

CONTENTS

Commemoration meeting

Opening address	
F. A. Bopp	1
Arnold Sommerfeld als Mensch, Lehrer und Freund	
P. P. Ewald	8
Sommerfeld's role in the development of early quantum theory	
A. Hermann	17
The history of quantum theory in the light of the successive editions of Sommerfeld's Atombau und Spektrallinien	
B. L. Van der Waerden	21
Impact of Sommerfeld's work on solid state research and technology	
H. Welker	32
Significance of Sommerfeld's work today	
W. Heisenberg	44

Joint session of the commemoration meeting and the symposium

On quantum mechanics of atomic structure	
H. A. Bethe	55
Optical methods of radiofrequency spectroscopy	
A. Kastler	68
Spectroscopy by means of shockwaves	
O. Laporte	95

Symposium. a) Atomic constants and spectroscopy

Experiments on atomic constants and the numerical value of the Sommerfeld fine structure constant	
E. R. Cohen	117
A measurement of the Sommerfeld fine structure constant by level crossing in atomic hydrogen	
J. C. Baird, H. Metcalf, J. Brandenberger, K-I. Gondaira	139
A determination of g_J/g_p in atomic hydrogen	
P. F. Winkler, F. G. Walther, M. T. Myint, D. Kleppner	146
Electric dipole moments of atoms. An upper limit to the electric dipole moment of the electron	
M. C. Weisskopf, E. Lipworth	152

The electric dipole moment of the neutron V. W. Cohen	159
Hunting the neutron electric dipole moment N. F. Ramsey	170
Survey of the theory of quantum electrodynamics N. M. Kroll	179
Theory of the Lamb shift G. W. Erickson	193
The hyperfine structure in the ground state of the one-electron atom C. Iddings	203
Atomic hydrogen hyperfine structure N. F. Ramsey	218
H.f.s. spectrum of ${}^3\text{He}^+$ by the ion storage collision technique H. G. Dehmelt	235
Correspondence identities I. C. Percival	252
Spontaneous two-photon transitions in hydrogen and helium A. Dalgarno	261
Coherence effects in the interaction of radiation with atoms G. W. Series	268
The two-photon decay of the metastable helium ion R. Novick	296
Light shifts and multiple quantum transitions C. Cohen-Tannoudji	326
Fine structure and hyperfine structure of ${}^4\text{He}$ and ${}^3\text{He}$ J. P. Descoubes	341
Spectroscopy of atomic excited states by electronic impact excitation J. C. Pebay-Peyroula	348
Spectroscopy of excited states: photon excitation H. Bucka	362
Zero field level-crossing in stepwise excitation of cadmium W. Hanle, R. Pepperl, H. Reuscher	375
Level crossing experiments in the Mn I-spectrum E. Handrich, A. Steudel, R. Wallenstein, H. Walther	380
Periodic intensity fluctuations in beam foil excited hydrogen P. M. Griffin, J. A. Biggerstaff, I. A. Sellin, C. D. Moak	387
Excitation of the $n = 5$ states of He^+ in beam-foil collisions J. A. Jordan Jr., G. S. Bakken, L. A. Spitzberg, R. E. Yager	393
Study of some atomic spectra with excited ion beams A. Denis, J. Desesquelles, M. Dufay	399
Muonium and positronium V. W. Hughes	407
Recent progress in muonic atoms C. S. Wu	429
Measurements and calculations on pionic atoms C. Backenstoss, S. Charalambus, H. Daniel, H. Koch, M. Krell, G. Poeltz, H. Schmitt, L. Tauscher	479

Isotope shifts of K X-rays and nuclear charge radii F. Boehm	487
Photoproduction of electron pairs at high energies P. Joos	500
 <i>Symposium. b) Atomic collision processes</i>	
The theory of the collisions of electrons with one- and two-electron atoms and ions H. S. W. Massey	511
The scattering of electrons by hydrogen and by helium atoms P. G. Burke	543
Continuum atomic processes K. Smith	559
Survey on electron-atom collision experiments S. J. Smith	574
Recent experimental progress in e-H, e-He ⁺ and e-He resonance scattering H. Ehrhardt	598
Polarization of atomic line radiation H. Kleinpoppken	612
Polarization of the singulet transitions of He excited by proton impact A. Scharmann, K.-H. Schartner	632
High resolution impact spectroscopy of helium H. Boersch, J. Geiger, B. Schröder	637
Summary of recent spin-analyzed electron-potassium differential cross section measurements B. Bederson, R. E. Collins, M. Goldstein, K. Rubin	642
Asymptotic form of wave function for the ionization problem R. Peterkop	649
Theory of electron impact ionization of atoms. Calculation of the threshold law A. Temkin	655
The photoionization of one- and two-electron atoms L. M. Branscomb	669
Theory and observation of relativistic bremsstrahlung especially of the elementary process G. Elwert	700
Electron beam polarization by spin exchange collision P. S. Farago, H. Chr. Siegmann	715
Polarized electrons from polarized atoms W. Raith	727
Polarized electrons by scattering E. Reichert	744
Heavy particle collision spectroscopy F. T. Smith	755

Depolarization by collisions	
A. Omont	777
State-transfer collisions	
A. Gallagher	788
Energy distribution of electrons from ionization of helium and hydrogen by proton collisions: comparison of classical theories and experi- ment	
M. E. Rudd, D. Gregoire	795
 <i>Symposium. c) Application on Astrophysics</i>	
Hydrogenic spectral lines in radio astronomy	
P. G. Mezger	801
Line broadening	
H. Schltter	824
Dielectronic recombination and competing processes	
E. Trefftz	839
X-radiation of the sun	
G. Elwert	854
Author index	873
