

CONTENTS

Preface	(i)-(iv)
Chapter 1. Systems and equations with time varying coefficients	1-19
1.1. Introduction	1
1.2. Special features of systems and equations with varying coefficients	1
1.3. Examples of time varying systems	8
1.4. Conclusions	16
Exercises	18
Chapter 2. Formulation of stability and instability problems.	20-57
2.1. Introduction	20
2.2. Representation of the feedback system	23
2.3. Preliminaries	27
2.4. Formulation of stability and instability problems	34
2.5. Methods used in stability and instability analyses	40
2.6. Conclusions	52
Exercises	53
Chapter 3. Exponential stability of feedback systems in differential form	58-100
3.1. Introduction	58
3.2. Preliminaries	59
3.3. Generation of quadratic forms	65
3.4. Linear system exponential stability	72
3.5. Nonlinear system exponential stability	79
3.6. Comparison with other results	87
3.7. Conclusions	89
Appendix	90-91
Exercises	91-100

Chapter 4.	Exponential stability of feedback systems in integral form	101-143
4.1.	Introduction	101
4.2.	Preliminaries	102
4.3.	Basic lemmas on nonnegative quadratic functionals	104
4.4.	Exponential stability criteria	117
4.5.	Geometric interpretation	124
4.6.	Conclusions	129
	Appendices 4.1-4.5	136-141
	Exercises	141-144
Chapter 5.	L_2 -stability of feedback systems in general integral form	145-168
5.1.	Introduction	145
5.2.	Preliminaries	149
5.3.	Main result and its proof	152
5.4.	Generalization to feedback systems in operator form	157
5.5.	Conclusions	163
	Exercises	165-168
Chapter 6.	Instability of feedback systems in differential form	169-204
6.1.	Introduction	169
6.2.	Possible approaches to instability analysis	170
6.3.	A general approach to instability analysis.	174
6.4.	Derivation of instability criteria, Part I	178
6.5.	Derivation of instability criteria, Part II	183
6.6.	Comparison with other results in literature	194
6.7.	Conclusions	195
	Appendices 6.1 - 6.6	196-200
	Exercises	200-204

Chapter 7. L_2 -instability of feedback systems in integral form	205-232
7.1. Introduction	205
7.2. Derivation of instability conditions.	206
7.3. Instability criteria of literature	222
7.4. Conclusions	227
Appendices 7.1 - 7.4	228-230
Exercises	231-232
Epilogue	233-234
Errata	235-237
References	238-256
