

Contents

Foreword	vii
Preface	ix
Introduction to Volume 4	xiii
Grouping of Materials and List of Figures and Tables	xvii

Theory, Estimation, and Measurement

<i>Notation</i>	1a
<i>Theory of Specific Heat of Solids</i>	3a
1. Introduction	3a
2. Definitions	3a
3. Dulong and Petit's Law	4a
4. Einstein's Specific Heat Theory	4a
5. Debye's Specific Heat Theory	5a
6. Electronic Specific Heat	6a
7. Magnetic Specific Heat	7a
8. Low-Temperature Specific Heat	8a
9. Normal and Superconducting Materials	8a
<i>Other Major Sources of Data</i>	9a
<i>Methods for the Measurement of the Specific Heat of Solids</i>	11a
1. Introduction	11a
2. Nernst-Type Adiabatic Vacuum Calorimeter	11a
3. Modified Adiabatic Calorimeter	11a
4. Drop Ice Calorimeter	12a
5. Drop Isothermal Water Calorimeter	13a
6. Drop Copper Block Calorimeter	14a
7. Pulse-Heating Method	14a
8. Comparative Method	15a
<i>References to Text</i>	17a

Numerical Data

<i>Data Presentation and Related General Information</i>	19a
1. Scope of Coverage	19a
2. Presentation of Data	19a
3. Symbols and Abbreviations Used in the Figures and Tables	19a
4. Conversion Factors for Units of Specific Heat	21a
5. Classification of Materials	21a
6. Convention for Bibliographic Citation	21a
7. Crystal Structures, Transition Temperatures, and Other Pertinent Physical Constants of the Elements	22a

<i>Numerical Data on Specific Heat of Metallic Elements and Alloys</i> [See pp. xvii to xxii for detailed listing of entries for each of the following groups of materials]	1
1. Elements	1
2. Nonferrous Binary Alloys	291
3. Nonferrous Multiple Alloys	511
4. Ferrous Alloys	619
A. Carbon steels—group I	619
B. Carbon steels—group II	623
C. Alloy steels—group I	626
D. Alloy steels—group II	678
<i>References to Data Sources</i>	741

Material Index

<i>Material Index to Specific Heat Companion Volumes 4, 5, and 6</i>	A1
