

INDEX OF PAPERS

<u>Paper No.</u>	<u>Title</u>	<u>Page No</u>
A.1	Recent TFR ICRF Experiments	1
A.2	Experimental Results and Transport Simulation of ICRF Heating in PLT	13
A-A.1	Energy Absorption Rate by the Shear Alfvén Wave in the Tokapole II Experiment	24
A-A.2	Experimental Studies of Shear Alfvén Resonance in a Tokamak	28
A-A.3**	Theoretical Investigation of Alfvén Wave Heating in Non-Axisymmetric Toroidal Geometry	--
A-E.1	ECRF Heating at $2\omega_{ce}$ in the Phaedrus Tandem Mirror	32
A-E.2	Electron Cyclotron Resonance Heating in Realistic Tandem Mirror Configurations	36
A-E.3	Preliminary Electron Cyclotron Heating Results on Doublet III Using the Outside Launch	41
A-E.4	The 60 GHz Transmission System for the Doublet III Electron Cyclotron Heating Experiment	45
A-1.1	Effect of Low Frequency Oscillations on Ion Cyclotron Resonance Heating	49
A-1.2	Bounce Averaged ICRH for Toroidal Devices	53
A-1.3	A Model of the TMX-U ICRH Experiment	57
A-1.4	ICRF Pumping in the TMX-U Transition Region	61
A-1.5	Initial ICRF Heating Experiments in the TMX-U Central Cell	68
A-L.1**	Finite-Bandwidth Effects on Lower Hybrid Current Drive	--
A-L.2	A Computational Model for Lower-Hybrid Current Drive	72
A-L.3	Lower-Hybrid Current Drive and Heating Experiments on the Versator II Tokamak	76
A-L.4	Study of Driven Lower-Hybrid Waves in Alcator C Using CO ₂ Laser Scattering	80
A-L.5	Effect of Wall Corrugations on Lower Hybrid Wave Launching and Reflection	84
B.1	Lower Hybrid Current Drive and Heating Experiments at the 1 MW Level in Alcator C	88

** Manuscript Not Submitted

B.2	Determination of the Electron Velocity Distribution From the Hard and Soft X-Ray Emission During Lower Hybrid Current Drive on PLT	96
B-A.1	RF Current Drive Experiments on the Proto-Cleo Stellarator	104
B-A.2	Fusion Reactions in RF Plasma Cavities	109
B-A.3	Spheromak Heating with Alfvén Waves	113
B-E.1	Power Deposition Profiles in Maxwellian Magneto-Active Plasmas	117
B-E.2	A Quasi-Optical ECRH Beam System for MFTF-B	122
B-1.1	Design Studies for the JET ICRF Antenna	126
B-1.2	Tokamak Wave Coupling and Heating in the ICRF	130
B-1.3	RF Trapping and Heating at the Fundamental Ion Cyclotron Resonance in the Phaedrus Tandem Mirror End Cells	136
B-1.4	ICRH on the Wisconsin Levitated Octupole	140
B-1.5	Numerical Investigation of ICRF Antenna Designs and Heating Schemes for Alcator C	144
B-1.6	Cavity Launchers for ICRF	148
B-1.7	Design of a High Power ICRF Experiment for DIII	152
B-L.1	Stochasticity Induced by Coherent Wavepackets	156
B-L.2	Relativistic Two-Dimensional Theory of RF Current Drive	160
B-L.3	Lower Hybrid Current Drive with Opposing Ohmic Drive on PLT	164
B-L.4	Observation of Finite-Ion Larmor-Radius Effects on Lower-Hybrid Waves Near Resonance	168
B-L.5	Radial Reflection of Lower Hybrid Waves in Tokamaks	172
B-L.6	Wave Accessibility and Current-Drive Efficiency in a Small Aspect Ratio Tokamak (PLT)	176
C.1	Experiments on Hot Electron ECRH in TMX-U	180
C.2	Nonlinear Theory of Lower Hybrid Current Drive at Lower Densities	187
C-A.1	Observation of Density Fluctuations From Externally Driven Alfvén Waves	192
C-A.2	Comparison of Fourier Spectra of Antenna For Driving Alfvén Waves in PRETEXT	196

** Manuscript Not Submitted

C-A.3	Alfven Wave Impedance Measurements in the PRETEXT Tokamak	200
C-E.1	Relativistic Effects in Electron Cyclotron Heating	204
C-E.2	Electron Cyclotron Resonance Heating System for the Garching Stellarators WVII-A and WVII-AS	209
C-E.3	A Calculation of the Energy Deposition of Injected Gyrotron Waves in Stellarator Plasma	213
C-E.4	ECRH Induced Parametric Instabilities in Tokamaks	217
C-I.1	Test Facility for RF Heating Systems Component Development	221
C-I.2	Ion Cyclotron Heating for The ATF Torsatron	224
C-I.3	On the Hybrid-Ray Mode Formulation For Fast Wave Coupling in Tokamaks	228
C-I.4	Transport and Ray Tracing Studies of ICRF-Heated Tokamak Reactors	233
C-I.5	3-D Collisional MHD Analysis of ICRF Waves in Tokamaks	236
C-I.6	2-D Kintetic Analysis of ICRF Waves in Tokamaks	240
C-I.7	The Role of Axially-Evanescent Modes in RF Heating	244
C-I.8	Efficient Ion Heating Via FLR-ICRF in ACT-1	248
C-L.1	Design and R&D of RF Heating System for JT-60	252
C-L.2	Focusing of Lower Hybrid Rays	256
C-L.3**	Lower Hybrid Current Drive on ENCORE	--
C-L.4	Measurements of the Effect of Tokamak Magnetic Field Helicity on Lower Hybrid Resonance Cones	260
C-L.5	Eikonal Theory of the Transition to Phase Incoherence	264
C-L.6	Ion Heating and Enhanced Diffusion Due to Parametric Decay of Lower Hybrid Waves	268
D.1	Experiments on Shear Alfven Resonance in a Tokamak	272
D.2	Experimental and Theoretical Studies of Alfven Wave Propagation on the PRETEXT Tokamak	280
D-A.1	Ion Heating, Current Drive and Divertor Action Using Alfven Waves	284
D-A.2	Fully Analytic-Self Consistent Loop Antenna Theory	288

** Manuscript Not Submitted

D-A.3	Compressional Modes in Alfvén Wave Heating	292
D-E.1**	ICRH and ECRH Experimental Research on the Michigan Mirror Machine	--
D-E.2	The Generation and Maintenance of Stable High Pressure Microwave Arcs	296
D-1.1	Antenna-Plasma Coupling Theory for ICRF Heating	300
D-1.2	A Power Conservation Relation for Kinetic Wave Propagation in a Homogeneous Plasma	304
D-1.3	The Scaling of ICRF Heating to Reactor Plasmas	308
D-1.4	Spheromak ICRF Heating Studies at Low Power	313
D-1.5	ICRH Parameter Scaling Studies on STM-1	317
D-1.6	Mode Conversion and Absorption at the Third Harmonic	320
D-L.1	Ray Tracing Analysis of the Lower Hybrid Experiment on the Wisconsin Octupole	324
D-L.2	Plasma Current Start-Up by RF Only (EC & LH) on WT-2	330
D-L.3	A Unified Approach to Linear Mode Conversion	334
D-L.4	Analysis of experimental Data on Wave-Particle Interaction and Power-Absorption in the Lower-Hybrid Range	340
D-L.5	Simulation of Lower-Hybrid Heating Results By a Power Deposition Code	344

** Manuscript Not Submitted
