

## CONTENTS

### Foreword

v

### I. FREE-FREE RADIATION AND SCATTERING

#### The Inverse Bremsstrahlung Absorption Coefficient in Strongly Coupled Plasmas

*R. Cauble, W. Rozmus & J. Davis*

3

#### Can Simple Methods and Simple Potentials be Used in Obtaining Free-Free Gaunt Factors for Strongly Coupled Aluminum Plasmas?

*M. Lamoureux, R. Cauble, L. Kim, F. Perrot & R. H. Pratt*

15

#### Continuum Emission (both Isotropic and Polarized) in a Laser-Plasma Described by a Fokker Planck Simulation

*M. Lamoureux, J. P. Matte, C. Möller & R. Y. Yin*

33

#### Comparison of Models for the Free-Free Gaunt Factor at Low Temperatures and Frequencies

*L. A. Collins & A. L. Merts*

57

#### Computation of Angle Averaged Cross Sections in a Degenerate Compton Scattering Medium

*J. M. Pochkowski, G. H. Nickel & W. F. Bailey*

77

#### Optical Potential Approach for Scattering of Electrons by Ions

*D. H. Oza & J. Callaway*

84

### II. X-RAY SPECTROSCOPY, THEORY AND EXPERIMENT

#### Non-Thermal Effects in a Hot Dense Plasma

*L. A. Jones*

107

#### X-Ray Spectroscopy and Determining Plasma Dynamics

*R. L. Kauffman, K. G. Estabrook & R. W. Lee*

128

#### Sub-KeV X-Ray Emission from Laser-Produced Plasmas

*K. Eidmann, T. Kishimoto, G. D. Tsakiris, R. F. Schmalz,  
R. Sigel & S. Witkowski*

136

#### X-Ray Spectroscopy of Ne-Like and Na-Like Strontium Ions

*J. C. Gauthier, J. P. Geindre, P. Monier, C. Chenais-Popovics,  
J. F. Wyart & E. Luc-Koenig*

154

Radiative Emission near Critical Density in Laser-Produced Plasma <i>P. G. Burkhalter, J. P. Apruzese &amp; D. Duston</i>	170
Argon Puff Gas Soft X-Ray Laser <i>J. Davis, J. P. Apruzese, C. Agritellis &amp; P. Kepple</i>	197
Collective Vector Method for Calculation of E1 Moments in Atomic Transition Arrays <i>S. D. Bloom &amp; A. Goldberg</i>	230
Photoionization and Photorecombination Cross Sections of Non-Hydrogenic States in Plasmas <i>B. F. Rozsnyai &amp; V. L. Jacobs</i>	264
<b>III. RADIATIVE TRANSFER AND OPACITY</b>	
Radiation Transport Phenomena affecting X-Ray Laser Design <i>J. P. Apruzese</i>	293
Studies of the Solution of a Radiation Transfer Benchmark <i>L. Yobs, J. M. Salter &amp; R. W. Lee</i>	324
Physics of Partial Redistribution and Radiative Transfer in Stellar Atmospheres <i>J. L. Linsky</i>	333
A Fast Accurate Code for Hydrogen and Helium Opacities <i>T. R. Carson</i>	374
<b>IV. EQUATION OF STATE, RATE EQUATIONS AND ELECTRODYNAMICS</b>	
Electrical Conductivity of Dense Plasmas at Temperatures of .5 to 1.0 eV <i>S. W. Daniels, H. R. Griem &amp; A. D. Krumbein</i>	389
Density Fluctuations and Channel Mixing Effects in the Absorption of Light by Dense Plasmas <i>F. Grimaldi, A. Grimaldi-Lecourt &amp; M. W. C. Dharma-wardana</i>	403
Atomic Process Calculations in Hot Dense Plasmas using Average Atom Models <i>G. Velarde, J. M. Aragones, L. Gamez, J. J. Honrubia, J. M. Martinez-Val, E. Minguez, J. L. Ocaña, J. M. Perlado &amp; J. F. Serrano</i>	433

Ion Microfields in Plasmas with Strong Electron-Ion Interactions Density-Functional Theory <i>M. W. C. Dharma-wardana &amp; F. Perrot</i>	462
Solid Density, Low Temperature Plasma Formation in a Capillary Discharge <i>D. R. Kania, L. A. Jones, M. D. Maestas &amp; R. L. Shepherd</i>	483
A Time-Dependent Ionization Balance Model for Non-LTE Plasma <i>Y. T. Lee, G. B. Zimmerman, D. S. Bailey, D. Dickson &amp; D. Kim</i>	495
The Ponderomotive Force: Derivation of the Stress-Tensor for High- Frequency Radiation in Isotropic Dispersive Matter by Generalisation of the Helmholtz Method <i>B. J. B. Crowley</i>	534
