

## Contents

	Page		Page
1. Introduction.....	1	12.2. Expressions for $a_E$ and $a_H$ .....	41
2. Reproducibility of observations.....	2	12.3. Practical expressions of $k(s)$ .....	42
3. Catalytic activity of various pure metals and alloys.....	8	12.4. Rate equations in terms of $k(s)$ .....	43
4. Reaction kinetics of catalyzed hydrogenation.....	13	12.5. Steady state of catalyzed hydrogenation.....	43
5. Reactions associated with the catalyzed hydrogenation...	17	12.6. Rates of reaction associated with the catalyzed hydrogenation.....	46
5.1. Experimental methods.....	18	13. Estimate of $k(s)$ 's.....	48
5.2. Modern observations.....	20	13.1. Estimate of $k(I_a)$ .....	48
6. Isotopic effect on hydrogenation rate.....	25	13.2. Estimate of $k(I_b)$ .....	49
7. Supported catalysts.....	27	13.3. Estimates of $k(II)$ and $k(III)$ .....	49
8. Carbided catalysts.....	30	13.4. Rates based on the estimated $k(s)$ 's.....	50
9. Reaction mechanisms.....	32	14. Application of the theory of the associative mechanism...	53
9.1. Dissociative mechanism.....	32	14.1. Switchover in the rate-determining step.....	53
9.2. Associative mechanism.....	32	14.2. Activation heat of hydrogen exchange.....	53
9.3. Twigg and Rideal's mechanism.....	34	14.3. Retardation of parahydrogen conversion and $^1H_2$ - $D_2$ equilibration by the presence of ethylene.....	54
9.4. Jenkins and Rideal's mechanism.....	35	14.4. The relation between equilibrium fraction, $u$ , and deuterium atom fraction, $x_H$ , of hydrogen.....	55
9.5. Redistribution mechanism.....	36	14.5. Changes in $V_{A_n}$ 's with temperature and partial pressures of reactants.....	56
9.6. Adsorbed state of intermediates.....	36	14.6. "Random distribution" of deuterium in ethylene and ethane in the deuteration of light ethylene.....	57
10. Current theoretical treatments.....	36	14.7. Isotopic effect on hydrogenation rate.....	58
10.1. Outline.....	36	15. Application of the theory of absolute rates.....	59
10.2. Critical review of current treatment.....	38	16. Concluding remark.....	61
11. Statistical mechanical formulation of rates.....	39	17. References.....	61
11.1. Outline.....	39		
11.2. Function $a_1$ .....	40		
12. Statistical mechanical formulation of the associative mechanism.....	41		
12.1. Formulation of $k(s)$ .....	41
