

## CONTENTS

<i>Preface</i>	v
<b>1. INTRODUCTION</b>	1
1.1 What Is Atomic Absorption Spectroscopy?	1
1.2 The Beer-Lambert Law	8
1.3 Advantages of Atomic Absorption Spectroscopy	10
1.4 Comparison of Atomic Absorption and Atomic Emission	11
1.5 Conclusion	14
Reference	14
<b>2. EQUIPMENT</b>	15
2.1 The Optical System	15
2.2 Absorption Line Width	20
2.3 The Hollow Cathode	22
2.4 The Monochromator and Slit System	29
2.5 Detectors	33
2.6 Atomizers	35
2.7 Modulation of Equipment	40
References	43

<b>3. ANALYTICAL PARAMETERS</b>	<b>44</b>
3.1    Choice of Absorption Line	44
3.2    Degree of Absorption	48
3.3    Flame Atomizers	50
3.4    Cations	59
3.5    Anions	59
3.6    The Effect of Different Solvents	62
3.7    The Effect of Resolution on Sensitivity	71
3.8    The Effect of Changing the Slit Width	72
3.9    Excitation Interference	74
3.10   Radiation Interference	75
3.11   Chemical Interference	76
3.12   Matrix Effect	77
References	78
<b>4. ANALYTICAL APPLICATIONS</b>	<b>79</b>
4.1    Quantitative Analytical Range	79
4.2    Sensitivity Limits	81
4.3    Qualitative Analysis	81
4.4    Quantitative Analysis	83
4.5    Recommended Procedures for Quantitative Analysis	83
Reference	114
<b>5. QUANTITATIVE ANALYSIS AND TREATMENT OF DATA</b>	<b>115</b>
5.1    Introduction	115
5.2    Reliability of Results	116
Reference	131
<b>6. ATOMIC FLUORESCENCE</b>	<b>132</b>
6.1    Introduction	132

6.2	Mathematical Relationships	133
6.3	Advantages of Atomic Fluorescence	136
6.4	Limitations of Atomic Fluorescence	137
6.5	Analytical Parameters	137
6.6	Types of Fluorescence	139
6.7	Equipment	143
6.8	Nondispersive Atomic Fluorescence Systems	149
6.9	Analytical Applications	152
6.10	Determination of Metals by Atomic Fluorescence Measurements	153
6.11	Conclusion	157
	References	158
<b>7.</b>	<b>OTHER ATOMIZATION PROCESSES</b>	<b>159</b>
7.1	Introduction	159
7.2	The L'vov Furnace	161
7.3	The Carbon Filament Method	162
7.4	Tantalum Metal Atomizers	166
7.5	The Massman Furnace or Heated Graphite Atomizer	166
7.6	The Mini-Massman Atomizer	167
7.7	The Carbon Bed Atomizer Heated by Radiofrequency	169
7.8	The Hollow "T" Atomizer	172
7.9	Practical Applications of Nonflame Atomic Absorption Spectroscopy	176
7.10	Conclusions	176
	References	177
<b>INDEX</b>		<b>179</b>
