

CONTENTS

I. Electron Collision : Theory

- Rotational stopping cross section in the adiabatic approximation
K. Takayanagi 1
- Electron impact excitation of positive ions in the CB
and CBB approximations
S. Nakazaki and T. Hashino 3
- Ionization cross section of hydrogenic ions by charged
particles in the Glauber approximation
H. Kotegawa, H. Narumi and A. Tsuji 5

II. Electron Collision : Experiment

- Ejected-electron spectroscopy of Auger processes in
rare gas atoms induced by electron impact
H. Suzuki, K. Wakiya, T. Takayanagi, M. Muto and S. Ohtani 7
- Electron-impact cross sections for $v=0-1$ vibrational
excitation of N_2 at electron energies of 3 to 30 eV
T. Okada, T. Yamamoto, T. Suzuki and H. Tanaka 10
- New features in the vibrational excitation of O_2 by
electron impact in the 2-20 eV range
T. Yamamoto, T. Okada, T. Suzuki and H. Tanaka 12
- Observation of pure rotational excitation of N_2 , O_2 , and
 CH_4 by electron impact
H. Tanaka, T. Yamamoto, T. Suzuki and I. Shimamura 14
- Thermal electron attachment to O_2 as studied by a microwave
cavity technique combined with a pulse radiolysis method
Y. Hatano, H. Shimamori, Y. Kokaku and M. Toriumi 17
- Dissociative excitation of water molecule by electron impact
T. Fujita, T. Iwai, K. Ogura, S. Watanabe and Y. Watanabe 19
- Translational energy distribution of the excited H atom
produced in the $e-H_2$, HCl , H_2O collision
T. Ogawa and M. Higo 22
- Translational spectroscopy of electron impact dissociation of
molecules isoelectronic and isosymmetric with H_2O by Doppler
profile measurements of Balmer- α emission
N. Kouchi, M. Ohno, K. Ito, N. Oda and Y. Hatano 23

Characteristic energy losses by slow electron impact on thin films ($\sim 200\text{\AA}$)	
K. Hiraoka	26

See also

Ejected-electron spectroscopy in collisions of alkali-metal ion beams with rare gas atoms	
T. Takayanagi, A. Yagishita, A. Wada, K. Wakiya, H. Suzuki, F. Koike and S. Ohtani	75
Collisional excitation, ionization and dissociation studied by optical-, mass- and electron spectroscopy	
K. Kuchitsu, T. Kondow and T. Fukuyama	87

III. Heavy-Particle Collision : Theory

Theoretical studies of the low-energy ion-polar molecule collisions	
K. Takayanagi and K. Sakimoto	28
On the first-order born approximation in asymmetric electron transfer reactions	
K. Fujiwara and N. Toshima	31
Electronic relativistic effects in inner-shell ionization by heavy charged-particle impact	
T. Mukoyama and L. Sarkadi	33
Impact parameter treatment of differential cross sections in $\text{Li}^+\text{-Li}$ collisions	
N. Shimakura, H. Inouye and T. Watanabe	35
Oscillatory cross sections of charged transfer against the charge of projectiles in low-energy collisions	
H. Ryufuku, K. Sasaki and T. Watanabe	38
The systematic investigation for the total cross section of charge transfer in collision of atomic hydrogen with bare nuclear ions	
H. Ryufuku and T. Watanabe	41
Level distribution of captured electron by the process of charge transfer in collisions of multicharged ions with atomic hydrogen	
H. Ryufuku and T. Watanabe	46
N- and L- changing collision of a high-rydberg cesium atom with a rare-gas atom	
K. Sasano and M. Matsuzawa	49
State-changing collision with a high-rydberg atom with an ammonia molecule induced by inversion splitting	
M. Matsuzawa	51

IV. Ion-Neutral Collisions : Experiment

Charge transfer in collisions of Li^+ ions with Li and Na atoms S. Kita, T. Okamoto, N. Shimakura, Y. Sato and H. Inouye	53
Experimental cross sections for single-electron capture by proton in Cs, Rb, K and Na vapors T. Nagata	56
Single-electron capture into Ar^+ excited states in $\text{Ar}^{2+} + \text{Na}$ collision below 12 keV A. Matsumoto, S. Tsurubuchi, T. Iwai, S. Ohtani, K. Okuno and Y. Keneko	58
Symmetric resonance multiple-charge-transfer in $\text{Ar}^{++} + \text{Ar}$, Kr^{++} $+ \text{Kr}$, $\text{Xe}^{++} + \text{Xe}$, and $\text{Kr}^{+++} + \text{Kr}$ K. Okuno	60
Study of low energy charge transfer reactions by the time-of-flight technique T. Matsuo, N. Kobayashi and Y. Kaneko	61
Chemiluminescent ion-molecule reactions of C^+ and C^{++} ions with H_2 molecules T. Ishikawa and H. Inouye	63
Threshold electron-secondary ion coincidence study of the ion-molecule reaction $\text{H}_2^+(V) + \text{H}_2 \rightarrow \text{H}_3^+ + \text{H}$ I. Koyano and K. Tanaka	66
Mobilities of rare gas ions in He gas at 82K T. Koizumi, N. Kobayashi and Y. Kaneko	68
Oscillatory structure of optical excitation function for $2p \rightarrow 2s$ transition of Li in $\text{Li}^+ - \text{He}$ collision S. Tsurubuchi, T. Masuda and T. Iwai	70
Vibrational and rotational excitation of simple molecules by Li^+ impact in the energy range from 70 eV to 1500 eV Y. Itoh, N. Kobayashi and Y. Kaneko	72
Ejected-electron spectroscopy in collisions of alkali-metal ion beams with rare gas atoms T. Takayanagi, A. Yagishita, A. Wada, K. Wakiya, H. Suzuki, F. Koike and S. Ohtani	75
Collision processes involving the innershell electron in highly ionized heavy ion impact H. Tawara	79

The L X rays following multiple inner-shell ionization Y. Awaya, K. Izumo, T. Katou, H. Kumagai, T. Tonuma, Y. Tendow, T. Takahashi, A. Hashizume and T. Hamada	81
REC x-rays by 140 MeV Ne-gases collisions T. Tonuma, Y. Awaya, T. Kambara, H. Kumagai and I. Kohno	83
Comment on the one electron loss cross section of He ⁺ on He in 10 - 100 keV T. Arikawa and K. Kanazawa	85

V. Neutral-Neutral Collisions : Experiment

Collisional excitation, ionization and dissociation processes studied by optical-, mass- and electron-spectroscopy K. Kuchitsu, T. Kondow and T. Fukuyama	87
Study of the optical emission in collision of metastable He ^m on He M. Kimura, T. Egawa and T. Iwai	90
Ionization of triatomic molecules by metastable helium atoms and thermal helium ions M. Tsuji, K. Tsuji, M. Matsuo, H. Obase and Y. Nishimura	92
De-excitation of He(2 ³ S) and Ne(³ P ₂ , ³ P ₀ and ³ P ₁) by atoms and molecules as studied by a pulse radiolysis method Y. Hatano, S. Takao, T. Ueno, A. Yokoyama and N. Suzuki	96
Emission from chemically excited HNO, DNO and NO ₂ as studied by a crossed beam technique T. Kasai, Y. Hosokawa, I. Hanazaki and K. Kuwata	98
Determination of collisional relaxation constants of 6 ₁₆ ⁺⁵ ₂₃ rotational transition of H ₂ O T. Shimizu, T. Kasuga, S. Kano and H. Kuze	99

VI. Photoabsorption and Photon-Induced Processes

Vibrational-rotational structure in the distribution of photoelectrons ejected from hydrogen molecules Y. Itikawa	101
Photoionization efficiency curve and threshold electron spectrum of CO K. Tanaka and I. Koyano	103

Multiphoton ionization and harmonics generation in atomic vapors by picosecond laser pulses K. Miyazaki, T. Sato and H. Kashiwagi	105
---	-----

VII. Plasma, Discharge and Radiation Physics

Boltzmann equation analysis of electron transport in weakly ionized gases H. Tagashira, Y. Sakai, M. Shimosuma and S. Sakamoto	106
--	-----

Recombination process of thermalized electrons and ions in liquid argon, krypton and xenon S. Kubota, M. Hishida, M. Suzuki and K. Ruan(Gen)	108
--	-----

Unified theory of the electron temperature in cylindrical positive columns in low pressure range T. Dote and Y. Ichikawa	109
--	-----

Electron temperature theory of positive columns with including the ionization of metastable atoms T. Dote, Y. Ichikawa and T. Shimizu	110
---	-----

Measurements of the metastable atom density by means of the hook method T. Fusayama and T. Dote	112
---	-----

Frequency dependence of the RF electric field effect on He-Ne laser output T. Hara and T. Dote	113
--	-----

Effect of a transverse magnetic field on He-CD ⁺ laser output T. Hara, M. Hamagaki and T. Dote	114
--	-----

Experimental rules between output powers and gas concentrations for the KRF laser and its lasing mechanism S. Karasawa and M. Shimauchi	115
---	-----

Population density measurements in a freejet expansion flow of a partially ionized argon A. Kimura and M. Nishida	118
---	-----

Measurements of ion clustering reactions by drift tube: K ⁺ ion with H ₂ O, and Li ⁺ ion with N ₂ in N ₂ Y. Satoh, K. Iinuma, K. Seto and M. Takebe	121
--	-----

Energy straggling of C and He ions in metal foils T. Takahashi, Y. Awaya, A. Hashizume, K. Izumo, H. Kumagai, T. Tonuma, A. Hitachi and S. Uchiyama	123
---	-----

Stopping power measurements of a tissue equivalent gas and its constituents A. Fukuda	125
---	-----

Mechanism of proportional scintillation in argon, krypton and xenon
M. Suzuki and S. Kuboto 126

Variation of luminescence decay in liquid xenon excited by
electrons and alpha particles
S. Kubota, M. Suzuki and K. Ruan (Gen) 127
