

CONTENTS

| | |
|---|-----|
| Theory of Nonstationary Thermalization of Neutrons M. V. Kazarnovskii | 1 |
| Use of Germanium γ -Radiation Detectors for Studying Inelastic Neutron Scattering E. S. Konobeevskii, M. M. Zhits, R. M. Musaelyan, V. I. Popov, N. V. Popov, I. V. Surkova, and I. V. Shtranikh | 95 |
| Collimator of Fast Neutrons for Measurements of Inelastic Scattering of Neutrons at Nuclei S. A. Myachkova, V. V. Nefedov, and I. V. Shtranikh | 103 |
| Measurement of the Spectra of Fast Neutrons (~ 14 MeV) with High Energy Resolution with the Aid of Nuclear Emulsions. Automation of the Measurements G. E. Belovitskii, A. E. Voronkov, L. N. Kolesnikova, R. A. Latypova, L. V. Sukhov, and I. V. Shtranikh | 109 |
| Method of Determining the Angular Distribution with the Aid of Nuclear Emulsions in the Scattering of Fast Neutrons (~ 14 MeV) G. E. Belovitskii, L. N. Kolesnikova, L. V. Sukhov, and T. A. Romanova | 121 |
| Interaction between Deuterons and Tritium or Helium-3 at Low Energies Yu. G. Balashko | 129 |
| Silicon Lithium-Drift $\Delta E/\Delta x$ Detectors Having an Area of 8 cm^2 V. I. Guseva, M. M. Zhits, N. V. Popov, and G. A. Sokol | 139 |
| Experimental Test of the Method of Calculating Cross Sections of Photonuclear Reactions on the Basis of Mathematical Statistics V. G. Ivanchenko and B. S. Ratner | 143 |
| Transmission of Information from an Amplitude Analyzer to the Ural-11B Computer I. D. Barakovskii, V. A. Zapevalov, and V. I. Yavorovskii | 149 |
| Application of the Regularization Method to the Problem of the Cross Section of Photonuclear Reactions V. G. Ivanchenko | 155 |
