

## CONTENTS

## INVITED PAPERS

- L-1 Hughes, V.W.  
Atomic physics and fundamental principles
- L-2 Yamazaki, T.  
Do quarks play an explicit role as nuclear constituents?
- L-3 Fortson, E.N.  
New experimental limits on a permanent atomic electric dipole moment and implications
- L-4 Wieman, C.E.  
A new measurement of parity nonconservation in atomic cesium
- L-5 Sapirstein, J.  
Theoretical problems in quantum electrodynamics
- L-6 Kienle, P.  
Anomalous positron emissions in heavy-ion collisions
- L-7 Gould, H. and Munger, C.  
Lamb shift in heliumlike uranium ( $U^{90+}$ )
- L-8 Morita, M.  
Muon capture in hyperfine states of muonic atoms
- L-9 Ponomarev, L.I.  
 $\mu$ -atomic processes and muon-catalyzed fusion
- L-10 Nagamine, K.  
Thermal muonium and topics in pulsed muon experiments
- L-11 Backenstoss, G.  
Antiprotonic atoms
- L-12 Jensen, R.V.  
Chaos in atomic physics
- L-13 Duncan, A.J.  
Quantum correlations in the two-photon decay of atomic hydrogen
- L-14 Burke, P.G.  
R-matrix method in atomic physics
- L-15 Phaneuf, R.A.  
Collision experiments with highly ionized atoms
- L-16 Li, J.-M.  
Some researches in atomic physics in China
- L-17 Walther, H.  
The single-atom maser and cavity quantum electrodynamics
- L-18 Cohen-Tannoudji, C.  
Laser-atom interactions: Recent theoretical developments
- L-19 Brewer, R.G.  
Macroscopic quantum jumps in a single atom
- L-20 Chu, S., Bjorkholm, J.E., Ashkin, A., and Cable, A.  
Demonstration of laser cooling and trapping of atoms
- L-21 Suckewer, S.  
Princeton's approach to X-ray lasers below 100A
- L-22 Sasaki, T.  
Synchrotron radiation spectroscopy of atoms and molecules at photon factory
- L-23 Källne, E. and Källne, J.  
X-ray spectroscopic studies of atomic processes in hot plasmas
- L-24 Kawaji, S.  
Quantum Hall effect: Development and present status
- L-25 Oka, T.  
Extraordinary molecules in interstellar space

CONTRIBUTED PAPERS: POSTER SESSION I

I.a. Quantum Electrodynamics and Fundamental Problems

- I-1 Au, C.K.  
A Coulomb-gauge electrodynamics analysis of two photon exchange in electron-atom scattering
- I-2 Feinberg, G., Sucher, J., and Au, C.K.  
A quantum field theory approach to the calculations of energy levels in heliumlike Rydberg atoms
- I-3 Bhattacharyya, S. and Chatterjee, L.  
A QED approach to transfer ionization
- I-4 Mohr, P.J. and Kim, Y.K.  
Self energy of excited states in a strong Coulomb field
- I-5 Hirata, Y. and Minakata, H.  
Quantum field theories around a large-Z nucleus
- I-6 Cheon, Il-T.  
The frequency shift of the  $2S_{1/2} \rightarrow 2P_{1/2}$  transition line of hydrogen atom by the specific boundary
- I-7 Hänsch, T.W., Beausoleil, R.G., Couillaud, B., Hildum, E.A., and McIntyre, D.H.  
High resolution laser spectroscopy of atomic hydrogen
- I-8 Hunter, L.R., Krause, D., Murthy, S., and Sung, T.W.  
Optical Stark shift of the resonance lines of cesium
- I-9 Liu, C.J., Schüler, K.P., Gay, T.J., and Hughes, V.W.  
A new method for optical measurement of proton polarization
- I-10 Moore, F.L., Farnham, D.L., Schwinberg, P.B., and Van Dyck, Jr., R.S.  
RF mass spectroscopy in a compensated quadrupole Penning trap
- I-11 Schnatz, H., Bollen, G., Dabkiewicz, P., Egelhof, P., Kern, F., Kalinowsky, H., Schweikhard, L., Stolzenberg, H., Kluge, H.-J., and the ISOLDE Collaboration  
In-flight capture of ions into a Penning trap
- I-12 Liang, J.Q.  
Quantum mechanics in multiply connected spaces and the fractional angular momentum quantization
- I-13 Haji-Hassan, T., Duncan, A.J., Perrie, W., Beyer, H.-J., and Kleinpoppen, H.  
The two-photon decay of metastable atomic deuterium: Tests of Bell's inequality and the no-enhancement hypothesis
- I-14 Holzscheiter, M.H.  
Antiproton storage in ion traps: A new concept in low energy antimatter physics
- I-15 Kasai, S., Endo, I., Harada, M., Niki, K., Sumi, Y., Tobiyama, M., Mutou, M., Tsujikawa, H., Watanabe, K., Yoshida, K., and Baba, K.  
Detection of the recoil electron in the pair production of atomic electrons

I.b. Exotic Atoms and Related Topics

- I-16 Arnold, K.-P., Chmely, F., Eckhause, M., Hughes, V.W., Kane, J., Kettell, S., Kuang, Y., Kumar, K., Lu, D., Ni, B., Matthias, B., Orth, H., Schaefer, R., Souder, P., Woodle, K., and zu Putnitz, G.  
Discovery of the muonium negative ion
- I-17 Gladisch, M., Hofmann, J., Jacobs, W., Mundinger, H.-J., Rosenkranz, J., Schäfer, W., Schwarz, W., Stickel, M., zu Putnitz, G., and Hughes, V.W.

- New results on the muonium production with the beam-foil technique
- I-18 Arnold, K.P., Chmely, F., Germani, J., Hughes, V.W., Kettell, S., Kuang, Y., Markey, J., Matthias, B., Meyer, N., Ni, B., Orth, H., Schaefer, R., Eckhause, M., Guss, P., Kane, J., Hoffman, C., Hogan, G., Sandberg, V., Reidy, J., and zu Putlitz, G.  
Search for spontaneous conversion of muonium to antimuonium
- I-19 Menshikov, L.I., Ponomarev, L.I., and Sukhanov, L.P.  
The lifetime of the  $(\mu\text{He})^+_{2s}$  metastable state
- I-20 Imazato, J., Kadono, R., Watanabe, Y., Nagamine, K., Yamazaki, T., Döbeli, M., Truščl, P., Tasiaux, B., and Deutsch, J.  
Asymmetry measurement of the decay electron from negative muons bound in  $^{208}\text{Pb}$
- I-21 Sakai, Y., Kubo, M.K., Tominaga, T., Ishida, K., Nagamine, K., and Ikuta, S.  
Atomic capture of negative muon in organic compounds containing chlorine atoms
- I-22 Imanishi, N.  
A model on the Coulomb capture of muons or pions in hydrides
- I-23 Ma, Q.-C., Zhang, X.-X., Liu, Y.-Y., and Watanabe, T.  
Total and differential cross sections for  $(\mu^+\mu^-)$  formation by collisions of  $\mu^+$  with  $(\mu^-p)$  including excited states in the first Born approximation
- I-24 Liu, X.-W., Ma, Q.-C., Cheng, J.-F., Zhang, X.-X., Liu, Y.-Y., and Watanabe, T.  
Total and differential cross sections for  $(\mu^+\mu^-)$  formation by collisions of  $\mu^+$  with  $(\mu^-p)$  in the eikonal approximation
- I-25 Nakanishi, K., Iguchi, K., Ohsaki, A., and Watanabe, T.  
Classical-trajectory Monte Carlo calculations for Coulomb-interacting three-body systems
- I-26 Morgan, Jr., D.L.  
Antiproton-hydrogen atom rearrangement - Annihilation cross section

### I.c. Muon-Catalyzed Fusion

- I-27 Akaishi, Y. and Tanaka, H.  
Energy of  $(\text{dtp})$  molecule by ATMS method
- I-28 Haga, Y., Kazama, H., Akaishi, Y., and Tanaka, H.  
Effect of nuclear interaction on  $(\text{dtp})$  molecule
- I-29 Gandyl, E.M. and Zubarev, A.L.  
A calculation of a spectrum of levels in the Coulomb three body problem
- I-30 Korobov, V.I., Puzynin, I.V., and Vinitzky, S.I.  
Variational calculation of weakly bound rotational-vibrational states of mesic molecules  $\text{ddp}$  and  $\text{dtp}$
- I-31 Faifman, M.P., Menshikov, L.I., Ponomarev, L.I., Puzynin, I.V., Puzyrina, T.P., and Strizh, T.A.  
Energy levels of mesic molecular complexes of hydrogen isotopes
- I-32 Bakalov, D.D. and Melezhik, V.S.  
Muonic molecules finite size corrections to molecular complexes  $(\text{ddp})\text{dee}$  and  $(\text{dtp})\text{dee}$  energy levels
- I-33 Bogdanova, L.N., Kuperin, Yu.A., Kvitsinsky, A.A., Markushin, V.E., Merkuriev, S.P., and Ponomarev, L.I.  
Non-radiative fusion in  $\text{pdp}$  mesic molecule
- I-34 Chatterjee, L. and Bhattacharyya, S.  
Can laser field assist muon induced fusion?

- I-35 Brener, S.E. and Zubarev, A.L.  
The exchange reactions for the low energy collisions of the hydrogen isotope mesoatoms
- I-36 Melezhik, V.S. and Wozniak, J.  
Cross sections for scattering of mesic atoms on hydrogen isotope nuclei
- I-37 Adamczak, A., Melezhik, V.S., and Menshikov, L.I.  
Electron screening in low energy scattering of muonic hydrogen on hydrogen atom
- I-38 Nagamine, K., Matsuzaki, T., Ishida, K., Hirata, Y., Watanabe, Y., Kadono, R., Nishiyama, K., Jones, S.E., and Maltrud, H.R.  
Muonic X-ray measurement on the  $\mu^-$  sticking probability in muon catalyzed fusion of liquid d-t mixture
- I-39 Bogdanova, L.N., Bracci, L., Fiorentini, G., Gerstein, S.S., Markushin, V.E., Melezhik, V.S., Menshikov, L.I., and Ponomarev, L.I.  
The calculation of the probability of muon sticking to helium in the muon catalyzed fusion  $d\mu \rightarrow \mu^3\text{He}+n$  and  $d\mu \rightarrow \mu^4\text{He}+n$
- I-40 Bogdanova, L.N., Markushin, V.E., Melezhik, V.S., and Ponomarev, L.I.  
The probability of muon sticking to helium in the muon catalyzed fusion beyond the Born-Oppenheimer approximation
- I-41 Markushin, V.E.  
Effects of nuclear reaction finite time in muon sticking to helium
- I-42 Tajima, T. and Eliezer, S.  
Muonic X-ray laser in a deuterium-tritium mixture
- I-43 Tajima, T., Eliezer, S., and Rosenbluth, M.N.  
Muon-catalyzed fusion-fission reactor

#### I.d. Hyperfine Structure and Isotope Shifts

- I-44 Kronfeldt, H.-D.  
Determination of hyperfine structure and isotope shift parameters in lanthanide elements
- I-45 Yoshizawa, Y., Horiguchi, T., and Wakasugi, M.  
Hyperfine structure study of  $^{127}\text{I}_2$  molecule with molecular beam laser spectroscopy
- I-46 Berkler, M., Münch, A., Werth, G., and Wilsdorf, D.  
Precision ground state HFS of  $^{173}\text{Yb}^+$
- I-47 Głódź, M. and Krafińska-Miszczak, M.  
Measurements of the hyperfine structure in  $10^2\text{D}_{5/2}$  state of  $^{87}\text{Rb}$
- I-48 Gerz, Ch., Hilberath, Th., and Werth, G.  
Lifetime of metastable 5D states of  $\text{Sr}^+$  ions
- I-49 Fechner, B., Rinkleff, R.-H., and Steudel, A.  
Stark effect and radiative lifetimes in Eu I
- I-50 Carlsson, J., Lundberg, H., Peng, W.-X., Persson, A., Svanberg, S., Wahlström, C.G., and Zhao, Y.-Y.  
Experimental and theoretical investigations of radiative lifetimes and hyperfine structures in group IIIA atoms
- I-51 Wallmeroth, K., Bollen, G., Borge, M.J.G., Campos, J., Dohn, A., Egelhof, P., Grüner, J., Kluge, H.-J., Lindenlauf, F., Krönert, U., Moore, R.B., Rodriguez, A., Venugopalan, A., Wood, J., and the ISOLDE Collaboration  
Resonance ionization mass spectrometry (RIMS) of short-lived gold isotopes
- I-52 Goldschmidt, Z.B.  
Explanation of characteristic properties of crossed-second-order field isotope shift effects

**I.e. Laser Cooling and Laser Snow**

- I-53 Itano, W.M., Bergquist, J.C., Bollinger, J.J., Brewer, L.R., Hulet, R.G., Larson, D.J., and Wineland, D.J.  
Laser cooling of ions in Penning and RF traps
- I-54 Yabuzaki, T., Sugiyama, K., and Ogawa, T.  
Production of large crystalline particles from laser-produced alkali-hydride molecules
- I-55 Mariotti, E., Xu, J.H., Allegrini, M., Gozzini, S., and Moi, L.  
Sodium atom drift in silane coated pyrex capillaries

**I.f. Nonlinear Spectroscopy and Related Problems**

- I-56 Kuroda, R., Uemura, S., Fukuda, Y., and Hashi, T.  
Accumulated coherent phonon generation
- I-57 Mishina, T., Tanigawa, M., Fukuda, Y., and Hashi, T.  
Synchronized quantum beat echoes in Cs with diode lasers
- I-58 Berger, J., Blatt, P., Hauck, P., and Neumann, R.  
Laser-initiated Raman transitions in cesium atoms via a continuum state
- I-59 Tung, J.H., Tang, A.Z., Salamo, G.J., and Chan, F.T.  
Two-photon absorption of atomic hydrogen from two light beams
- I-60 Mlynek, J., Drake, K.H., and Lange, W.  
Nonlinear magneto-optic effects in a  $J=1$  to  $J'=0$  transition
- I-61 Mlynek, J. and Buhr, E.  
Collision-induced Ramsey resonances in Sm vapor
- I-62 Chu, S.-I. and Ho, T.-S.  
Floquet-Liouville supermatrix approach to nonlinear optical processes in intense laser fields
- I-63 Fu, J.-S., Hu, Y.-H., and Zheng, L.-M.  
A new method of detection of saturation dispersion spectra
- I-64 Endo, T. and Muramoto, T.  
Quantum-mechanical homogeneous line broadening of ruby

**I.g. Laser Spectroscopy of Molecules**

- I-65 Stoicheff, B.P., Herman, P.R., LaRocque, P.E., and Madej, A.A.  
VUV laser-excited spectra of Ar<sub>2</sub> and Kr<sub>2</sub>: Molecular constants and radiative lifetimes
- I-66 Nakagawa, K., Kuga, T., Matsuo, Y., and Shimizu, T.  
The highly excited vibrational states of NH<sub>3</sub>
- I-67 Yamada, C. and Hirota, E.  
Detection of the silyl radical SiH<sub>3</sub> by infrared diode laser spectroscopy
- I-68 Wang, W. and Jiang, Z.  
Laser excited OH fluorescence in flame and the population distribution of its ground electronic state
- I-69 Kimura, K.  
Possibility of dimer and clusters between helium excimers produced at high density by irradiation of heavy ions at low temperature
- I-70 Overlaet, W., Kimura, M., Kinoshita, S., and Kushida, T.  
Time-resolved light scattering from resonantly excited molecular iodine

### I.h. Technical Improvements on Lasers

- I-71 Yabuzaki, T., Kawamura, T., and Ogawa, T.  
New Doppler-free atomic spectroscopy and its application to frequency-stabilization of a semiconductor laser
- I-72 Grafström, S., Harbarth, U., Kowalski, J., Neumann, R., Noehte, S., and zu Putlitz, G.  
Precise laser beam position control for Doppler-free atomic spectroscopy
- I-73 Shy, J.-T. and Yen, T.-C.  
Optogalvanic frequency stabilization of CO<sub>2</sub> laser using the Lamb dip in a low pressure discharge
- I-74 Shimizu, F.O. and Ueda, K.  
Study on dynamical constants in laser process by analyzing relaxation oscillation of pulsed CO<sub>2</sub> laser
- I-75 Fujii, K.-I., Yokoyama, H., Sugaya, M., Takashima, M., and Hård, S.  
He-Cd white light laser with a helical hollow cathode

### I.i. Rydberg Atoms and Molecules

- I-76 Zhang, C., Li, B., Chen, A., and Zhang, X.  
Calculation of wavefunctions and oscillator strengths for Rydberg states of atomic Na
- I-77 Dembczyński, J.  
Quantum defect in silicon, germanium, and tin
- I-78 Cheng, K.T.  
Multichannel quantum defect analysis of the absorption spectrum of Ba<sup>++</sup>
- I-79 Wang, Z.-W.  
The strong channel interactions of five times ionized fluorine
- I-80 Wang, Z.W. and Lu, K.T.  
Calculation of 3p<sup>4</sup>(<sup>3</sup>P) ns Rydberg spectra of chlorine isoelectronic ions from Ar II to Zn XIV
- I-81 Lu, K.T. and Sun, J.-Q.  
Theory of autoionizing structures induced by interaction of nuclear magnetic dipole and quadrupole moments with a Rydberg electron
- I-82 Lu, K.T. and Pan, S.-H.  
Frame transformation theory of l-uncoupling effect of triatomic hydrogen H<sub>3</sub>
- I-83 Wu, T.H. and Lu, K.T.  
Observation of Ba<sub>2</sub> excimer band structures via two-photon excitation
- I-84 Zhang, J.-Y., Zhou, H.-T., Yang, J., Li, Q.-R., and Lu, K.T.  
Observation of Mg<sub>2</sub> Rydberg excimer and Mg<sub>2</sub>(Ar)<sub>N</sub> Fermi complex in a two-photon excitation
- I-85 Li, J.-M.  
Quantum defect theory: Spectra below the sulfur L<sub>II,III</sub> edges in SO<sub>2</sub>
- I-86 Knight, R.D. and Wang, L.-G.  
Field ionization studies of Rydberg states of H<sub>2</sub>
- I-87 Hieronymus, H., Rinneberg, H., Neukammer, J., König, A., Vietzke, K., Jönsson, G., and Spinger-Bolk, H.  
Angular distribution of electrons emitted from Ba [6p<sub>1/2</sub>ns,nd]<sub>J=1</sub> autoionizing states located within the [6p<sub>3/2</sub>12s<sub>1/2</sub>]<sub>J=1</sub> perturber
- I-88 König, A., Vietzke, K., Neukammer, J., Hieronymus, H., Kohl, M., Rinneberg, H., and Jönsson, G.

- Stark effect of barium Rydberg states in the l- and n-mixing region
- I-89 Vietzke, K., König, A., Neukammer, J., Kohl, M., Hieronymus, H., Rinneberg, H., and Jönsson, G.  
Diamagnetism of barium Rydberg states in the l- and n-mixing region
- I-90 Wunner, G., Ertl, T., Zech, I., Zeller, G., and Ruder, H.  
Modeling the Rydberg spectra of atomic hydrogen and deuterium in strong magnetic fields
- I-91 Onda, K.  
n dependence of l-changing cross section in Rydberg atom-ion collisions
- I-92 Zollars, B.G., Walter, C.W., Johnson, C.B., Smith, K.A., and Dunning, F.B.  
Rydberg atom collision processes at intermediate n
- I-93 Harth, K., Bregel, T., Ruf, M.-W., and Hotop, H.  
Ionization and electron transfer in thermal electron collisions involving laser excited neon Rydberg atoms
- I-94 Wunner, G., Steitz, A., Woelk, U., Schweizer, W., Herold, H., and Ruder, H.  
Search for quantum chaos in the wavefunctions of strongly magnetized Rydberg states

### I.j. Atomic and Molecular Structure

- I-95 Shimamura, I. and Iwai, M.  
An R-matrix method for wave functions that are accurate close to the coordinate origin
- I-96 Ivanov, M.V.  
Finite-difference calculations of hydrogen atom low-lying energy levels in magnetic field
- I-97 Gallas, J.A.C.  
Zeeman diamagnetism in hydrogen
- I-98 Shinada, M., Tachibana, M., and Nakamura, H.  
The electronic states of two-electron atoms in a magnetic field
- I-99 Feagin, J.M. and Briggs, J.S.  
The molecular description of two-electron excited states
- I-100 Haysak, M.I., Lengyel, V.I., Poida, V.Ju., and Shitikova, K.V.  
The role of correlations in calculation of autoionizing states of helium
- I-101 Koyama, N., Fukuda, H., Motoyama, T., and Matsuzawa, M.  
Doubly excited  $1S^e$  states of  $H^-$  and He below the N hydrogenic threshold with  $N \leq 6$
- I-102 Chang, T.N., Wang, M.C., and Bryon, T.  
Effect of the configuration interaction to the fine structure splitting for two-electron atoms
- I-103 Chang, T.N.  
Effect of the configuration interaction to the term values of the  $3snl^1L$  states of magnesium atom
- I-104 Li, B.  
A variational calculation for electron correlation of the B atom
- I-105 Talukdar, B. and Bhattacharya, J.  
L X-ray energy shifts for an additional vacancy in the  $M_V$  subshell
- I-106 van Kleef, Th.A.M., Joshi, Y.N., and Raassen, A.J.J.  
The structure of the silver V and VI systems:  $4d^n-4d^{n-1}5p$  ( $n=7,6$ )
- I-107 Ohno, M.  
g-Hartree ab-initio calculation of atomic ionization energies

- I-108 Rashid, K. and Fricke, B.  
Total energies of atomic systems
- I-109 Petkov, I.Zh. and Stoitsov, M.V.  
The energy density functional in the local scale transformation method
- I-110 Adachi, H., Gotoh, M., Yasui, J., and Mukoyama, T.  
Molecular orbital correlation diagrams by the DVX $\alpha$  method
- I-111 Tiemann, E. and Wolf, U.  
Predissociation of diatomic molecules by tunneling
- I-112 Damburg, R.J. and Martyshchenko, V.V.  
Large-order perturbation theory (LOPT) for oblate angular spheroidal functions (OASF)

### I.k. Atomic Oscillator Strengths and Optical Properties

- I-113 Oh, S.D. and Pratt, R.H.  
Proof that allowed Coulomb dipole matrix elements never vanish
- I-114 Aashamar, K., Luke, T.M., and Talman, J.D.  
Calculation of energy levels and transition strengths in the magnesium sequence using the multiconfiguration optimized potential model
- I-115 Lee, Y.T. and Reed, R.J.  
Calculation of spectral line intensities for transitions among  $n=2$  to  $n=3$  states of O-like Ar ions
- I-116 Biémont, E.  
Energy-level scheme and oscillator strengths for the 3s-3p, 3p-3d, and 3p-4s transitions in silicon sequence for elements potassium through nickel
- I-117 Biémont, E. and Hansen, J.E.  
Forbidden transitions in 3p<sup>4</sup> and 4p<sup>4</sup> configurations
- I-118 Biémont, E. and Brault, J.W.  
The infrared spectrum of magnesium and of aluminium ( $1800 < \sigma < 9000$  cm<sup>-1</sup>) and an extension of the term systems of MgI, MgII, AlI, and AlII
- I-119 Tang, A.Z. and Chan, F.T.  
Dynamic multipole polarizability of atomic hydrogen
- I-120 Kim, Y.S.  
Laser intensity effects on configuration mixing and energy levels of bound states
- I-121 Blagoev, K. and Dimitrov, N.  
Radiative lifetimes of 5d<sup>10</sup>n<sub>l</sub> states of Hg<sup>+</sup>
- I-122 Burstein, M.L., Kazantsev, S.A., Penkin, N.P., and Verolainen, Ya.F.  
Features of cascade effects in lifetime measurements
- I-123 Wang, M.S.  
The real part of X-ray forward Rayleigh scattering amplitude
- I-124 Makdisi, Y., Bhatia, K.S., and Zaidi, A.A.  
Absorption spectra of AsI in ultrahigh vacuum

### I.l. Fast-Ion Beam Spectroscopy and Inner-Shell Spectroscopy

- I-125 Egan, P.O., Dietrich, D.D., Chandler, G.A., Mokler, P.H., Reusch, S., and Hoffmann, D.H.H.  
X-ray spectroscopy of  $n=3 \rightarrow 2$  transitions in highly stripped heavy ions

- I-126 Ando, K., Awaya, Y., Kohmoto, S., Kumagai, H., Tonuma, T., Tsurubuchi, S., and Sato, K.  
Identification of highly ionized aluminum in beam-foil spectrum
- I-127 Sataka, M., Ozawa, K., Kawatsura, K., Ootuka, A., Komaki, K., Naramoto, H., Nakai, Y., Fujimoto, F., Kikuchi, A., and Ishii, K.  
Beam-foil spectroscopy of multicharged chlorine ions
- I-128 Laakkonen, A., Vuoristo, A., Graeffe, G., and Ohno, M.  
High resolution M X-ray emission spectra of the high Z elements
- I-129 Mariot, J.-M. and Ohno, M.  
The  $L_{23}$ - $M_{45}$  Auger electron spectra of the metallic elements  $^{47}\text{Ag}$  to  $^{51}\text{Sb}$
- I-130 Mariot, J.-M. and Ohno, M.  
The  $L_{23}$ - $MM$  Auger electron spectra of the metallic elements  $^{29}\text{Cu}$  and  $^{30}\text{Zn}$
- I-131 Bruch, R., Schneider, D., and Stolterfoht, N.  
High resolution zero-degree projectile electron spectroscopy: Resonances of ions
- I-132 Pegg, D.J., Thompson, J.S., Kvale, T.J., Alton, G.D., and Compton, R.N.  
The structure of  $\text{He}_2^-$  using fast-beam autodetachment spectroscopy

## CONTRIBUTED PAPERS: POSTER SESSION II

### II.a. Atomic Photoionization and Photodetachment

- II-1 Becker, U., Hölzel, R., Kerkhoff, H.G., Langer, B., Szostak, D., Wehlitz, R., Heilmann, P.A., and Shirley, D.A.  
Threshold behavior of photoelectron satellites: A probe of electron correlations
- II-2 Hamdy, H., Beyer, H.-J., Kleinpoppen, H., and West, J.  
Photoionization of Ca into excited  $\text{Ca}^+$  states
- II-3 Yoshino, M., Itoh, Y., Hayaishi, T., Itikawa, Y., Koizumi, T., Nagata, T., Sato, Y., Shibata, H., and Yagishita, A.  
Photoionization of subvalence p-subshell in alkali atoms
- II-4 Hayaishi, T., Morioka, Y., Yagishita, A., and Nakamura, M.  
Multiple photoionization from Kr 3p excitation and Xe 4p excitation
- II-5 Bechler, A. and Pratt, R.H.  
Angular distribution of inner-shell photoelectrons
- II-6 Ron, A., Goldberg, I.B., Stein, J., Yin, R.Y., Pratt, R.H., and Manson, S.T.  
Cancellation of relativistic, retardation, and higher multipole effects in photoeffect
- II-7 Jannitti, E., Nicolosi, P., Tondello, G., and Zheng, Y.Z.  
Photoabsorption experiments on transient laser-excited ions in the extreme ultraviolet
- II-8 Hippler, R., Schwier, H., Humpert, H.-J., and Lutz, H.O.  
Photoelectron spectroscopy of above-threshold ionization of xenon with circular and linear polarized light
- II-9 Narazaki, M., Harima, H., Tachibana, K., and Urano, Y.  
Ionization mechanism of Sr vapor in a resonant weak laser pulse
- II-10 Teraoka, Y., Murakami, J., and Sato, Y.  
Electric-field induced resonances observed by multiphoton ionization
- II-11 Cohen, S., Comtet, G., Butterfield, K.B., Clark, D.A., Donahue, J.B., Gram, P.A.M., MacArthur, D.W., Stewart, J.E., Bryant, H.C., Harvey, C.J., and Smith, W.W.

- Observations of the response to external electric fields of the  $1p^0$  resonance near  $n=3$  in the  $H^-$  continuum
- II-12 Comtet, G., Harvey, C.J., Stewart, J.E., Bryant, H.C., Butterfield, K.B., Clark, D.A., Donahue, J.B., Gram, P.A.M., MacArthur, D.W., Yuan, V., Smith, W.W., and Cohen, S.  
Stability of the  $1p^0$  shape resonance in  $H^-$  in moderate electric fields

## II.b. Molecular Photoionization and Photodissociation

- II-13 Hara, S. and Nakamura, M.  
Determination of photoionization asymmetry parameter
- II-14 Becker, U., Kerkhoff, H.G., Kupsch, M., Langer, B., Szostak, D., and Wehlitz, R.  
Autoionization spectroscopy of diatomic molecules
- II-15 Saito, N. and Suzuki, I.H.  
Kinetic energy releases in  $N_2$  dissociative ionization following soft X-ray absorption
- II-16 Masuoka, T.  
Dissociative single and double photoionization processes of  $N_2O$  observed by analytical photoion spectroscopy
- II-17 Hitachi, A., Yunoki, A., Suzuki, S., Kikuchi, J., and Doke, T.  
Photoionization of molecules in liquid Ar and Xe

## II.c. Positron-Atom Collisions

- II-18 Srivastava, R., Khurana, I., and Tripathi, A.N.  
Correlation effect in elastic scattering of  $e^\pm$  from helium atom in  $n^1S$  ( $n=1$  and  $2$ ) states
- II-19 Sinha, K.V., Grover, P.S., and Ghosh, A.S.  
Positron interaction models for helium gas atoms at low energies
- II-20 Gien, T.T.  
Total cross sections for electron- and positron-alkali atom collisions
- II-21 Brauner, M. and Briggs, J.S.  
The formation of positronium in critical angle scattering

## II.d. Electron-Atom and Electron-Ion Collisions: Elastic Scattering and Excitation

- II-22 Onaga, T., Tsuji, A., and Narumi, H.  
A new evaluation of eikonal amplitudes in elastic scattering
- II-23 Inokuti, M., Theodosiou, C.E., and Manson, S.T.  
Systematics of threshold phase shifts, or quantum defects, for atomic ions
- II-24 Bratanov, R.L., Sultanov, R.A., and Zubarev, A.L.  
The account of a closed channel contribution to the wave function in the problem of low energy  $e^-H$  scattering
- II-25 Srivastava, R., and Katiyar, A.K.  
A reliable calculation for  $n^1S$  and  $n^1P$  excitation in heliumlike ions
- II-26 Matsuzawa, M., Motoyama, T., Fukuda, H., and Koyama, N.  
Collisional properties of atoms in high-lying doubly excited states

- II-27 Msezane, A.Z., Reed, K.J., and Henry, R.J.W.  
Close coupling effects in electron impact excitation of  $Kr^{+28}$
- II-28 Msezane, A.Z. and Henry, R.J.W.  
Generalized oscillator strengths (GOS's) for dipole forbidden and allowed transitions in Cu, ZnII, and MgII
- II-29 Kim, Y.-K. and Desclaux, J.-P.  
Relativistic distorted-wave Born cross sections for electron-impact excitation of Li-like ions
- II-30 Wei, C.-M. and Huang, K.-N.  
Polarization correlation in elastic electron-atom scattering
- II-31 Chen, M.-K., Hsue, C.-S., Wei, C.-M., and Huang, K.-N.  
Electron scattering on hydrogenlike ions
- II-32 Csanak, G. and Cartwright, D.C.  
Coherence and correlation parameters and cross sections for the  $n^1P$  ( $n=2-8$ ) excitation of helium in the 25-500 eV energy range
- II-33 Cartwright, D.C. and Csanak, G.  
Cross sections and coherence and correlation parameters for electron impact excitation of the  $n^3P$  states of helium in the 25-500 eV range
- II-34 Silim, H.A., Beyer, H.-J., El-Farrash, A.H., El-Sheikh, A., and Kleinpoppen, H.  
Electron-photon polarization correlation measurements on the  $3^3P$  state of helium
- II-35 Ichimura, A. and Tsutsumi, T.  
Excitation of an ion by simultaneous two-electron impact

#### II.e. Electron-Atom and Electron-Ion Collisions: Ionization

- II-36 Watanabe, S.  
Ridge channels and Wannier's ionization threshold law
- II-37 Popov, Yu.V. and Shabalina, E.K.  
On dipolar ( $e,2e$ ) reaction
- II-38 Ashurov, A.R., Avakov, G.V., Blokhintsev, L.D., and Mukhamedzhanov, A.M.  
Determination of asymptotic coefficients of atomic wave functions from ( $e,2e$ ) reaction data
- II-39 Altick, P.L.  
A coupled-channel calculation of electron impact ionization using a model interaction
- II-40 Froelich, P.  
Bethé surfaces and Fano line shapes for inelastic electron-atom scattering by means of the complex coordinate method
- II-41 Kuo, T.-Y., Wei, C.-M., Chang, H.-W., and Huang, K.-N.  
Electron-impact ionization of heliumlike ions
- II-42 Binder, J., Koslowski, H.R., Huber, B.A., and Wiesemann, K.  
Ionization threshold for the production of  $Ar^{q+}$  ions by single electron impact
- II-43 Chaudhry, M.A., Duncan, A.J., Hippler, R., and Kleinpoppen, H.  
Electron spectroscopy of multiple ionization of rare gas atoms by electron impact
- II-44 Li, G.P., Sumida, F., Takayanagi, T., Wakiya, K., and Suzuki, H.  
Ionization of outer shell s-electrons in rare gas atoms
- II-45 Yamaguchi, T., Iketaki, Y., Takayanagi, T., Wakiya, K., Koike, F., and Suzuki, H.  
Analysis of the Read (PCI) effect on the profile of Auger electron spectra excited by electron impact

- II-46 Hirayama, T., Matsumoto, A., Ohtani, S., Takayanagi, T., Wakiya, K., and Suzuki, H.  
Single and double ionization cross sections for alkali and alkaline earth ions by electron impact
- II-47 Srivastava, R. and Pangantiwar, A.W.  
Electron excitation and decay of autoionizing states in alkali atoms
- II-48 Yamada, I., Danjo, A., Matsumoto, A., Ohtani, S., Tawara, H., Suzuki, H., Wakiya, K., and Yoshino, M.  
Electron-impact ionization of  $S^+$  and  $S^{2+}$
- II-49 Younger, S.M.  
Giant resonances in the electron impact ionization of heavy atoms and ions

#### II.f. Electron-Ion Recombination

- II-50 Sakimoto, K.  
Dielectronic recombination in electric fields
- II-51 Hahn, Y.  
Time-dependent field mixing and field shift
- II-52 Lin, Z.-K. and Chen, W.-J.  
Radiative recombination of electron-proton in strong laser field

#### II.g. Electron-Molecule and Electron-Solid Collisions

- II-53 Yagi, S., Ajiro, T., Naganawa, S., Fujita, Y., Kano, S.S., Takuma, H., Takayanagi, T., Wakiya, K., and Suzuki, H.  
Vibrational excitation of  $N_2$  by electron impact at  $E_1 < 2$  eV
- II-54 Ogawa, T., Tomura, H., Nakashima, K., and Kawazumi, H.  
Angular difference Doppler profiles of  $H^*$  produced in  $e-CH_4$ ,  $C_2H_2$  collisions and their dissociation dynamics
- II-55 de A E Souza, A.C. and Srivastava, S.K.  
Formation of negative ions by dissociative attachment of electrons with  $CH_4$  and  $SiH_4$
- II-56 Souza, A.C.A., Lucas, C.A., and de Souza, G.G.B.  
Generalized oscillator strengths for acetylene by 1 keV electron impact
- II-57 Spence, D., DeMille, D., and Dillon, M.A.  
Profile index reversal in the  $6\sigma \rightarrow n\pi$  window resonances of  $N_2O$
- II-58 Endo, I., Harada, M., Kasai, S., Niki, K., Sumi, Y., Tobiyama, M., Mutou, M., Tsujikawa, H., Watanabe, K., Yoshida, K., and Baba, K.  
Energy spectra of final state electrons for the Bremsstrahlung from a single crystal

#### II.h. Ion-Atom Collisions: High Energies

- II-59 Briggs, J.S. and Brauner, M.  
Break-up and scattering of 3-body Coulomb systems
- II-60 Kim, L. and Pratt, R.H.  
Comparison of a classical calculation of atomic Bremsstrahlung in a screened Coulomb potential with a quantum mechanical treatment
- II-61 Hino, K.-I. and Watanabe, T.  
Theory of radiative electron capture
- II-62 Kawatsura, K., Ootuka, A., Sataka, M., Komaki, K., Naramoto, H.,

- Ozawa, K., Nakai, Y., and Fujimoto, F.  
Radiative electron capture for  $\text{Cl}^{16+}, 17+$  ions on He target
- II-63 Tong, X.-M. and Li, J.-M.  
Atomic collision processes with high-energy atomic ions
- II-64 Iwai, M., Shimamura, I., and Watanabe, T.  
Extended Bethe surface: Behavior of the generalized oscillator strength along isoelectronic sequence
- II-65 Mukoyama, T. and Shima, K.  
Excitation and ionization of atoms by heavy charged-particle impact
- II-66 Mizogawa, T., Awaya, Y., Kambara, T., Kanai, Y., Kase, M., Kumagai, H., Mokler, P.H., and Shima, K.  
Target thickness dependence of K $\alpha$  satellite intensities of Ar ions colliding with thin carbon foils
- II-67 Karashima, S., Watanabe, T., Zhang, X.-X., Ma, Q.-C., and Liu, Y.-Y.  
Electron stripping cross sections of multiply charged ions by neutral atoms
- II-68 Zhou, S.-M., Zhang, X.-X., Ma, Q.-C., Cheng, J.-F., Liu, Y.-Y., and Watanabe, T.  
Calculation of ionization cross sections for multicharged ions by proton impact with BEA and TFD method
- II-69 Dewangan, D.P. and Eichler, J.  
First-order theory of electron capture with Coulomb boundary conditions
- II-70 Chen, W.-J., Song, T.-B., and Narumi, H.  
Differential cross sections for electron capture in proton-hydrogen collisions
- II-71 Rissler, J. and Bruch, R.  
State selective electron capture cross sections:  $\text{H}^+$  in collisions with Na
- II-72 Yamazaki, Y., Miller, P.D., Krause, H.F., Pepmiller, P.L., Datz, S., Sellin, I.A., and Stolterfoht, N.  
Strong forward-backward asymmetries in electron emission from over-lapping resonance states produced by transfer excitation in fast  $\text{C}^{3+}$ +He collisions
- II-73 Katayama, I., Fujiwara, M., Noro, T., Ikegami, H., Fukuzawa, F., Yoshida, K., Aoki, A., Haruyama, Y., Sugai, K., and Ogawa, H.  
Electron capture from K shells in Ag and Sn targets by 72 and 52 MeV  $^3\text{He}^{2+}$  beams
- II-74 Shima, K., Mukoyama, T., Ishihara, T., Kakuta, M., Nagai, S., Momoi, T., Fujioka, S., Yamanouchi, M., and Mikumo, T.  
Charge exchange of fast heavy ions in carbon foils — Small angle scattering —
- II-75 Itoh, A. and Rudd, M.E.  
Production of fast Ar and Kr recoil ions by  $\text{H}^+$  impact
- II-76 Il'in, R.N., Sakharov, V.I., and Serenkov, I.T.  
Scattering of fast  $\text{Cl}^-$  ions on Ar atoms
- II-77 Shiomi, N., Sakamoto, N., Ogawa, H., and Ishiwari, R.  
Geometrical effect on the measurement of stopping power: Angle dependent energy loss of 3- and 5-MeV protons in Cu
- II-78 Kitagawa, M.  
Inelastic response in inhomogeneous many-electron systems

## II.i. Ion-Atom Collisions: Low Energies

- II-79 Shingal, R.  
Charge exchange and excitation in  $\text{Li}^+$ +Li collisions

- II-80 Shingal, R.  
Study of homonuclear  $\text{Na}^+ + \text{Na}$  collisions
- II-81 Shimakura, N., Sato, H., Kimura, M., and Watanabe, T.  
Electron capture in pseudo-two-electron system  $\text{O}^{6+} + \text{He}$ : Molecular basis expansion method
- II-82 Kobayashi, K., Toshima, N., and Ishihara, T.  
A new approach to rearrangement collisions
- II-83 Kimura, M., Kobayashi, N., Ohtani, S., and Tawara, H.  
State selective one-electron capture by highly stripped C, N, and O ions from H atoms
- II-84 Lavrov, V.M., Lomsadze, R.A., and Il'in, R.N.  
Ionization in  $\text{H}^0, \text{H}^+, \text{H}_2^+, \text{H}_3^+ - \text{Na}$  collisions in energy range 3-16 keV
- II-85 Lavrov, V.M., Lomsadze, R.A., and Kikian, B.I.  
Transition probabilities and ionization in  $\text{Ne}^+ - \text{Na}$  and  $\text{Ar}^+ - \text{Na}$  collisions
- II-86 Asatrian, V.R., Ovchinnikov, S.Yu., and Shergin, A.P.  
Continuous electron spectrum in  $\text{H}^+ - \text{He}$  collisions at keV-energies
- II-87 Asatrian, V.R., Afrosimov, V.V., Gordeev, Yu.S., and Shergin, A.P.  
Electrons from  $\text{He}^+ - \text{He}$  quasimolecule
- II-88 Sakaue, H., Ikezaki, Y., Wakiya, K., Takayanagi, T., Suzuki, H., Koike, F., and Yagishita, A.  
Anisotropy of electron emission from aligned states of neon
- II-89 Hippler, R., Harbich, W., Faust, M., Kleinpoppen, H., and Lutz, H.O.  
Alignment and orientation of  $\text{H}(2p)$  in  $\text{H}, \text{H}^+ - \text{rare gas}$  collisions
- II-90 Kimura, M. and Lin, C.D.  
Alignment and polarization of  $\text{H}(2p)$  following  $\text{H}^+ - \text{He}$  collisions studied using a unified AO-MO matching method
- II-91 Kimura, M. and Lane, N.F.  
Theoretical study of alignment and orientation in  $\text{Li}^+ + \text{He}$  collisions
- II-92 Jitschin, W., Osimitsch, S., Reihl, H., Mueller, D.W., Kleinpoppen, H., and Lutz, H.O.  
Spin exchange in the  $\text{Na } 3s-3p$  excitation by  $\text{Ne}^+$  ion impact
- II-93 Khatri, M.H.  
Retarding potential analyzer in a drift tube
- II-94 Koike, F.  
Theory of electron detachment in slow anion impact on atoms
- II.j. Ion-Molecule Collisions and Cluster Ions**
- II-95 Shiraishi, Y. and Kusunoki, I.  
Chemiluminescent and near-resonant charge transfer reaction:  $\text{O}^+(^2D) + \text{HCl}(X^1\Sigma^+) \rightarrow \text{O}(^3P) + \text{HCl}^+(A^2\Sigma^+)$
- II-96 Nakamura, T., Kobayashi, N., and Kaneko, Y.  
Ion energy-loss spectroscopy for the collision of  $\text{Ar}^+(^2P_J)$  with  $\text{H}_2$  and  $\text{N}_2$
- II-97 Latimer, C.J., Simpson, F.R., Lindsay, B.G., McMurray, W.A., and You-sif, F.B.  
The energy and angular distribution of fragment protons produced in  $\text{H}^+ - \text{H}_2$  collisions
- II-98 Itoh, A. and Rudd, M.E.  
Production of recoil ions from molecular targets in close collisions with 20 keV  $\text{H}^+$  beams
- II-99 Tonuma, T., Matsuo, T., Baba, K., Kase, M., Kambara, T., Be, S.H., Kumagai, H., Kohno, I., and Tawara, H.  
Multiply charged  $\text{C}^{1+}$  and  $\text{O}^{1+}$  ions from molecular targets by 1.05

MeV/amu Ar<sup>12+</sup> ion impact

- II-100 Arnold, M., Kowalski, J., zu Putlitz, G., Stehlin, T., and Träger, F.  
Charge transfer reactions with mass-selected cluster ions
- II-101 Begemann, W., Dreihöfer, S., Meiwes-Broer, K.H., and Lutz, H.O.  
Stability of sputtered metal cluster ions
- II-102 Badrinathan, C. and Mathur, D.  
On the stability of doubly charged molecular ions

## II.k. Collisions between Neutral Species and with Solids

- II-103 Wu, V.W.-K.  
Simulation of differential cross sections of reactions K+HBr and K+DBr
- II-104 Suck Salk, S.H. and Lutrus, C.K.  
A 'generalized' perturbation formalism for direct and resonant rearrangement collision processes involving atomic and molecular systems
- II-105 Schatz, G.C.  
Accurate quantum scattering calculations of cross sections and rate constants for atom-diatom (A+BC) reactive collisions
- II-106 Waibel, H., Ruf, M.-W., Hotop, H., and Meyer, W.  
Improved experimental and theoretical study of He(2<sup>3</sup>S)+H(2<sup>2</sup>Σ)
- II-107 Hakuta, K., Nakayama, K., and Takuma, H.  
Photo-assisted recombination between Kr and F atoms: Excitation of the lasing level of KrF excimer
- II-108 Komatsu, H., Kigoshi, T., Shigehara, T., Kano, S.S., Takuma, H., and Shimizu, T.  
Study of KrF\* initial state distribution by crossed molecular beam experiment
- II-109 Matsushima, F., Kajita, M., Shimizu, T., and Yasuhara, N.  
IR laser study of "state-to-state" collisional processes of molecules on solid surface
- II-110 Okude, S., Matsushima, F., Kuze, H., and Shimizu, T.  
Decomposition of vapor phase glycine (NH<sub>2</sub>CH<sub>2</sub>COOH) on hot surfaces
- II-111 Hart, M.W., Hammond, M.S., Dunning, F.B., and Walters, G.K.  
Spin polarized metastable atom deexcitation spectroscopy (SPMDS): A sensitive probe of surface electronic and magnetic structure
- II-112 Barskaya, A.Ya., Varshavskii, S.P., Ryazantseva, O.L., and Sena, L.A.  
Solid material sputtering by the streams of neutral atoms of average energies

## II.l. Plasma Spectroscopy

- II-113 Morita, S., Koide, S., and Fujita, J.  
X-ray spectroscopy in JIPT-IIU Tokamak using curved-crystal spectrometer
- II-114 Kato, T., Morita, S., and Masai, K.  
X-ray spectra of TiXXI-TiXIX ions from JIPT-IIU Tokamak plasma
- II-115 Masai, K. and Kato, T.  
Density dependence of FeXXII line intensity ratio
- II-116 Kondo, K., Terry, J.L., Rice, J.E., and Marmor, E.S.  
Precision measurements of the wavelengths of emission lines of Mg-like and Na-like Kr in Alcator C plasmas
- II-117 Weisheit, J.C.  
Spectral line broadening by recombination

- II-118 Fujima, K., Mima, K., and Watanabe, T.  
X-ray spectra emitted from high density and high temperature Si
- II-119 Kiyokawa, S., Sasayama, C., and Kagawa, T.  
Charge states and energy levels of ions imbedded in hot dense plasmas
- II-120 Mima, K., Kawakami, R., Hattori, F., Takabe, H., Nishihara, K., Totsuji, H., and Furutani, Y.  
Interaction of X-ray radiation with hot dense plasmas
- II-121 Mochizuki, T., Ikeda, N., Kodama, R., Shiraga, H., Mima, K., and Yamanaka, C.  
Experimental evidence of ionization burn-through and absorption resonance in radiation energy transport in solid-density plasmas
- II-122 Bobashev, S.V., Platonov, Yu.Ya., Salashchenko, N.N., Simanovsky, D.M., Shmaenok, L.A., and Zabrodin, N.N.  
The use of recombination radiation of laser-produced plasma for testing multilayer X-ray mirrors
