<i>Contributors</i> .....	<i>xi</i>
<i>Preface</i> .....	<i>xiii</i>
<b>1 An Introduction to Plasma Polymerization . . . . .</b>	<b>1</b>
<i>Nicholas Morosoff</i>	
I. Introduction .....	1
II. Control of Plasma Polymer Thin Film Properties .....	9
III. Methods of Plasma Polymer Characterization .....	57
IV. Applications of Plasma Polymer Films .....	68
References .....	84
<b>2 Plasma Polymerization of Fluorocarbons . . . . .</b>	<b>95</b>
<i>Riccardo d'Agostino, Francesco Cramarossa, Francesco Fracassi, and Francesca Illuzzi</i>	
I. Comparison of Gas Feeds .....	96
II. Simplifying Parameters .....	97
III. Reactors .....	101
IV. Gas Phase Diagnostics .....	109
V. Mechanism of Deposition of PPFM Films .....	126
VI. Chemical Structure of PPFM Films and Their Correlation to Gas Phase Species Distribution .....	143
<b>3 Plasma-Polymerized Organosilicones and Organometallics . . . . .</b>	<b>163</b>
<i>A. M. Wróbel and M. R. Wertheimer</i>	
I. Introduction .....	164
II. Effect of Fabrication Variables .....	167
III. Plasma Polymerization Mechanisms .....	173

IV.	The Structure of Plasma Polymer Films . . . . .	187
V.	Morphology of Plasma Polymer Films . . . . .	211
VI.	Properties of Plasma Polymer Films . . . . .	219
VII.	Applications of Plasma Polymer Films . . . . .	242
VIII.	Conclusions . . . . .	252
IX.	Addendum . . . . .	252
	Acknowledgments . . . . .	255
	References . . . . .	255
<b>4</b>	<b>Plasma Polymer-Metal Composite Films . . . . .</b>	<b>269</b>
	<i>H. Biederman and L. Martinu</i>	
I.	Introduction . . . . .	270
II.	Vacuum Techniques for Deposition of Polymer/Metal Composite Films . . . . .	271
III.	Elementary Processes Involved in the Deposition . . . . .	279
IV.	Structure and Composition of Films . . . . .	286
V.	Optical Properties . . . . .	295
VI.	Electrical Properties . . . . .	306
VII.	Mechanical Properties . . . . .	312
VIII.	Aging Effects and Stability of the Films . . . . .	314
IX.	Applications . . . . .	315
X.	Conclusions . . . . .	316
	Acknowledgments . . . . .	317
	References . . . . .	317
<b>5</b>	<b>Plasma Etching of Organic Polymers . . . . .</b>	<b>321</b>
	<i>Frank D. Egitto, Vladimir Vukanovic, and Gary N. Taylor</i>	
I.	Introduction . . . . .	322
II.	Plasma Sources and Diagnostics . . . . .	323
III.	Hydrocarbon Polymer Etching Using Oxygen Plasmas . . . . .	329
IV.	Hydrocarbon Polymer Etching in Plasmas of Oxygen and Fluorine Containing Gases . . . . .	334
V.	Fluoropolymer Etching . . . . .	346
VI.	Effect of Ion Bombardment . . . . .	352
VII.	Loading Effect . . . . .	355
VIII.	Temperature Dependence . . . . .	358
IX.	Other Gases Added to O <sub>2</sub> . . . . .	361
X.	Etch Products . . . . .	366
XI.	More on Polymer Structure . . . . .	367
XII.	Applications . . . . .	373
	Acknowledgments . . . . .	412
	References . . . . .	412

<b>6</b>	<b>Applications of Plasma Polymers . . . . .</b>	<b>423</b>
	<i>Shinzo Morita and Shuzo Hattori</i>	
I.	Introduction . . . . .	423
II.	Plasma Polymerized Resists in Microfabrication Processes . . . . .	424
III.	Plasma Polymers in Electronic Elements . . . . .	443
IV.	Plasma Polymers in Optical Applications . . . . .	451
V.	Diamond and Amorphous Carbon Synthesis . . . . .	454
	References . . . . .	458
<b>7</b>	<b>Plasma Deposition and Treatment for Biomaterial Applications . . . . .</b>	<b>463</b>
	<i>Buddy D. Ratner, Ashutosh Chilkoti, and Gabriel P. Lopez</i>	
I.	Introduction . . . . .	464
II.	Blood Compatibility of Plasma-Deposited Films . . . . .	475
III.	Ophthalmological Applications . . . . .	489
IV.	Tissue Culture Applications . . . . .	493
V.	Membranes and Drug Delivery Devices . . . . .	496
VI.	Plasma Cleaning of Biomaterial Surfaces . . . . .	498
VII.	Plasma Sterilization . . . . .	502
VIII.	Biomedical Electrodes and Implanted Sensors . . . . .	506
IX.	Conclusions . . . . .	510
