| FOREWORD TO VOLUME 1 .....        | vii |
| CONTRIBUTORS TO THIS VOLUME ..... | ix  |

### Chapter 1. Small-Disturbance Theories

*John F. Clarke*

|   |    |
|---|----|
| Introduction .....                                  | 1  |
| 1. General Equations .....                          | 3  |
| 2. The Small Disturbance Equations .....            | 9  |
| 3. Splitting of the Small Disturbance Problem ..... | 13 |
| 4. "Inviscid" Flows .....                           | 23 |
| 5. Steady-State Energy Transfer .....               | 48 |
| 6. Constant Pressure Approximations .....           | 55 |
| 7. Diffusion Flames .....                           | 60 |
| 8. List of Symbols .....                            | 66 |
| 9. References .....                                 | 68 |

### Chapter 2. Steady One-Dimensional Flow; Structure of Compression Waves

*Ernst Becker and Gert Böhme*

|   |     |
|---|-----|
| 1. Introduction .....   | 71  |
| 2. Fundamental Equations and Thermodynamic Relations .....              | 76  |
| 3. Some Thermodynamic Inequalities .....                                | 80  |
| 4. Small Deviations from Equilibrium .....                              | 82  |
| 5. Weak Nonlinear Waves .....   | 84  |
| 6. Steady Wave of Arbitrary Strength; One Internal State Variable ..... | 88  |
| 7. $q$ -Space Solutions for $n$ Internal State Variables .....          | 92  |
| 8. $q$ -Plane Solutions for Two Internal State Variables .....          | 96  |
| 9. Temperature Distribution .....                                       | 104 |
| 10. Shock Waves with Nonequilibrium Upstream Conditions .....           | 110 |
| 11. List of Symbols .....   | 115 |
| 12. References .....  | 116 |

### Chapter 3. **Relaxation in Gas-Particle Flow**

*George Rudinger*

|  |     |
|--|-----|
| 1. Introduction .....  | 119 |
| 2. Gas-Particle Interaction for Single Particles .....           | 121 |
| 3. Thermodynamic Properties of Gas-Particle Mixtures .....       | 127 |
| 4. General Equations for One-Dimensional Gas-Particle Flow ..... | 132 |
| 5. Shock Waves .....   | 135 |
| 6. Nozzle Flow .....   | 146 |
| 7. Nonsteady Flow .....  | 154 |
| 8. Concluding Remarks .....                                      | 158 |
| 9. List of Symbols .....   | 158 |
| 10. References .....   | 159 |

### Chapter 4. **Gasdynamics of Expansion Flows with Condensation, and Homogeneous Nucleation of Water Vapor**

*Peter P. Wegener*

|  |         |
|--|---------|
| Foreword .....                             | 163     |
| 1. Introduction .....                      | 164     |
| 2. Types of Condensation Processes .....   | 168     |
| 3. Homogeneous Nucleation .....            | 169     |
| 4. Cloud Chamber Experiments .....         | 187     |
| 5. Supersonic Flow with Condensation ..... | 191     |
| 6. Nozzle Experiments and Results .....    | 213     |
| 7. Comparison with Theory .....            | 226     |
| 8. Summary and Outlook .....               | 237     |
| 9. Acknowledgement .....                   | 237     |
| 10. List of Symbols .....                  | 238     |
| 11. References .....                       | 239     |
| <br>AUTHOR INDEX .....                     | <br>245 |
| SUBJECT INDEX .....                        | 250     |
