

CONTENTS

OPENING SESSION

0-1	Approaches to Thermonuclear Fusion	
	Koji HUSHIMI	1

SESSION I HIGH POWER LASERS I

I-1	A Large Aperture Nd-Glass Laser Amplifier for High Peak Power Application	
	M. J. LUBIN, J. M. SOURES, and L. M. GOLDMAN	7
I-2	High Power Laser	
	Takatomo SASAKI and Chiyoe YAMANAKA	19
I-3	High Power Laser	
	J. L. EMMETT	41

SESSION II HIGH POWER LASERS II

II-1	High Energy Gas Lasers for Possible Fusion Applications	
	Keith BOYER	53
II-1'	Los Alamos Laser-Fusion Program	
	Keith BOYER	69
II-2	High Power Optical Components and Mode Control Problems in High Energy CO ₂ Lasers	
	J. Y. WADA, O.P. JUDD, G. M. JANNEY, and V. WANG	87
II-3	Laser Induced Damage of Optical Elements	
	Alexander J. GLASS and Arthur H. GUENTHER	119
II-4	Improvement of Damage Threshold of Hoya Laser Glass	
	Tetsuro IZUMITANI, Kosaku HOSAKA, and Chiyoe YAMANAKA	165
II-5	High-Speed Holographic Interferometry	
	Hiroshi TAKUMA	181

SESSION III PLASMA GENERATION AND HEATING BY LASERS

III-1	Investigation of Plasmas Produced by Laser-Irradiated Solids in Static Magnetic Fields	
	Helmut J. SCHWARZ and Heinrich HORA	189
III-2	Laser Plasma Interaction with Magnetic Field	
	Seiichi ARIGA	199
III-3	Generation of Fully-ionized Plasma from Isolated Deuterium Ice-pellet by Laser and Application to Cusploss Determination	
	Tadashi SEKIGUCHI	211
III-4	Electronic Transition Rates Induced by Intense Laser Fields	
	R. K. OSBORN and M. MIRKOVITCH	215
III-5	Multiphoton Effects in Laser Interaction with Gas and Solid	
	Takayoshi OKUDA	227

SESSION IV THERMONUCLEAR FUSION APPROACH BY LASERS I

IV-1	Anomalous Absorption of Radiation by Plasmas I	
	John M. DAWSON	235
IV-2	Anomalous Absorption of Radiation by Plasmas II	
	Kyoji NISHIKAWA	267
IV-3	Thermonuclear Fusion Plasma by Anomalous Heating by Lasers	
	Chiyoee YAMANAKA and Tatsuhiko YAMANAKA	283
IV-4	Laser Plasma Work at IPP Garching	
	S. WITKOWSKI	301
IV-5	Lasers and Controlled Fusion	
	M. J. LUBIN	319

SESSION V THERMONUCLEAR FUSION APPROACH BY LASERS II

V-1	Interaction of Intense Photon Beams with Plasmas (II)	
	Ray E. KIDDER	331

V-2	Compressive Forces and their Measurement in Laser-Fusion Experiments	
	Stephen O. DEAN	355
V-3	Shock Formation in Plasma by Laser Heating	
	Keishiro NIU and Kanji ABE	367
V-4	Laser Heating of Magnetically Confined Plasma Columns	
	G. C. VLASES	381
SESSION VI LASER DIAGNOSTICS AND MATERIAL PROCESSES		
VI-1	Physical Processes in CO Laser	
	N. N. SOBOLEV	401
VI-2	Scattering Measurement in JFT-2 Tokamak with a Ruby Laser	
	Tohru MATOBA, Akimasa FUNAHASHI, and Satoshi ITOH	413
VI-3	Scattering of CO ₂ Laser Light by TP-D Plasma	
	Masahiro YOKOYAMA	421
VI-4	The Kapitza-Dirac Effect as a Possible Means for the Determination of High Intensities in Laser Beams	
	Helmut J. SCHWARZ	429
VI-5	Laser-Induced Chemical Reaction	
	Susumu NAMBA	443
VI-6	Microwave Discharge in High Pressure Gases	
	K. TAKAYAMA, M. HASEGAWA, and H. IKEZI	455
VI-7	Nonlinear Light Scattering in Mode- Locked Nd ³⁺ : POCl ₃ Laser	
	Daisuke KATO and Kenjiro SAKURAI	461
