmet and R. Dutil	1072
47.03	Ionization of an atom by electron impact in the semiclassical approximation. M.A. Braun and V.I. Ochkur	1074
47.04	Cross section for single and double electron impact ionization of CO ₂ . T.D. Märk and E.Hille	1076
47.05	Absolute measurements of the electron impact ionization cross sections of carbon, nitrogen and oxygen atoms. E. Brook, M.F.A. Harrison and A.C.H. Smith	1078
47.06	Total ionization cross sections of hydrogen sulfide by electron impact. D.S. Belić and M.V. Kurepa	1080
47.07	Ionization of positive ions by electrons in the concentric beam equipment. J.B. Hasted, M. Hamdan and K. Birkinshaw	1082
47.08	Absolute cross sections for electron impact double ionization of Na ⁺ ions. W.E. Sayle, II and R.K. Feeney	1084
47.09	Electron impact ionization of C IV and N V. D.H. Crandal, P.O. Taylor and R.A. Phaneuf	1086
47.10	Ionization of nitrogen, oxygen, neon and argon positive ions by electron impact. E.D. Donets and V.P. Ovsyannikov	1088

48. ELECTRON IMPACT EXCITATION OF IONS

48.01	Autoionizing states of ionized sodium. W. Eissner, D.L. Moores and D. Petrini	1092
48.02	The resonant scattering of a charged particle on a sum of attractive Coulomb and short-range potentials. I.Yu. Yurova	1094
48.03	Exchange effects in weak-coupling theories for inelastic electron-positive ion scattering. J.M. Peek	1096
48.04	The calculation of cross-sections for electron-impact excitation of hydrogenic ions. A critical survey of various approximations. M.A. Hayes and M.J. Seaton	1098
48.05	Absolute cross sections for electron impact excitation of C ⁺³ . P.O. Taylor, R.A. Phaneuf, D. Gregory, G.H. Dunn and D.H. Crandall	1100
48.06	Resonances in the electron impact excitation of C ⁺³ . J. Callaway, J.N. Gau, R.J.W. Henry and D.N. Oza	1102
48.07	Electron excitation of beryllium like ions. A.E. Kingston, K.A. Berrington, P.G. Burke and P.L. Dufton	1104
48.08	Electron impact excitation cross sections in intermediate coupling : a critical discussion of first order relativistic corrections. W. Eissner and H.E. Saraph	1106
48.09	Auger ionization and excitation fluorescence in electron-ion collisions. Y. Hahn	1108
48.10	Depolarisation of nuclei in hot plasma. M.A. Kozhushner	1110

- 48.11 Electron impact excitation of lithium-like ions by a simple distorted wave method.
M.A. Ali and A.K. Bhatia

1111

49. INELASTIC TRANSITIONS IN HEAVY PARTICLE COLLISIONS THEORY

- 49.01 Low-velocity symmetric resonant charge transfer with momentum trans-
lation factors.
D.S.F. Crothers and J.G. Hughes 1114
- 49.02 Extension of the Born approximation using velocity dependent molecular
orbitals.
A. Russek and B. Andresen 1116
- 49.03 The united atom approximation and the quadratic energy splitting for
 $\Sigma-\Pi$ transitions in close atomic transitions.
Yu.N. Demkov and V.N. Ostrovsky 1118
- 49.04 Transition operators for atom-atom collisions : a variational approach.
D.A. Micha and Z. Kuruoglu 1120
- 49.05 Electron translation factors in the theory of slow atomic collisions.
W.R. Thorson and J.B. Delos 1122
- 49.06 Semiclassical many-trajectory scattering matrix for slow atomic
collisions.
E.I. Dashevskaya 1123
- 49.07 Analytical calculation of radial couplings between approximate
wavefunctions.
A. Riera and A. Macias 1124
- 49.08 Reaction coordinate theory of $H^+ + D \rightarrow H + D^+$.
W.R. Thorson and J.B. Delos 1126
- 49.09 The formal definition of diabatic states.
J.B. Delos and W.R. Thorson 1128
- 49.10 On diabatic representations.
A. Tip and F.R. McCourt 1129
- 49.11 Transition operators for atom-atom collisions : the Hilbert-Schmidt
expansion.
D.A. Micha and J. Olson 1130
- 49.12 Transition operators for atom-atom collisions : a variable-phase and
-amplitude method.
D.A. Micha and L. Beard 1132
- 49.13 Finite element method for atom-molecule reactive scattering.
A. Askar, A.S. Cakmak and H. Rabitz 1134
- 49.14 Explicit integration method for the time-dependent Schrödinger
equation for collision problems.
A. Askar and A.S. Cakmak 1136
- 49.15 A semiclassical theory of the atom-diatom collisions.
Yu.S. Sayasov 1138
- 49.16 A model of linear terms for $2p\sigma-2p\pi$ transitions.
G.N. Ogurtsov 1140
- 49.17 Crossing matrix elements in an adiabatic basis.
P.T. Greenland 1142
- 49.18 Field theoretic treatment of vibro-rotational energy transfer in
molecule-molecule collisions.
E. Ficocelli Varracchio 1143
- 49.19 Stueckelberg phases : the two-state exponential model.
D.S.F. Crothers 1144

50. CHEMI-IONIZATION AND ASSOCIATIVE IONIZATION

50.01	A merged-beam study of the associative ionization reaction $N+O \rightarrow NO^++e$.	
	W.R. Gentry and G. Ringer	1146
50.02	Associative ionization in N-O collisions : classical theory.	
	J.S. Dahler and S.E. Nielsen	1148
50.03	Associative ionization of alkali metal atoms.	
	A.N. Klucharev, A.Z. Devdariani, V.Yu. Sepman and V. Vujnovic	1150
50.04	Thermal energy chemi-ionization of alkali dimers by molecules.	
	E.W. Rothe, B.P. Mathur and G.P. Reck	1152
50.05	Ion pair formation and atom abstraction in collisions of alkali atoms with high electron affinity hexafluorides.	
	B.K. Annis and S. Datz	1154
50.06	Chemi-ionization from excited Na(3 ² P) collisions with simple molecules.	
	G.P. Reck, E.W. Rothe and B.P. Mathur	1156
50.07	The effect of electric field upon an elementary act of interaction of the atomic systems.	
	F.I. Dalidchik and V.Z. Slonim	1158
50.08	Distribution of energies of electrons produced in associative ionization.	
	P. Vasu, H.H. Lo and W.L. Fite	1160
50.09	Ion pair formation in collisions between alkali atoms and several non-halogen molecules.	
	A.W. Kley, M.M. Hubers and J. Los	1162
50.10	Differential cross sections, in energy and angle, for alkali-halogen charge transfer reactions.	
	M. Kimura and K. Lacmann	1164
50.11	Collisional ionization between cesium and water.	
	R.J. Warmack, J.A.D. Stockdale and R.N. Compton	1166
50.12	Collisional ionization reactions between alkali atoms and some methane derivatives.	
	R.N. Compton, P.W. Reinhardt and C.D. Cooper	1168

51. ATOMIC AND MOLECULAR PHOTOIONIZATION

51.01	Configuration interaction satellites in the photoelectron spectrum of helium.	
	F. Wullemier, M.Y. Adam, N. Sandner, V. Schmidt and W. Mehlhorn	1170
51.02	The photodetachment cross sections for the alkali negative ions in the vicinity of the 2 ² P channel openings.	
	K.T. Taylor, S.E. Novick, J. Slater, T.J. Mulloney, D.W. Norcross and W.C. Lineberger	1172
51.03	Potential-barrier effects in inner shell photoionization and its influence on the anisotropy of X-rays and Auger electrons.	
	E.G. Berezhko, N.M. Kabachnik and V.S. Rostovsky	1174
51.04	The Fano effect on lead atoms.	
	U. Heinzmann	1176
51.05	Multiconfiguration Hartree Fock calculation of photoionization cross sections.	
	L. Armstrong Jr. and J.R. Swanson	1178
51.06	Study on the relative importance of various many-body effects in atomic transitions.	
	T.N. Chang	1180

51.07	Dissociative photoionization of H_2 through a $1\Sigma_u^+$ resonance state. K. Kirby-Docken, S.L. Guberman and A. Dalgarno	1181
51.08	Electron-molecule scattering and molecular photoionization cross sections by multiple-scattering methods. Dan Dill and J.L. Dehmer	1182
51.09	A theoretical study of the photoionization of N_2 . T.N. Rescigno, C.F. Bender, V. McKoy and P.W. Langhoff	1184
51.10	High resolution photodetachment electron spectrometry of negative ions. F. Breyer, P. Frey and H. Hotop	1186
51.11	Photoelectron branching ratios and dipole oscillator strengths for excitation, ionization and fragmentation of NH_3 up to 60 eV. C.E. Brion, A. Hamnett, G.R. Wight and M.J. Van der Wiel	1188
51.12	Ionization of highly-excited atoms by electric fields. J.G. Leopold and D. Banks	1190
51.13	Measurement of branching ratios for the photoionization of atomic oxygen at 304 Å. E.R. Constantinides, W.K. Peterson, G.A. Victor and J.P. Doering	1191
51.14	The angular distribution and polarization of photoelectrons in the region of autoionizing states of neon and argon. V.V. Balashov, A.N. Grum-Grzhimailo, N.M. Kabachnik, A.I. Magunov and S.I. Strakhova	1192
51.15	Effects of laser pulse duration on the spin polarization of electrons, obtained by two-photon ionization of Cs. M.J.M. Beerlage, E.H.A. Granneman, M. Klewer, G. Nienhuis and M.J. van der Wiel	1194
51.16	Angular distribution of Cl 3s $\rightarrow$ sp photoelectrons : direct evidence for anisotropic final state interactions. A.F. Starace, S.T. Manson and R.H. Rast	1196
51.17	Relativistic calculations of photoionization cross sections of positive ions. S.T. Manson and W. Ong	1198
51.18	Electron correlation in the forbidden shake-up process due to k-shell photoionization. J. Mizuno, T. Ishihara and T. Watanabe	1200
51.19	Cross-sections for the photoabsorption of sodium by complex coordinate method. C.V. Sukumar and K.C. Kulander	1202
51.20	On the 5s, 5p X-ray photoelectron spectrum in Xe. G. Wendin	1203
51.21	Ab-initio study of the photoionization of the lowest 3p state of neon. T.N. Rescigno and A.U. Hazi	1204
51.22	The ionization of metastable rare gas atoms (He^* , Ne^* , Ar^* , Kr^* and Xe^*) by electron and by photon impact. M.R. Flannery, K.J. McCann and D. Ton-That	1205
51.23	Studies of Ar and N_2 using threshold photoelectron spectroscopy by electron attachment (TPSA). A. Chutjian and J.M. Ajello	1206
51.24	Branching ratios and partial cross-sections for the photoionization of Ar and H_2O by the dipole ($e, 2e$) method. C.E. Brion and K. Tan	1208
51.25	Ab initio study of H_2 photoelectrons angular distributions. N. Chandra	1210
51.26	Photon and electron scattering involving resonance states of Li_2 . D.K. Watson, K. Kirby-Docken and A. Dalgarno	1212
51.27	Resonant processes in the photoionization of NO. C.V. Sukumar and C. Bottcher	1213
51.28	The oscillator-strength distribution of water. A comparison of new photoabsorption and electron energy-loss measurements. J.C. Person, R.H. Huebner, R.J. Celotta and S.R. Mielczarek	1214

51.29	Oscillator strength determinations in the chloro-fluoro-methanes using 500 eV electron impact. G.C. King and J.W. McConkey	1216
51.30	Field ionization of molecules. F.I. Dalidchik and V.Z. Slonim	1218
51.31	The quantum defect considered as an analytic function of both n and Z , for two- electron systems. L. Lipsky and M.J. Conneely	1220
51.32	5d excitations in U and Th observed both by photoabsorption and electron energy loss spectra. M. Cukier, P. Dhez, B. Gauthe, P. Jaegle, Cl. Wehenkel, F. Combet-Farnoux	1222

52. ELECTRON IMPACT INNER SHELL EXCITATION AND IONIZATION

52.01	Inner shell excitation of Ar, Kr and Xe by high resolution electron impact. G.C. King, M. Tronc, F.H. Read and R.C. Bradford	1226
52.02	K-shell excitation in molecules using electron impact with high resolution. M. Tronc, G.C. King, R.C. Bradford and F.H. Read	1228
52.03	Electron impact double ionization of the K-shell of Cr and Fe. J. Saijonmaa, O. Keski-Rahkonen	1229
52.04	Inner shell excitation of CH_3F , CH_3Cl , CH_3Br and CH_3I by 2.5 keV electron impact. C.E. Brion and A.P. Hitchcock	1231
52.05	A theory of coincidence measurements in atomic inner shell impact ionization. E.G. Berezhko, N.M. Kabachnik and V.V. Sizov	1233
52.06	K-shell ionization of Au by 10-20 MeV electrons and positrons. E. Salzborn, E. Bentz, A. Müller, U. Schiebel and H. Tawara	1235
52.07	Z and E dependence and scaling behaviour of the K-shell ionization cross section for relativistic electron impact. H. Genz, D.H.H. Hoffmann, W. Löw and A. Richter	1237
52.08	Ionization cross sections for positrons and electrons. P.S. Takhar and T.S. Gill	1239

53. HEAVY PARTICLE COLLISIONS NEGATIVE ION DETACHMENT

53.01	Differential study of H^- inert gas collisions. V. Esaulov, D. Dhuicq and J.P. Gauyacq	1242
53.02	Cross sections for Lyman- α production from H^- on various gases. G.B. Greenland, R.A. Falk, M. Harnois and R. Geballe	1244
53.03	Electron detachment in Cl^- -Ar collisions. C. De Vreugd, R.W. Wijnaendts Van Resandt and J. Los	1245
53.04	Electron detachment and inelastic processes in Cl^- rare gas systems. J. Fayeton, D. Dhuicq and J. Pommier	1246
53.05	Destruction of negative ions in slow collisions with atoms. V.M. Borodin	1248

- 53.06 Excitation and decay of vibrational autodetaching states of N_2^- produced in collisions of H^- with N_2
J.S. Risley 1250
- 53.07 Inelastic scattering and electron detachment in collisions of Cl^- with H_2 and D_2 ($3.4 < E_{CM} < 55$ eV).
J.T.K. Cheung and S. Datz 1252
- 53.08 Relative differential cross sections for neutralization of negative ions by collisional detachment.
L.D. Doverspike, B.T. Smith and R.L. Champion 1254

54. HEAVY PARTICLE COLLISIONS (MEDIUM AND LOW ENERGIES) OUTER SHELL EXCITATION BY H^+ AND He^+ ION IMPACT

- 54.01 Coupled-molecular-state treatment of electron transfer by He^{++} in H.
T.G. Winter and N.F. Lane 1256
- 54.02 Two-electron excitations in $He^{++} + He$ collisions.
S. Hara, H. Sato, F. Koike, Y. Itikawa, M. Matsuzawa, H. Nakamura and I. Shimamura 1258
- 54.03 Collision processes of $He^{++} + He$ and $He^+ + He^+$ systems.
H. Yagisawa, H. Sato and T. Watanabe 1260
- 54.04 Inelastic ($n=2$) differential cross sections for proton-helium scattering.
J.T. Park, J.M. George, J.E. Aldag and J.L. Peacher 1262
- 54.05 A measurement of the metastable fraction of the $n=2$ population of hydrogen atoms formed by electron capture of protons in cesium at 1, 1.5 and 2 keV.
G. Van Wassenhove, F. Brouillard and W. Claeys 1264
- 54.06 Determination of H^+ -Cs potential from elastic differential cross-section measurements at energies 13.4 and 24.2 eV.
H. Scheidt, G. Spiess, P. Pradel and A. Valance 1266
- 54.07 Molecular study of the H^+ -Cs collisional system.
V. Sidis and C. Kubach 1268

55. MULTIPHOTON AND LASER INDUCED PROCESSES

- 55.01 Two-photon processes : theory and application to H_2 and He.
J.C. Browne and P.L. DeVries 1272
- 55.02 Sum-over-states polarizability computations for ground and first excited states of the lithium atom.
L.T. Redmon and J.C. Browne 1274
- 55.03 Two-photon absorption in atomic gases.
M.S. Pindzola 1276
- 55.04 The modeling of multiphoton excitation.
B.W. Shore and J.H. Eberly 1277
- 55.05 Multiphoton resonances.
B.W. Shore 1278
- 55.06 High energy cross sections for simultaneous electron-photon excitation of S states of hydrogen.
N.K. Rahman and F.H.M. Faisal 1279
- 55.07 Electron-atom collision in the presence of a strong laser field.
H.S. Brandi, B. Koiller, L.C.M. Miranda and J.J. Castro 1280

55.08	Influence of fringing fields on the field induced quantum beats of atomic hydrogen. G.W.F. Drake	1282
55.09	Collisional redistribution of stimulated emission. M.G. Raymer and J.L. Carlsten	1284
55.10	Intensive source of radiation in the vacuum ultraviolet. V.P. Belik, S.V. Bobashev and L.A. Shmaenok	1286
55.11	Doppler-free two-photon absorption with a near-resonant intermediate state. D.P. Hodgkinson and J.S. Briggs	1288

56. EXPERIMENTAL TECHNIQUES

56.01	A new beam spectroscopy by means of Hadamard transform. T. Arikawa, M. Izawa and S. Kaneko	1290
56.02	A method for assessing metastable beam composition and the velocity dependence of the secondary electron yield from surfaces by metastables. W.L. Borst, G. Nowak and J. Fricke	1292
56.03	Calculated shape of TAC time spectra and "cable curves". P.J. Martin, V. Kempter, G. Riecke and L. Zehnle	1294
56.04	Photon catalysis : a sensitive analytical technique based on the repeated excitation-transfer-emission cycle. D.G. Sutton and G.A. Capelle	1296
56.05	Numerical trajectory calculations for a wedge-type magnetic sector field. J. Grüter and K. Köllmann	1298

POST DEAD LINE ABSTRACTS

20.14	Closed outer shell excitation of barium atoms by electrons impact. I.S. Aleksakhin, G.G. Bogachov, I.P. Zapesochnyi and S.Yu. Ugrin	1300
20.15	Excitation of magnesium atoms by monoenergetic electrons. O.B. Shpenik, I.P. Zapesochnyi, V.V. Sovter, E.I. Nepijpov, N.I. Romanjuk and I.S. Aleksakhin	1302
28.04	Dependence of (e^- ion) dissociative recombination on vibrational excitation. J.Wm. McGowan and J.B.A. Mitchell	1304
37.17	Proposed scheme to catch positrons in a Penning trap. H.G. Dehmelt, P.B. Schwinberg and R.S. Van Dyck Jr.	1306
42.09	Measurements of excitation functions in crossed beams of metastable helium atoms and electrons. A.D. Khakhaev, V.A. Gostev and Yu.V. Saitsev	1308
47.11	Ionization and fragmentation of Cs_2 by electron impact. M. Miletič, R. Maksić and K.F. Zmbov	1310
48.12	The influence of exchange on the ion-electron collisions. L.A. Vainshtein	1311
55.12	Evidence for multiphoton absorption/emission by an electron in a free-free transition experiment. A. Weingartshofer, J. Holmes, G. Caudle and E.M. Clarke	1312

11.19	Comparison of prompt and time-delayed electron decay-in-flight spectra of gas excited carbon ions. D. Schneider and N. Stolterfoht	1314
27.12	A simple method to calculate total elastic cross sections of electrons and ions collisions with atoms. V.M. Sergeev	1316
27.13	Diagram method in the theory of electron and atomic collisions. Yu.A. Kucharenko	1318
47.12	Measurements of the absolute cross sections for the ionization of refractory metals by electron impact. V.I. Rakhovskii, V.G. Nekrashevitch and V.M. Shustriakov	1320
